"Expert advice on how to pass Armed Forces selection tests. Includes sample tests for the Army, Royal Air Force and the Royal Navy"--Cover

The Day of Doom Penguin

An eight-test experimental battery for selection of recruiter-salesmen was administered to 210 students taking the Recruiter Course at Lackland AFB. An interim operational battery (the Recruiter-Salesman Selection Test-63) was constructed, using the results of the preliminary testing of this small sample. Administration of the eight-test experimental battery was continued, however, until approximately 1000 recruiter -salesman course students had been tested. Background variables of

age, education, marital status, number of dependents, length of military service, and AQE scores were combined with the test variables and analyzed to determine possibility of greater predictive power of other combinations of variables or of different weights for variables already included in the RSST-63. The predictor variables were correlated against school success and against a field rating criterion. Approximately half the group was used as a computing sample and the remainder as a cross-validation sample. Results indicated that the tests of the RSST-63, weighted as originally described, predict pass/fail in Recruiter School as well as it can be predicted ($r = .21$) by any combination of the variables used in the study. No combination of these variables predicts field ratings. It is doubtful that any predictor will be found to be valid against available field criteria. (Author).

Selection Examination English Tests
Routledge

Since the mid-80s several laboratories around the world have been developing techniques for the operational use of tests derived from item-generation. According to the experts, the major thrust of test development in the next decade will be the harnessing of item generation technology to the production of computer developed tests. This is expected to revolutionize the way in which tests are constructed and delivered. This book is a compilation of the papers presented at a symposium held at ETS in Princeton, attended by the world's foremost experts in item-generation theory and practice. Its goal is to present the major applications of cognitive principles in the construction of ability, aptitude, and achievement tests. It is an intellectual contribution to test development that is unique, with great potential for changing the ways tests are generated. The intended market includes professional educators and psychologists interested in test generation.

The Voyage of the Beagle YOUTH COMPETITION TIMES

This volume features the complete text of the material presented at the Twentieth Annual Conference of the Cognitive Science Society. As in previous years, the symposium included an interesting mixture of papers on many topics from researchers with diverse backgrounds and different goals, presenting a multifaceted view of

cognitive science. This volume contains papers, posters, and summaries of symposia presented at the leading conference that brings cognitive scientists together to discuss issues of theoretical and applied concern. Submitted presentations are represented in these proceedings as "long papers" (those presented as spoken presentations and "full posters" at the conference) and "short papers" (those presented as "abstract posters" by members of the Cognitive Science Society).

"Vivid and remarkably fresh...Philbrick has recast the Pilgrims for the ages."--
The New York Times Book Review
Finalist for the Pulitzer Prize in History
New York Times Book Review Top Ten books of the Year
With a new preface marking the 400th anniversary of the landing of the Mayflower. How did America begin? That simple question launches the acclaimed author of *In the Hurricane's Eye* and *Valiant Ambition* on an extraordinary journey to understand the truth behind our most sacred national myth: the voyage of the

Mayflower and the settlement of Plymouth Colony. As Philbrick reveals in this electrifying history of the Pilgrims, the story of Plymouth Colony was a fifty-five year epic that began in peril and ended in war. New England erupted into a bloody conflict that nearly wiped out the English colonists and natives alike. These events shaped the existing communities and the country that would grow from them.

Selected Technical Publications Ginn
"Computerised Test Generation for Cross-National Military Recruitment' by Prof. Sidney H. Irvine is a handbook for use in occupational psychology, test construction and psychometrics. The book describes the development of the British Army Recruitment Battery (BARB) by Prof. Irvine and his colleagues at the University of Plymouth. BARB is a computer-administered selection battery that is still in use to this day and is capable of developing new parallel tests for every candidate in the recruitment process. In telling the story, Sidney Irvine describes not only the development of the battery itself, funded by the UK Ministry of Defence, but all the work that went on before and afterwards, in the United Kingdom, with European allies and in the United States.
x000D Prof. Irvine argues that judicious application of the current state-of-the art in psychometric selection tests can be used to maximise retention and minimise attrition. As such, this long-awaited book will be of great interest to psychologists, psychometricians, test developers, those involved in personnel selection and all with an interest in military history, in particular the history of military science. With a foreword and chapter introductions from a worldwide array of subject matter experts, the book also has a full subject index and an

extensive bibliography. I commend it heartily.” — Professor Jamie Hacker Hughes CPsychol CSci FBPsS, Former Defence Consultant Advisor in Psychology, Ministry of Defence, United Kingdom.

Classic Books Library presents this brand new edition of the "Narrative of the Captivity and Restoration of Mrs. Mary Rowlandson" (1682). Mary Rowlandson (c. 1637-1711), nee Mary White, was born in Somerset, England. Her family moved to the Massachusetts Bay Colony in the United States, and she settled in Lancaster, Massachusetts, marrying in 1656. It was here that Native Americans attacked during King Philip's War, and Mary and her three children were taken hostage. This text is a profound first-hand account written by Mary detailing the experiences and conditions of her capture, and chronicling how she endured the 11 weeks in the wilderness under her Native American captors. It

was published six years after her release, and explores the themes of mortal fragility, survival, faith and will,

and the complexities of human nature. It is acknowledged as a seminal work of American historical literature.
