Schaum's Outline of Principles of Economics Springer Nature
Once among the fastest developing economies, growth has slowed or stalled in Brazil, Russia, India, China, and South Africa. What policies can governments enact to jump-start the rise of these middle-income countries? Hartmut Elsenhans and Salvatore Babones argue that economic catch-up requires investment in the productivity of ordinary citizens. Diverging from the popular narrative of increased liberalization, this book argues specifically for direct government investment in human infrastructure; policies that increase wages and the bargaining power of labor; and the strategic use of exchange rates to encourage export-led growth. These measures raise up the majority and finance future productivity by driving broader consumption and fostering investment within national borders. Though strategies like full employment, mass education, and progressive taxation are not especially controversial, none of the BRICS have truly embraced them. Examining barriers to implementation, Elsenhans and Babones find that the main obstacle to such reforms is an absence of political will, stemming from closely guarded elite privilege under the current laws. *BRICS or Bust?* is a short, incisive read that underscores the need for demand-driven growth and why it has yet to be achieved.

Introduction to International Economics, 3rd Edition Simon and Schuster

Beloved stage and screen actor Danny Aiello's big-hearted memoir reveals a man of passion, integrity, and guts—and lays bare one of the most unlikely success stories ever told. Danny Aiello admits that he backed into his acting career by mistake. That's easy to see when you begin at the beginning: raised by his loving and fiercely resilient mother in the tenements of Manhattan and the South Bronx, and forever haunted by the death of his infant brother, Danny struggled early on to define who he was and who he could be. It wasn't until he took to the stage in the wee hours to belt out standards that Danny Aiello found his voice and his purpose: he was born to act. Performing in converted churches and touring companies led to supporting roles in such films as *The Godfather: Part II* and *Moonstruck*, and an Oscar nomination for his role as the embattled Salvatore in Spike Lee's *Do the Right Thing*. For a guy who had never set foot in an acting class, this was supreme validation for being an outsider who followed his heart. In a raw and real chronicle of his gritty urban past, Danny Aiello looks back with appreciation, amusement, and frank disbelief at his unconventional road to success. He offers candid observations on working with luminary directors Francis Ford Coppola, Woody Allen, and Robert Altman, among others, and a vast roster of actors, including Robert De Niro, Paul Newman, Madonna, Cher, and Lauren Bacall. He opens up about friends he loved, friends he lost, and the professional

relationships that weren't meant to be. Above all, Danny Aiello imparts a life lesson straight out of his own experience to anyone who's ever felt like an outsider: It's never too late to become who you want to be, to find happiness and fulfillment, and to embrace the winding road to get there.

In two volumes, this new edition presents the state of the art in Multiple Criteria Decision Analysis (MCDA). Reflecting the explosive growth in the field seen during the last several years, the editors not only present surveys of the foundations of MCDA, but look as well at many new areas and new applications.

Individual chapter authors are among the most prestigious names in MCDA research, and combined their chapters bring the field completely up to date. Part I of the book considers the history and current state of MCDA, with surveys that cover the early history of MCDA and an overview that discusses the "pre-theoretical" assumptions of MCDA. Part II then presents the foundations of MCDA, with individual chapters that provide a very exhaustive review of preference modeling, along with a chapter devoted to the axiomatic basis of the different models that multiple criteria preferences. Part III looks at outranking methods, with three chapters that consider the ELECTRE methods, PROMETHEE methods, and a look at the rich literature of other outranking methods. Part IV, on Multiattribute Utility and Value Theories (MAUT), presents chapters on the fundamentals of this approach, the very well known UTA methods, the Analytic Hierarchy Process (AHP) and its more recent extension, the Analytic Network Process (ANP), as well as a chapter on MACBETH (Measuring Attractiveness by a Categorical Based Evaluation Technique). Part V looks at Non-Classical MCDA Approaches, with chapters on risk and uncertainty in MCDA, the decision rule approach to MCDA, the fuzzy integral approach, the verbal decision methods, and a tentative assessment of the role of fuzzy sets in decision analysis. Part VI, on Multiobjective Optimization, contains chapters on recent developments of vector and set optimization, the state of the art in continuous multiobjective programming, multiobjective combinatorial optimization, fuzzy multicriteria optimization, a review of the field of goal programming, interactive methods for solving multiobjective optimization problems, and relationships between MCDA and evolutionary multiobjective optimization (EMO). Part VII, on Applications, selects some of the most significant areas, including contributions of MCDA in finance, energy planning problems, telecommunication network planning and design, sustainable development, and portfolio analysis. Opening a new area in Latin American studies, *The Birth of the Penitentiary in Latin America* showcases the most recent historical outlooks on prison reform and criminology in the Latin American context. The essays in this collection shed new light on the discourse and practice of prison reform, the interpretive shifts induced by the spread of criminological science, and the links between them and competing discourses about class, race, nation, and gender. The book shows how the seemingly clear redemptive purpose of the penitentiary project was eventually contradicted by conflicting views about imprisonment, the pervasiveness of traditional forms of repression and control, and resistance from the lower classes. The essays are unified by their attempt to view the penitentiary (as well as the variety of representations conveyed by the different reform movements favoring its adoption) as an interpretive moment, revealing of the ideology, class fractures, and contradictory nature of modernity in Latin America. As such, the book should be of interest not only to scholars concerned with criminal justice history, but also to a wide range of readers interested in modernization, social identities, and the discursive articulation of social conflict. The collection also offers an up-to-date sampling of new historical approaches to the study of criminal justice history, illuminates crucial aspects of the Latin American modernization process, and contrasts the Latin American cases with the better known European and North American experiences with prison reform.

The global financial crisis of 2008/9 is the Great Depression of the 21st century. For many though, the similarities stop at the Wall Street Crash as the current generation of policymakers have acted quickly to avoid the mistakes of the past. Yet the global crisis has made room for mistakes all of its own. While governments have apparently kept to their word on refraining from protectionist measures in the style of 1930s tariffs, there has been a disturbing rise in "murky protectionism." Seemingly benign, these crisis-linked policies are twisted to favour domestic firms, workers and investors. This book, first published as an eBook on VoxEU.org in March 2009, brings together leading trade policy practitioners and experts - including Australian Trade Minister Simon Crean and former Mexican President Ernesto Zedillo. Initially its aim was to advise policymakers heading in to the G20 meeting in London, but since the threat of murky protectionism persists, so too do their warnings.

This book examines the impact of globalization on the Indian economy, exploring the trade, investment and financial aspects of globalization, and also considering its implications for the balance of payments and currency exchange rate. The first part of the book deals with the evolution of the philosophy of globalization and its impact on exchange rates, global liquidity, currency markets, and global trade and payments. It highlights the catalytic role played by the US in driving the globalization process, and provides detailed analysis of the evolution of the international monetary system to illustrate current processes of globalization. Furthermore, a critical discussion of the Asian financial crisis of 1997 is presented as well as the lessons that have emerged from the crisis. The Indian economic experience and its own policy of dealing with globalization is the focus of second part of the book. The author examines the genesis of economic reforms and liberalization in India. The success of the Indian policy of gradualism is discussed in the context of the Asian crisis, and the reasons as to why India averted a similar crisis are explored. Finally, the author examines whether the Indian currency, the rupee, can be made fully convertible. This book makes a valuable contribution to the literature on globalization and development and should be of interest to academics interested in the global economy, international finance, international development and also to academics with an interest in South Asian Studies.
