My name is Galina St George. I am a Natural Health and Beauty Practitioner, Hypnotherapist, Stress Management and Health Coach. I have

been studying natural health since 1999 and have completed many courses all of which required substantial learning, including doing case studies as part of the courses. While doing my case studies, I noticed that all of us had to create our own consultation forms. Having finished working with the client, it was very easy to misplace and lose the forms since they were just printed pieces of paper. Now, imagine being a practising therapist. Every consultation form contains the information which a therapist should keep just in case there are issues with the client which may involve an insurance company. The other point is that with the tightening of GDPR rules recently, it

is now more important than ever to keep all the records safe. Imagine your consultation forms with sensitive and very private information lying all over the place and being found by other people! I do understand that these days many therapists use computers to fill in the consultation forms and keep their clients' records. However, computers can get hacked. This is why I believe that nothing can replace an old-fashioned method of filling out physical consultation forms. So, to help my fellow-therapists and students who are learning to become ones, I have decided to create this book of consultation forms and appointment sheets for stress management

practitioners. You can use it for booking and treating new and existing clients. You can also use these forms for your case studies. I am planning to create similar books for other treatments, such as reflexology, aromatherapy, sports massage and many others. If you already offer or plan to study other therapies, do check my author page! [Client Record Log for Lash Extensions](#) Independently Published

PICK Tired, stressed,

help from your
partner? Imagine
running your
household (and life!) in
a new way... It started
with the Sh*t I Do List.
Tired of being the

“shefault” parent responsible for all aspects of her busy household, Eve Rodsky counted up all the unpaid, invisible work she was doing for her family—and then sent that list to her husband, asking for things to change. His response was...underwhelming. Rodsky realized that simply identifying the issue of unequal labor on the home front wasn't enough: She needed a solution to this universal problem. Her sanity, identity, career, and marriage depended on it. The result is Fair Play: a time- and anxiety-saving system that offers couples a completely new way to divvy up domestic responsibilities. Rodsky interviewed more than five hundred men and

women from all walks of life to figure out what the invisible work in a family actually entails and how to get it all done efficiently. With 4 easy-to-follow rules, 100 household tasks, and a series of conversation starters for you and your partner, Fair Play helps you prioritize what's important to your family and who should take the lead on every chore, from laundry to homework to dinner. "Winning" this game means rebalancing your home life, reigniting your relationship with your significant other, and reclaiming your Unicorn Space—the time to develop the skills and passions that keep you interested and interesting. Stop drowning in to-dos and lose some of that

invisible workload that's pulling you down. Are you ready to try Fair Play? Let's deal you in.

Color Theory for the Make-up Artist: Understanding Color and Light for Beauty and Special Effects analyzes and explains

traditional color theory for fine artists and applies it to the make-up artist. This book is suitable for both professionals and beginners who wish to train their eye further to understand and recognize distinctions in color. It explains why we see color, how to categorize and identify color, relationships between colors, and it relates these concepts to beauty and special effects make-up. The book teaches the reader how to mix flesh tones by using only primary colors, and explains how these colors in paints and make-up are sourced and created. It also discusses the reason for variations in skin colors and undertones, and how to identify and match these using make-up, while

choosing flattering colors for the eyes, lips, and cheeks. Colors found inside the body are explained for special effects make-up, like why we bruise, bleed, or appear sick. Ideas and techniques are also described for painting prosthetics, in addition to using color as inspiration in make-up designs. The book also discusses how lighting affects color on film, television, theater, and photography sets, and how to properly light a workspace for successful applications.
