Significant progress in HIV prevention and control has been achieved worldwide. This book reviews emerging challenges and new opportunities for prevention. Chapters cover such topics as challenges in the media within the context of advancing technologies and societal perceptions, barriers to antiretroviral treatment and suggestions for improvement, opportunities in nanotechnology-based drug delivery systems, the central role of sexual and reproductive health in consolidating a human rights-based program, and much more. Client-focused models for integrating employment as a social determinant in the HIV/AIDS programs are discussed and recommended.

AIDS Updates World Bank Publications

Less than one percent of all U.S. businesses export, and of those that do, 56 percent sell to only one market. Business owners who do not export tell researchers that the reason for not exporting is that they are not confident choosing the best markets for their products and services, and that they are wary of risk. *Free Trade Agreements: 20 Ways to Grow Your Business* takes the mystery out of exporting by analyzing opportunities in country markets where the U.S. government has negotiated preferential access for U.S. companies. The book provides detailed information on best prospects, insights on the economic and political situation, tips on business culture, and free and low-cost assistance for entering each market. The book also describes how dramatically trade has grown as a result of the free trade agreements. Also included are case studies of smaller U.S. companies that have succeeded by targeting this group of countries which includes Canada and Mexico.

Furthermore, new agreement partners, including Peru, South Korea, and Colombia, are explored. Written in plain language and illustrated with graphs and tables, this resource is the long-awaited handbook for entering and succeeding in new markets. Many people in developing countries lack access to health technologies. Why does this problem persist? What can be done to improve access, especially for the poor in poor countries? Frost offers a comprehensive analytical framework for access and examines six case studies to explain why some health technologies achieved more access than others.

A Market Facilitator's Guide to Participatory Agroenterprise Development United Nations
While indigenous peoples make up around 370 million of the world's population - some 5 per cent - they constitute around one-third of the world's 900 million extremely poor rural people. Every day, indigenous communities all over the world face issues of violence and brutality. Indigenous peoples are stewards of some of the most biologically diverse areas of the globe, and their biological and cultural wealth has allowed indigenous peoples to gather a wealth of traditional knowledge which is of immense value to all humankind. The publication discusses many of the issues addressed by the Declaration on the Rights of Indigenous Peoples and is a cooperative effort of independent experts working with the Secretariat of the Permanent Forum on Indigenous Issues. It covers poverty and well-being, culture, environment, contemporary education, health, human rights, and includes a chapter on emerging issues.

World Report 2020 Skyhorse Publishing Inc.

The report presents the latest assessment of global trends in wildlife crime. It includes discussions on illicit rosewood, ivory, rhino horn, pangolin scales, live reptiles, tigers and other big cats, and European eel. The COVID-19 (coronavirus) pandemic has highlighted that wildlife crime is a threat not only to the environment and biodiversity, but also to human health, economic development and security. Zoonotic diseases - those caused by pathogens that spread from animals to humans - represent up to 75% of all emerging infectious diseases. Trafficked wild species and the resulting products offered for human consumption, by definition, escape any hygiene or sanitary control, and therefore pose even greater risks of infection.

Free Trade Agreements: 20 Ways to Grow Your Business Catholic Relief Services

This publication is a product of the experiences and lessons learned while implementing agroenterprise projects in eastern and southern Africa. A Market Facilitator's Guide is based on a resource-to-consumption framework, which is the central theme of the "enabling rural innovation"

approach for rural development. This approach seeks to empower farmer groups with the necessary skills to make informed decisions for their economic development, based on an analysis of their surroundings, assets and skills. The methodology also aims for outcomes that are equitable, gender focused and participatory.

In its fifth edition, this report focuses on recent developments in Africa's banking sectors and the policy options for all stakeholders. The study of banking sectors across all African sub-regions includes the results of the EIB survey of banking groups operating in Africa. Three thematic chapters address challenges and opportunities for financing investment in Africa: Investing sustainably in Africa's cities; Mobilising agricultural value chain financing in Africa: why and how; Remittances and financial sector development in Africa.

Get Up, It's Time Springer Science & Business Media

This book contains selected papers presented at the 4th International Seminar of Contemporary Research on Business and Management (ISCRBM 2020), which was organized by the Alliance of Indonesian Master of Management Program (APMMI) and held in Surubaya, Indonesia, 25-27 November 2020. It was hosted by the Master of Management Program Indonesia University and co-hosts Airlangga University, Sriwijaya University, Trunojoyo University of Madura, and Telkom University, and supported by Telkom Indonesia and Triputra. The seminar aimed to provide a forum for leading scholars, academics, researchers, and practitioners in business and management area to reflect on current issues, challenges and opportunities, and to share the latest innovative research and best practice. This seminar brought together participants to exchange ideas on the future development of management disciplines: human resources, marketing, operations, finance, strategic management and entrepreneurship.

Law Enforcement Intelligence Africa Research and Publications

This important report, *Global Trends 2030-Alternative Worlds*, released in 2012 by the U.S. National Intelligence Council, describes megatrends and potential game changers for the next decades. Among the megatrends, it analyzes: - increased individual empowerment - the diffusion of power among states and the ascent of a networked multi-polar world - a world's population growing to 8.3 billion people, of which sixty percent will live in urbanized areas, and surging cross-border migration - expanding demand for food, water, and energy It furthermore describes potential game changers, including: - a global economy that could thrive or collapse - increased global insecurity due to regional instability in the Middle East and South Asia - new technologies that could solve the

problems caused by the megatrends - the possibility, but by no means the certainty, that the U.S. with new partners will reinvent the international system Students of trends, forward-looking entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades will find this essential reading.

Popular Mechanics Cosimo Reports

The ABC of Communism is a book written by Nikolai Bukharin and Evgenii Preobrazhensky in 1919, during the Russian Civil War. Originally written to convince the proletariat of Russia to support the Bolsheviks, it became "an elementary textbook of communist knowledge". It became the best known and most widely circulated of all pre-Stalinist expositions of Bolshevism and the most widely read political work in Soviet Russia. Long out of print, and often only being available with the abridged first few chapters, this version includes completed new transcriptions of the last eight chapters along with the Programme of the Communist Party of Russia, a glossary, and a new word index. The ABC of Communism is written to be a systematic description of communism and the proletarian condition under capitalism, away from the reality of Soviet life, into a redirection towards a militant optimism on the horizon. This book in the Radical Reprint series from Pattern Books is made to be accessible and as close to manufacturing cost as possible.

Private Health Sector Assessment in Tanzania United Nations

This book focuses on Africa's challenges, achievements, and failures over the past several centuries using an interdisciplinary approach that combines theory and fact and evidence-based practices and interventions in public health, and argues that most of the health problems in Africa are not a result of scarce or lack of resources, but of the misconceived and misplaced priorities that have left the continent behind every other on the globe in terms of health, education, and equitable distribution of opportunities and access to (quality) health as agreed by the United Nations member states at Alma-Ata in 1978.

Guide to Foreign and International Legal Citations European Investment Bank

Young people in sub-Saharan Africa are growing up in rapidly changing social and economic environments which produce high levels of un- and underemployment. Job creation through entrepreneurship is currently being promoted by international organizations, governments and NGOs as a key solution, despite there being a dearth of knowledge about youth entrepreneurship in an African context. This book makes an important contribution by exploring the nature of youth entrepreneurship in Ghana, Uganda and Zambia. It provides new insights into conceptual and methodological discussions of youth entrepreneurship as well as presenting original empirical data. Drawing on quantitative and qualitative research, conducted under the auspices of a collaborative, interdisciplinary and comparative research project, it highlights the opportunities and challenges young people face in setting up and running businesses. Divided into a number of clear sections, each with its own introduction and conclusion, the book considers the nature of youth entrepreneurship at the national level, in both urban and rural areas, in specific sectors - including mobile telephony, mining, handicrafts and tourism - and analyses how key factors, such as microfinance, social capital and entrepreneurship education, affect youth entrepreneurship. New light is shed on the multi-faceted nature of youth entrepreneurship and a convincing case is presented for a more nuanced understanding of the term entrepreneurship and the situation faced

by many African youth today. This book will be of interest to a wide range of scholars interested in youth entrepreneurship, including in development studies, business studies, youth studies and geography, as well as to development practitioners and policy makers. The Open Access title has now been added to the Open Access page. <http://www.tandfebooks.com/page/openaccess>
Global Trends 2030: Alternative Worlds Routledge

This report offers one of the most comprehensive insights into global trends in international culture, production, seizure and price of illicit drugs. It examines trends in the world's four major markets: opium and heroin, coca and cocaine, cannabis, and amphetamine-type stimulants. This edition provides an in-depth examination of the link between transnational organized crime and drug trafficking. A detailed statistical appendix on production, prices and consumption completes this book, which gives the reader a comprehensive picture of the world's drug problem.

World Business Directory UN

Violence at work, ranging from bullying and mobbing, to threats by psychologically unstable co-workers, sexual harassment and homicide, is increasing worldwide and has reached epidemic levels in some countries. This updated and revised edition looks at the full range of aggressive acts, offers new information on their occurrence and identifies occupations and situations at particular risk. It is organised in three sections: understanding violence at work; responding to violence at work; future action.

Developing bankable business plans Createspace Independent Pub

This intelligence guide was prepared in response to requests from law enforcement executives for guidance in intelligence functions in a post-September 11 world. It will help law enforcement agencies develop or enhance their intelligence capacity and enable them to fight terrorism and other crimes while preserving community policing relationships. The world of law enforcement intelligence has changed dramatically since September 11, 2001. State, local, and tribal law enforcement agencies have been tasked with a variety of new responsibilities; intelligence is just one. In addition, the intelligence discipline has evolved significantly in recent years. As these various trends have merged, increasing numbers of American law enforcement agencies have begun to

explore, and sometimes embrace, the intelligence function. This guide is intended to help them in this process. The guide is directed primarily toward state, local, and tribal law enforcement agencies of all sizes that need to develop or reinvigorate their intelligence function. Rather than being a manual to teach a person how to be an intelligence analyst, it is directed toward that manager, supervisor, or officer who is assigned to create an intelligence function. It is intended to provide ideas, definitions, concepts, policies, and resources. It is a primera place to start on a new managerial journey. Every law enforcement agency in the United States, regardless of agency size, must have the capacity to understand the implications of information collection, analysis, and intelligence sharing. Each agency must have an organized mechanism to receive and manage intelligence as well as a mechanism to report and share critical information with other law enforcement agencies. In addition, it is essential that law enforcement agencies develop lines of communication and information-sharing protocols with the private sector, particularly those related to the critical infrastructure, as well as with those private entities that are potential targets of terrorists and criminal enterprises. Not every agency has the staff or resources to create a formal intelligence unit, nor is it necessary in smaller agencies. This document will provide common language and processes to develop and employ an intelligence capacity in SLTLE agencies across the United States as well as articulate a uniform understanding of concepts, issues, and terminology for law enforcement intelligence (LEI). While terrorism issues are currently most pervasive in the current discussion of LEI, the principles of intelligence discussed in this document apply beyond terrorism and include organized crime and entrepreneurial crime of all forms. Drug trafficking and the associated crime of money laundering, for example, continue to be a significant challenge for law enforcement. Transnational computer crime, particularly Internet fraud, identity theft cartels, and global black marketeering of stolen and counterfeit goods, are entrepreneurial crime problems that are increasingly being relegated to SLTLE agencies to investigate simply because of the volume of criminal incidents. Similarly, local law enforcement is being increasingly drawn into human trafficking and illegal immigration enterprises and the often associated crimes related to counterfeiting of official documents, such as passports, visas, driver's licenses, Social Security cards, and credit cards. All require an intelligence capacity for SLTLE, as does the continuation of historical organized crime activities such as auto theft, cargo theft, and virtually any other scheme that can produce profit for an organized criminal entity. To be effective, the law enforcement community must interpret intelligence-related language in a consistent manner. In addition, common standards, policies, and practices will help expedite intelligence sharing while at the same time protecting the privacy of citizens and preserving hard-won community policing relationships.~
