The societies of ancient Europe underwent a continual process of militarisation, and this would come to be a defining characteristic of the early Middle Ages. The process was neither linear nor mono-causal, but it affected society as a whole, encompassing features like the lack of demarcation between the military and civil spheres of the population, the significance attributed to weapons beyond their military function and the wide recognition of martial values. Early medieval militarisation assembles twenty studies that use both written and archaeological evidence to explore the phenomenon of militarisation and its impact on the development of the societies of early medieval Europe. The interdisciplinary investigations break new ground and will be essential reading for scholars and students of related fields, as well as non-specialists with an interest in early medieval history.

Humanity is coming home. Weeks after landing on Earth, the Hundred have managed to create a sense of order amidst their wild, chaotic surroundings. But their delicate balance comes crashing down with the arrival of new dropships from space. These new arrivals are the

lucky ones-back on the Colony, the oxygen is almost gone-but after making it safely to Earth, GLASS's luck seems to be running out. CLARKE leads a rescue party to the crash site, ready to treat the wounded, but she can't stop thinking about her parents who may still be alive. Meanwhile, WELLS struggles to maintain his authority despite the presence of the Vice Chancellor and his armed guards, and BELLAMY must decide whether to face or flee the crimes he thought he'd left behind. It's time for the Hundred to come together and fight for the freedom they've found on Earth, or risk losing everything--and everyone--they love.

This volume is a collection of essays based on papers given at the Nordic Translation Conference, which took place in London in March 2008. The purpose of the collection is twofold. First, it serves to place the Nordic languages firmly into the field of translation studies, where hitherto little research has focused on the Nordic region; the essays include many Nordic-specific studies and ideas. Second, the book presents research and conclusions which

are relevant to translation studies in all languages and cultures. Therefore this volume, which covers a wide range of Nordic languages and both literary and non-literary topics, is unambiguously pertinent to the Nordic countries while also being universally valuable.

Written by one of the foremost historians of the Roman Empire, this collection of both new and previously published essays forms a colorful picture of daily life in the Mediterranean world between A.D. 50 and 450. Here, for example, the author applies statistical analysis to broad groups of people on matters ranging from justice through medicine to language. In so doing he is able to substantiate general statements about routines in ordinary people's behavior and to detect within these routines the very changes that constitute history. Such analysis also shows how this era benefits from the same historiographical approaches that have so successfully elucidated sociocultural phenomena in other periods. Drawing from statistical analysis and many other historical approaches, these essays on popular mores in the Roman Empire cover such topics as language and art, acculturation, thought and religion, sex and gender, cruelty and slavery, and aspects of class and power relations. The author introduces the collection with

several essays on historical method, as it pertains to the richness of documentation and variety to be found in the region and period chosen. Ramsay MacMullen is Dunham Professor of History and Classics at Yale University. The most recent of his many books include *Corruption and the Decline of Rome* and *Christianizing the Roman Empire: A.D. 100-400*, both published by Yale. Originally published in 1990.
