Strategy Instruction for Students with Learning Disabilities, Second Edition Guilford Publications

In this book the authors take a closer look at spelling, the teaching and learning of which is considerably more complex than is often assumed. In order to spell well, children need to learn how to strategically use knowledge about phonology, orthography, morphology and etymology. It is also a visual activity that involves the laying down and retrieval of visual representations of words and word parts in memory. Children also need to learn how to use the metalanguage associated with spelling - words like phoneme, syllable, affixes and morpheme - as this will help them talk and think about spelling strategies. Thus, spelling is a language activity and also a thinking activity. Ideally, it should also be a meaningful activity that is engaged in with a positive attitude. The authors draw on the theoretical and research literature, as well as classroom examples, to explain how to teach primary school aged children to use multiple strategies to spell. They also consider the assessment of spelling, as well as

how to assist those who have difficulties in learning to spell. The work makes links to the Australian Curriculum: English This book would help primary and preservice teachers by providing them with understandings, based on research and theory, which would help them choose and use appropriate pedagogical strategies (also provided in the book) to teach spelling to children with diverse needs, including children from EAL/D backgrounds and those with difficulties and disabilities that impact on spelling.

Supervision for Today's Schools Walch Publishing
Practical, effective, evidence-based reading interventions that change students' lives
Essentials of Understanding and Assessing Reading Difficulties is a practical, accessible, in-depth guide to reading assessment and intervention. It provides a detailed discussion of the nature and causes of reading difficulties, which will help develop the knowledge and confidence needed to accurately assess why a student is struggling. Readers will learn a framework for organizing testing results from current assessment batteries such as the WJ-IV, KTEA-3, and CTOPP-2. Case studies illustrate each of the concepts covered. A thorough discussion is provided on the assessment of phonics skills, phonological awareness, word recognition, reading fluency, and reading comprehension. Formatted for easy reading as well as quick reference, the text includes bullet points, icons, callout

boxes, and other design elements to call attention to important information. Although a substantial amount of research has shown that most reading difficulties can be prevented or corrected, standard reading remediation efforts have proven largely ineffective. School psychologists are routinely called upon to evaluate students with reading difficulties and to make recommendations to address such difficulties. This book provides an overview of the best assessment and intervention techniques, backed by the most current research findings. Bridge the gap between research and practice
Accurately assess the reason(s) why a student struggles in reading
Improve reading skills using the most highly effective evidence-based techniques
Reading may well be the most important thing students are taught during their school careers. It is a skill they will use every day of their lives; one that will dictate, in part, later life success.
Struggling students need help now, and
Essentials of Understanding and Assessing Reading Difficulties shows how to get these students on track.

Painless Spelling Guilford Publications

A spelling manual for teachers of intermediate-level (grades 3-6) children, for elementary and middle school teachers working with students who have learning disabilities, and for teachers working with students for whom English is not their first language, this book outlines a methodology that combines whole language and phonetic strategies to teach children to spell as part of the entire language arts program. It acknowledges that spelling must be taught directly but argues that traditional methods of teaching spelling may often fail students. The book advocates the introduction of spelling as a meaningful activity through both structural lessons and the use of "teachable moments" during lessons across all content areas. Following an informational preface, chapters in the book are: (1) Teaching Spelling: An Introduction; (2) What We've Learned from Research; (3) Spelling Goals: How and What Do I Want To Teach?; (4) Generic Spelling Strategies; (5) Ongoing Assessment and Evaluation of Students' Spelling; (6) Getting Started with Spelling Instruction; (7) Guided Word-Study Lessons; and (8) Parents as Spelling Partners. (Contains 59 references and 36 "Black Line Masters," or teaching lessons.) (RS)

Vocabulary Their Way Brookes Publishing Company

Although producing quality written expression is a vital skill, many students in the United States struggle to produce proficient written language. There are many academic and career outcomes related to the ability to produce written expression, yet many schools lack formalized writing assessment and instruction. As such, many questions remain related to individual differences in writing ability and best practices in assessment and instruction. To answer these questions, it is necessary to establish a model of written expression and what specific variables exist within the model to be used to assess written language. Modern writing assessment theory uses levels of language as a framework with commonly assessed dimensions of accuracy, complexity and productivity. This framework has yet to be firmly established in the literature, and the variables included in each level are just beginning to be explored. One salient variable in writing research, assessment and instruction is spelling ability, and how this ability may influence the production of written language. This study furthers the work by Wilson et al. (2017), Troia and colleagues (2019) and many others (e.g., Berninger et al., 2006; Flower & Hayes, 1981) with the ultimate goal of developing a model of written language to guide assessment and instruction in schools. Specifically, data were drawn from Truckenmiller and colleagues (2020) study piloting a writing assessment tool, Writing Architect, which sampled 526 students from third to eight grades; this study used sixth, seventh and eighth grades with a resulting sample size of 290 students. Results indicated spelling was a significant predictor of writing quality, in that better spelling indicated better writing quality. The same was true for text. For the sentence-level variable, a higher score indicated worse writing quality in a significant way. The word variable did not significantly predict writing quality in the model. The significant interaction between spelling and text variables suggests that the effect of text on writing quality is even higher when spelling ability is also

high. Findings highlight the importance of writing and spelling instruction in school. The findings for this age group help identify how writing abilities may change over the trajectory of development and vary individually. Additionally, this analysis echoes the call for further research to establish variables for automated writing assessment.
