If you read technology news, you'll notice it's not just a story of amazing new product introductions, or even that plus copycat product introductions. All the usual aspects of business are there: fierce competition, new contenders, old survivors, great ideas but business failures, mediocre ideas that somehow seem to succeed and prosper. As a reporter, commentator and blogger on mobile technology, I've collected what happened in the industry in 2014 and make predictions on what will and won't happen in 2015. You can read what did happen in the mobile technology in 2014. Often I deliver a comment with the news item and usually there is a link to the web page of the original announcement. This way you can dive into any detail level you desire, read my news feed for the overview or follow the related web link to the longer article. History is moving so fast now that it is all recorded electronically, but I'm surprised no one else has collected it and

presented it for consideration. Here is 2013 from the mobile technology industry for your consideration along with my own observations and opinions about where things are headed. It's often overlooked that the technology industry is an industry. By that I mean its main concerns are profit and growth. As consumers we love the new products and unique abilities we are gaining from technology, but it is a business akin to any other, trying to seduce us to pry money out of our wallets. So I cover the horse race aspect of the business, who's up, who's down. Is that changing? Is that likely to change? The longer implications of what the technology industry is doing are vast and social. We are moving to an always on, always connected society where we can communicate with someone instantly and find an answer to any question quickly. The entire database of human knowledge is now available in the palm of your hand whenever you desire it. Everything is there, the good, the bad, right and wrong, hate and love, music and noise. We are obsessed with technology, not in and of itself, but as a means to an end. Technology is the means to satisfy our curiosity or even our desire for self-expression. We are taking photos machine gun-style with our smartphones and choose the few to share. As humans we are gathering ever more data about ourselves and sharing more about ourselves than we probably thought possible. Bill Gates was once asked why the computer industry had generated so much improvement in its products over a relatively few years. He gave some boring answer about Moore's Law, but the real answer is that computers are in their teenage years. They are growing and growing. They will not always do so. So too the technology industry is in a state of rapid change. I see the shift to smaller devices as a new

paradigm, smashing some businesses and growing others into giants. Their stories are here in the news. In short here are predictions for what won't and will happen in 2015 for the mobile technology industry, breakdowns of marketshare figures on the horse race aspect of the business, chapters on Apple, Samsung, Google, Microsoft, Nokia, Blackberry, Amazon, Yahoo, news about social media giants Facebook, Twitter, Google+, LinkedIn, Foursquare, SnapChat and the carriers themselves Verizon, AT&T, Sprint and T-Mobile. You can also review my 2014 mobile predictions and see my track record on predictions. Finally there are some essays on how all this mobile tech is figuring into our lives. I've divided the news into the subjects it covers, but also put in the appendix all the news as it came out in chronological ordering. You can read the firehose of events in the appendix, or just read about one topic at a time in the earlier chapters. *You Only Have to Be Right Once* EduGorilla Community Pvt. Ltd. Africa wired up provides an important history of how two technologies - mobile calling and internet - were made available to millions of Sub-Saharan Africans and the impact they have had on their lives. The book deals with the political challenges of liberalization and privatization that needed to be in place to get these technologies built. It analyses how the mobile phone fundamentally changed communications in Sub-Saharan Africa and the ways Africans have made these technologies part of their lives. It examines critically the technologies' impact on development practices and the key role development actors played in accelerating things like regulatory reform, fibre roll-out and mobile money. The book considers how corruption in the industry is a prism through which patronage relationships in

Government can be understood. The arrival of a start-up ecosystem has the potential to break these relationships and offer a new wave of investment opportunities. The author seeks to go beyond the hype to make a provisional assessment of the kinds of changes that have happened over three decades. It examines how and why these technologies became transformative and seem to have opened out a very different future for Sub-Saharan Africa.

The ultimate insider look at the newest titans of tech—and what you can learn from their success In 2007, twenty-one-year old David Karp launched Tumblr, a simple micro-blogging platform, on a whim. By 2012, it had become one of the top ten online destinations, drawing 170 million visitors. By 2013, Yahoo had acquired Tumblr for over \$1 billion. Just like that, a kid who hadn't even earned his high school diploma was worth over a quarter billion dollars. And he's not the only one . . . Silicon Valley's newest billionaires represent a unique and unconventional breed of entrepreneur: young, bold, and taking the world by storm with their extreme speed, insatiable hunger, and progressive leadership. These whiz kids (and, to be fair, a few adults) have the hottest companies in the world. They are all turning just one brilliant insight or hook into money at a rate never before seen in human history—creating companies that, even with no revenue, garner insane valuations. With unique

insider access to the world's most influential and wealthy entrepreneurs, Forbes has dug in to find what these super-entrepreneurs say about their own success. This book, introduced, edited, and updated by Forbes editor Randall Lane, is the first comprehensive look at who these instant tech billionaires are and how they achieved their quick wins. With sixteen illuminating pieces, including two never-before published features, we get behind-the-scenes examinations of the founders of Spotify, Airbnb, Tumblr, Twitter, and more, including: Elon Musk: The billionaire founder of Paypal, electric carmaker Tesla, and private space company SpaceX. His extreme ambition is matched by his preternatural engineering mind; no wonder he was the model for Robert Downey Jr.'s portrayal of Iron Man. Evan Spiegel: The twenty-three-year old declined a \$3 billion cash offer from Mark Zuckerberg, after making the mountain come to Mohammed (Snapchat's HQ is in Los Angeles) —an unheard of request from a young gun to one of the biggest players in Silicon Valley. The story of Snapchat's origin is even wilder than Facebook's, but Spiegel's ability to parlay infamy and popularity into revenue is still up in the air, even as Snapchat's valuation continues to grow. Alex Karp: An eccentric philosopher with almost no tech background turned a Peter Thiel backed venture, Palantir, into a data-mining champion, with clients like the NSA, the FBI, and the CIA. Amid heated privacy concerns, Karp continues to grow Palantir like crazy, to \$196 million in funding and an estimated \$1 billion in contracts in 2014. You Only Have to Be Right Once is the definitive collection of everything we can learn from these incredible game changers and what their next moves spell for the future of business.
