**Parliamentary Debates** London : J. Murray

In this book we are given a unique view of East Africa of the 1950s; not the stereotyped picture of wildlife safaris and leaping Masai, but the emerging independence struggle of a new African nation from the viewpoint of a white police officer, in an exceptionally detailed, thoroughly readable, firsthand account of a rare period of recent history. It tells how an Australian veteran, fresh from the Korean War, became a colonial police officer in Tanganyika Territory (later Tanzania after federation with the offshore islands of Zanzibar in 1964). The reader is taken on a journey which tourists in Africa never see: from back alleys and police cells in the polyglot city of Dar es Salaam, to snake-infested camps on Uganda-Ruanda border patrols, and on police field force emergency operations from barracks at the foot of Kilimanjaro. There is much here to discover about a mostly benign semi-colonial period in Africa which lasted less than fifty years, passing, in one African's description, as briefly as a butterfly's heartbeat; where a few conscientious white administrators

and their loyal African assistants managed vast regions of a desolate territory with remarkably selfless care and scarce resources; where things worked most of the time, but sometimes where chaos reigned. It is about the country itself, its ubiquitous animals and its people at close range, including villagers, criminals, hunters, witch doctors, and colonial officials, but most of all, the African askari policemen who were the author's close and often only companions.

About the publication Africa's increasing recognition and protection of human

rights have been accompanied by a

surge in the number of NHRIs

established with broad mandates to

promote and protect human rights. The

mandates and powers of the NHRIs vary

from country to country, as does their

ability to deliver on these mandates.

Indeed, the rapid increase in the number

of NHRIs in Africa has come with a

variety of substantive and operational challenges. In the face of such challenges, those who work in NHRIs need to understand the broader regional and global context in which the institutions operate and the changing nature of human rights issues. This compendium provides an overview of NHRIs in eastern and southern Africa. It is guided to a large extent by the internationally agreed-upon Principles Relating to the Status of National Institutions, referred to as the Paris Principles. These Principles are broadly accepted as the benchmark against which the legitimacy and credibility of NHRIs can be assessed. Endorsed by the United Nations General Assembly in 1993, the Paris Principles provide NHRIs with guidelines as to their competence and responsibilities, their composition and guarantees of independence and pluralism, and their methods of operation; additional principles relate to the status of commissions with quasi-judicial competence. The generous financial support of the Konrad Adenauer Stiftung, Rule of Law for Sub-Saharan Africa, Nairobi, Kenya office, is gratefully acknowledged. Table of Contents

Traditionally, social scientists have

assumed that past imperialism hinders

the future development prospects of

colonized nations. Challenging this

widespread belief, Matthew Lange

argues in *Lineages of Despotism and*

*Development* that countries once under

direct British imperial control have

developed more successfully than those

that were ruled indirectly. Combining

statistical analysis with in-depth case

studies of former British colonies, this

volume argues that direct rule promoted

cogent and coherent states with high

levels of bureaucratization and

inclusiveness, which contributed to

implementing development policy during

late colonialism and independence. On

the other hand, Lange finds that indirect

British rule created patrimonial, weak

states that preyed on their own populations. Firmly grounded in the tradition of comparative-historical analysis while offering fresh insight into the colonial roots of uneven development, *Lineages of Despotism and Development* will interest economists, sociologists, and political scientists alike.
