Care Through Technology ; 17-20
October 2018, Cluj-Napoca, Romania
Springer Nature

This book examines the globalization trends in higher education from an international political science perspective, using Nye's theory of soft power to explore the rationale behind it. It focuses on conceptualizing the Soft Power Conversion Model of Higher Education, which is embedded in the globalization of higher education, and

analyzes the globalization of Chinese higher education reform. Also, this book provides innovative and unique viewpoints on conceptualizing and mapping the globalization and internationalization of higher education, especially for current Chinese higher education (1949-2016). It discusses and illustrates cutting-edge concepts of global higher education, such as global learning, global competency, and global citizenship and refines them in the conceptualized soft power conversion model of higher education. This book reports on and enriches the theoretical concept of global education, and provides practical insights into global learning, global citizenship and global competency for Chinese undergraduate students.

In order both to prepare for an increasingly diverse society and to help students navigate diverse learning environments, many institutions of higher education have developed programs that support student learning and competencies around inter- and intra-group relations. *Facilitating Change through Intergroup Dialogue: Social Justice Advocacy in Practice* traces the impact of Intergroup Dialogue (IGD) courses on peer-facilitators who delivered Skidmore College's IGD curricula over a five-year period. Through a series of in-depth qualitative interviews and auto-ethnographies, this

book explores how former IGD facilitators are applying what they learned to their personal and professional lives three to five years post-college. By exploring facilitators' application of IGD skills, understanding of social justice, and the challenges inherent in this work, *Facilitating Change through Intergroup Dialogue* offers concrete strategies for supporting undergraduate students in their enduring efforts towards justice. **Historians on Hamilton** Springer Publishing Company
This handbook is a sequel to an earlier volume entitled "A Theory of Supercritical Wing Sections, with Computer Programs and Examples." Since the completion of the first volume, which we shall refer to as Volume I (cf.

[II), some effort has been made to improve our airfoil design program. A number of more desirable air foils have been designed. In addition several of our wing sections have been tested in wind tunnels. We should like to make this material available here, since it is more convenient to use the design program in conjunction with data for a fairly broad range of examples. Moreover, we have developed new analysis programs that supersede our previous work. Chapter I is devoted to a brief discussion of the mathematics involved in our additions and modifications. There is only a minimum emphasis on theory, since the representation of important physical phenomena such as boundary layer shock wave interaction and separation is partly empirical. It is our contention,

however, that the computer programs provide a better simulation than might have been expected. Chapter II presents numerical results found by our new methods, as well as comparisons with experimental data. Chapter III contains a discussion of the use of the program together with Fortran listings.

Review for the Praxis II: Subject
Assessments** Heinemann Drama

Exercise testing is widely used all over the world to assess functional capacity in athletes, healthy subjects and patients. According to recent surveys, the interest in ergometry is still growing in almost all fields of medicine, especially in private practice. Furthermore, there has been an exponential growth in the number of

publications on exercise testing in the last years. Several consensus and task force conferences have dealt with exercise testing and published recommendations on standardization and guidelines in ergometry. These factors have, in combination, initiated an upsurge in research and clinical use of exercise testing. At the 6th International Seminar on Ergometry the latest findings and advances in ergometry were discussed. Reviews and results of the congress covering a wide range of features in exercise testing are presented in this book. The editors hope that this book will make a substantial contribution to our knowledge regarding exercise testing and will help physicians to appropriately evaluate exercise testing in healthy and diseased subjects.

The editors are indebted to Miss I. Baumgartner and Mr. W. Reith for their effort in typing and preparing the manuscripts. This book is the result of the first International Conference ICT Innovations 2009. The ICT Innovations conference is the primary scientific action of the Macedonian Society on Information and

Communication Technologies (ICT-ACT). It promotes the publication of scientific results of the international community related to innovative fundamental and applied research in ICT. Today, ICT has enlarged its horizons and it is practiced under multidisciplinary contexts that introduce new challenges to theoretical and technical approaches. The ICT Innovations 2009 conference gathered academics, professionals and practitioners reporting their valuable experiences in developing solutions and systems in the industrial and business arena especially innovative commercial implementations, novel applications of technology, and experience in applying recent research advances to practical situations, in any ICT areas. The conference focuses on issues concerning

a variety of ICT fields like: • Multimedia Information Systems • Artificial Intelligence • Pervasive and Ubiquitous Computing • Eco and Bio Informatics • Internet and Web Applications and Services • Wireless and Mobile Communications and Services • Computer Networks, Security and Cryptography • Distributed Systems, GRID and Cloud Computing ICT Innovations 2009 Conference was held in Ohrid, Macedonia, in September 28-30, 2009. Local arrangements provided by the members of the Macedonian Society on Information and Communication Technologies - ICT-ACT, mainly consisting of teaching and research staff of Computer Science Department at Faculty of Electrical Engineering and Information Technologies and Institute of

Informatics at Faculty of Natural Sciences, both at Ss. Cyril and Methodius University in Skopje, Macedonia.

Forthcoming Books Peter Lang GmbH, Internationaler Verlag Der Wissenschaften

This book presents a debate between "reasonable" educators who either claim that there is evidence for the effectiveness of whole language, or who challenge the claim that whole language works across the broad spectrum of learners. The book presents the debate in the form of formal debate resolutions, opening "statements," transcripts of a "face-to-face shoot-out" at a convention of the National Reading Conference in San Antonio, Texas, further written responses, and commentary on the debate. Contents of the book are: "'And

the Winner Is...!' The Context of the Debate" (Carl B. Smith); "Call Me Teacher" (Susan Ohanian); "Whole Language and Research: The Case for Caution" (Michael C. McKenna and others); "Moderator's Comments" (Carl B. Smith); "The Answer Is Yes..." (Patrick Shannon); "Unlike Patrick, We Do Accept Reality..." (Michael McKenna); "Who the Hell Are You?" (Susan Ohanian); "Let Us Not Permit Ourselves to Be Forced into Bitterly Polarized Positions..." (Richard Robinson); "Audience Participation" (moderated by Carl B. Smith); "People Who Live in Glass Houses..." (Patrick Shannon); "Emerging Perspectives on Whole Language" (Michael C. McKenna and others); "Whole Language: Now More Than Ever" (Shelley Harwayne); "Is Whole Language 'The Real Thing'?

Advertisements and Research in the Debate on Whole Language" (Steven Stahl); "New Questions, Different Inquiries" (Jerome Harste); and "Commentary on the ERIC Whole Language Debate" (Michael Pressley). A selected, annotated bibliography of approximately 1,000 items from the ERIC database concerning whole language is included. (RS)

Transdisciplinary Knowledge Co-Production for Sustainable Cities
Springer

By providing an introduction to test equating which both discusses the most frequently used equating methodologies and covering many of the practical issues involved, this volume expands upon the coverage of the first edition by providing a new chapter on test scaling

and a second on test linking.

Improving Mental Health Information in Europe Springer

Written by a team of scholars, predominantly from the Centre for Financial Studies in Frankfurt, this volume provides a descriptive survey of the present state of the German financial system and a new analytical framework to explain its workings.

Advanced Physiology and Pathophysiology Springer Science & Business Media

This volume offers edited papers presented at the IUTAM-Symposium Topological design optimization of structures, machines and materials - status and perspectives, October 2005. The papers cover the application of topological design optimization to fluid-

solid interaction problems, acoustics problems, and to problems in biomechanics, as well as to other multiphysics problems. Also in focus are new basic modelling paradigms, covering new geometry modelling such as level-set methods and topological derivatives.

The Cambridge Handbook of Cognition and Education Springer Science & Business Media

An international team of over 150 experts provide up-to-date satellite imaging and quantitative analysis of the state and dynamics of the glaciers around the world, and they provide an in-depth review of analysis methodologies. Includes an e-published supplement. Global Land Ice Measurements from Space - Satellite Multispectral Imaging of Glaciers (GLIMS book for short) is the leading state-of-the-art technical and interpretive presentation of satellite image data and analysis of the changing state of the world's glaciers. The book is the most definitive, comprehensive product of a global glacier remote sensing consortium, Global Land Ice Measurements from Space (GLIMS, <http://www.glims.org>). With 33 chapters

and a companion e-supplement, the world's foremost experts in satellite image analysis of glaciers analyze the current state and recent and possible future changes of glaciers across the globe and interpret these findings for policy planners. Climate change is with us for some time to come, and its impacts are being felt by the world's population. The GLIMS Book, to be released about the same time as the IPCC's 5th Assessment report on global climate warming, buttresses and adds rich details and authority to the global change community's understanding of climate change impacts on the cryosphere. This will be a definitive and technically complete reference for experts and students examining the responses of glaciers to climate change.

World experts demonstrate that glaciers are changing in response to the ongoing climatic upheaval in addition to other factors that pertain to the circumstances of individual glaciers. The global mosaic of glacier changes is documented by quantitative analyses and are placed into a perspective of causative factors. Starting with a Foreword, Preface, and Introduction, the GLIMS book gives the rationale for and history of glacier monitoring and satellite data analysis. It includes a comprehensive set of six "how-to" methodology chapters, twenty-five chapters detailing regional glacier state and dynamical changes, and an in-depth summary and interpretation chapter placing the observed glacier changes into a global context of the coupled atmosphere-land-ocean system.

An accompanying e-supplement will include oversized imagery and other highly visual renderings of scientific data.

ICT Innovations 2009 Cambridge University Press

Learning through the medium of a second or additional language is becoming very common in different parts of the world because of the increasing use of English as the language of instruction and the mobility of populations. This situation demands a specific approach that considers multilingualism as its core. Pedagogical translanguaging is a theoretical and instructional approach that aims at improving language and content competences in school contexts by using resources from the learner's whole

linguistic repertoire. Pedagogical translanguaging is learner-centred and endorses the support and development of all the languages used by learners. It fosters the development of metalinguistic awareness by softening of boundaries between languages when learning languages and content. This Element looks at the way pedagogical translanguaging can be applied in language and content classes and how it can be valuable for the protection and promotion of minority languages. This title is also available as Open Access on Cambridge Core.

Oxford Handbook of Personality Assessment Oxford University Press on Demand

Volumes in *Writing Spaces: Readings on Writing* offer multiple perspectives on a

wide range of topics about writing. In each chapter, authors present their unique views, insights, and strategies for writing by addressing the undergraduate reader directly. Drawing on their own experiences, these teachers-as-writers invite students to join in the larger conversation about the craft of writing. Consequently, each essay functions as a standalone text that can easily complement other selected readings in first year writing or writing-intensive courses across the disciplines at any level. Volume 3 continues the tradition of previous volumes with topics such as voice and style in writing, rhetorical appeals, discourse communities, multimodal composing, visual rhetoric, credibility, exigency, working with personal experience in academic writing,

globalized writing and rhetoric, constructing scholarly ethos, imitation and style, and rhetorical punctuation. *Supercritical Wing Sections II* Springer America has gone Hamilton crazy. Lin-Manuel Miranda's Tony-winning musical has spawned sold-out performances, a triple platinum cast album, and a score so catchy that it is being used to teach U.S. history in classrooms across the country. But just how historically accurate is Hamilton? And how is the show itself making history? Historians on Hamilton brings together a collection of top scholars to explain the Hamilton phenomenon and explore what it might mean for our understanding of America's history. The contributors examine what the musical got right, what it got wrong, and why it matters. Does Hamilton's hip-

hop take on the Founding Fathers misrepresent our nation's past, or does it offer a bold positive vision for our nation's future? Can a musical so unabashedly contemporary and deliberately anachronistic still communicate historical truths about American culture and politics? And is Hamilton as revolutionary as its creators and many commentators claim? Perfect for students, teachers, theatre fans, hip-hop heads, and history buffs alike, these short and lively essays examine why Hamilton became an Obama-era sensation and consider its continued relevance in the age of Trump. Whether you are a fan or a skeptic, you will come away from this collection with a new appreciation for the meaning and importance of the Hamilton

phenomenon.

Symposium on Enforcement of Food Law Learning Express (NY)

Selected by Princeton University as Noteworthy Book in Industrial Relations and Labor Economics for 2010. Are immigrants from the new EU member states a threat to the Western welfare state? Do they take jobs away from the natives? And will the source countries suffer from severe brain drain or demographic instability? In a timely and unprecedented contribution, this book integrates what is known about post-enlargement migration and its effects on EU labor markets. Based on rigorous analysis and hard data, it makes a convincing case that there is no evidence that the post-enlargement labor migrants would on aggregate

displace native workers or lower their wages, or that they would be more dependent on welfare. While brain drain may be a concern in the source countries, the anticipated brain circulation between EU member states may in fact help to solve their demographic and economic problems, and improve the allocative efficiency in the EU. The lesson is clear: free migration is a solution rather than a foe for labor market woes and cash-strapped social security systems in the EU.

Making Cities Resilient Allyn & Bacon

This Handbook reviews a wealth of research in cognitive and educational psychology that investigates how to enhance learning and instruction to aid students struggling to learn and to

advise teachers on how best to support student learning. The Handbook includes features that inform readers about how to improve instruction and student achievement based on scientific evidence across different domains, including science, mathematics, reading and writing. Each chapter supplies a description of the learning goal, a balanced presentation of the current evidence about the efficacy of various approaches to obtaining that learning goal, and a discussion of important future directions for research in this area. It is the ideal resource for researchers continuing their study of this field or for those only now beginning to explore how to improve student achievement.

Praxis II Art Content Knowledge 5134

Exam Secrets Springer Science & Business Media

Published for the American Educational Research Association by Routledge This landmark volume presents the work of the American Educational Research Association's Panel on Research and Teacher Education. It represents a systematic effort to apply a common set of scholarly lenses to a range of important topics in teacher education. The Panel's charge was twofold: *to create for the larger educational research community a thorough,

rigorous, and even-handed analysis of the empirical research evidence relevant to major policies and practices in pre-service teacher education in the U.S., and *to propose a research agenda related to teacher education that builds on what is already known and that identifies the research directions that are most promising for the future.

Members of the Panel were appointed from various sectors of the educational research community and with different areas of expertise, including teacher education, policy, assessment, research design and methods, liberal arts, multicultural education, and school reform. Building on their diverse perspectives, they ably translated their charge into a series of questions that became the framework for this volume.

The questions illuminate many of the issues that have been most contested in past and current discourse about teacher education reform. Studying Teacher Education examines research about the current pool of prospective and entering teachers and about local, institutional, state, and federal preservice teacher education policies and practices. The book includes three general chapters and nine research syntheses. *The AERA Panel on Research and Teacher Education: Context and Goals *Researching Teacher Education in Changing Times: Politics and Paradigms *Teacher Characteristics: Research on the Demographic Profile *Teacher Characteristics: Research on the Indicators of Quality *Research on the Effects of Coursework in the Arts and

Sciences and in the Foundations of Education *Research on Methods Courses and Field Experiences *Research on Pedagogical Approaches in Teacher Education *Research on Preparing Teachers for Diverse Populations *Research on Preparing Teachers to Work with Students with Disabilities *Research on Accountability Processes in Teacher Education *Research on Teacher Education Programs *A Research Agenda for Teacher Education Each chapter reviews the empirical literature and proposes a research agenda that builds on and extends what is known about a topic. A chart at the end of each chapter provides summary information for each of the empirical studies synthesized and two reference lists--one for all of the

studies reviewed in the chapter and one for additional references used. The volume includes an introductory chapter on the Panel's context and goals, and an accessible Executive Summary of the book as a whole. *Studying Teacher Education: The Report of the AERA Panel on Research and Teacher Education* is a timely, indispensable reference for all researchers and professionals in the

field.

Creative Drama in the Classroom and Beyond Routledge

The authors outline an approach to the study of literacy that does not neglect the cognitive or individual aspects of literacy but rather sees them as largely shaped by the social forces of our political, economic, and educational systems.
