The Rationalists Univ of California Press

This special issue of the South Atlantic Quarterly focuses on theory's role in contemporary politics, reading, and critiques of literature. Although there will always be questions raised about what theory is, what it can do, and its overall efficacy, "Theory Now" argues that those questions obscure the fact that theory is, and always has been, the precondition for thought. This issue demonstrates what it means to engage with theory in this particular historical moment. One contributor takes a critical look at Michel Foucault's final lectures, which have only recently been published in French, and evaluates their potential to instruct contemporary theory and politics. Another contributor contemplates Eve Kosofsky Sedgwick's legacy and insists that the only way to read her work is to anticipate the effects it may have in the future rather than assume that interpretations of her scholarship are now settled. With this issue, recently appointed editor Michael Hardt inaugurates "Against the Day," a new section composed of short essays that focus on a topic of contemporary political importance.

Differential Equations II Jos University Press Limited

Sermons by a noted German theologian discuss what the Bible says about freedom, political power, fear, unity, and human rights

Absent Minds Hackett Publishing

In this book, sixteen leading scholars address themselves to providing as full an account of medieval science as current knowledge permits. Designed to be introductory, the authors have directed their chapters to a beginning audience of diverse readers.

Nigeria Passbooks

This compact collection of philosophical texts from the Summa Theologica -- on God, creation, the soul, human acts, moral good and evil, love, habits, virtue, and law -- is presented newly translated in abridged form and cast in a modified version of the medieval quaestio. Included are only the most important objections and Aquinas' replies; appeals to scriptural, theological, and philosophical authorities have been omitted. Unlike the ordering of the originals, questions and answers are here presented prior to objections and replies; the result is a sharp, rich, topically organized question-answer presentation of Aquinas' major philosophical arguments within a brief compass. A general Introduction, head notes, a glossary, an index, and a select bibliography offer expert guidance to the work of this major philosopher.

Technology and Social Change in Agriculture Houghton Mifflin Harcourt P

This textbook provides a comprehensive overview of different methods and sources of information-gathering for peace and conflict students and researchers, as well as the challenges presented by such work. Research on conflict-ridden societies carries special challenges for the collection and evaluation of information about the conflict and its actors. First, due to the nature of information emerging, incentives to misrepresent and propaganda is common. News coverage is sometimes poor and reporting is often incomplete, selective and biased. Second, the sensitivity of the topic and the questions posed in peace and conflict research means that access to and the security of informants can be a problem. Peace and conflict research as a discipline encompasses a number of different approaches for obtaining empirical information which serve as a basis for analyzing various research topics. This book provides a comprehensive overview of different methods and sources of information-gathering for students and researchers, as well as the challenges presented by such work. It offers: tools for evaluating sources and information suggestions on where different types of information can be found advice on using different types of

sources, including news reports and written narratives practical guidelines for constructing large-scale datasets insights and guidelines for comparative fieldwork, in-depth interviews, focus groups, and surveys reflection and discussion on important ethical concerns in peace research This book will be of much interest for students and researchers of peace and conflict studies, conflict resolution, war and conflict studies, development studies, security studies and IR, as well as for NGO workers/researchers. Kristine Höglund is Associate Professor at the Department of Peace and Conflict Research, Uppsala University. She has a PhD in Peace and Conflict Research from Uppsala University Sweden (2004). She is author of *Peacemaking in the Shadow of Violence*. Magnus Öberg is Associate Professor at the Department of Peace and Conflict Research, Uppsala University, and Associate Editor of the *Journal of Peace Research* (since 2006). He has a PhD in Peace and Conflict Research from Uppsala University (2003) and is co-editor of *Resources, Governance, and Civil Conflict* (Routledge, 2008). *Ethics* Indianapolis : Hackett Publishing Company
Policing, crime, poverty, prison management - these are just some of the key issues facing society today. This book addresses such issues, raising questions that should be of interest not only to academic criminologists but also to all those involved in the criminal justice system.

The Changing Socio-economic Role of Tiv Women New York : Macmillan Company

The first full-length account of "the question of intellectuals" in twentieth-century Britain. Leading intellectual historian and cultural commentator Stefan Collini challenges the myth that there are no "real" intellectuals in Britain and offers a persuasive analysis of "the intellectual" as a concept as well as detailed discussions of influential figures such as T.S. Eliot, George Orwell, and Edward Said.

The Good Study Guide Hebn Publishers

This book introduces the basic inferential patterns of formal logic as they are embedded in everyday life, information technology, and science. It is designed to make clear the basic topics of classical and modern logic. The aim is to improve the reader's ability to navigate both everyday and science-based interactions.

Contemporary Issues in Nigerian Education Oxford University Press on Demand

Filling a gap, this study presents a comprehensive history of Nigeria's diverse peoples. The first two chapters provide a geographical and archaeological background. The main body of the work is divided into three sections: Nigeria Before 1800; Nigeria in the 19th century; and Nigeria in the 20th century. Contributors cover a multitude of different issues and regions such as the Benin Kingdom, the trans-atlantic slave trade, nationalist movements, and Borno in the 19th century.

The DSST (Defense Activity for Non-Traditional Education Support) Subject Standardized Tests are comprehensive college and graduate level examinations given by the Armed Forces, colleges and graduate schools. These exams enable students to earn college credit for what they have learned through self-study, on the job, or by other non-traditional means.

Formal Semantics and Logic Cambridge University Press

Elaborate apparatus plays an important part in the science of today, but I sometimes wonder if we are not inclined to forget that the most important instrument in research must always be the mind of man. It is true that much time and effort is devoted to training and equipping the scientist's mind, but little attention is paid to the technicalities of making the best use of it. There is no satisfactory book which systematizes the knowledge available on the practice and mental skills—the art—of scientific investigation. This lack has prompted me to write a book to serve as an introduction to research. My small contribution to the literature of a complex and difficult topic is meant in the first place for the student about to engage in research, but I hope that it may also interest a wider audience. Since my own experience of research has been acquired in the study of infectious diseases, I have written primarily for the student of that field. But nearly all the book is equally applicable to any other branch of experimental biology and much of it to any branch of science. - (Cambridge, 1957. W.I.B. Beveridge)

Groundwork of Nigerian History Lagos: University of Lagos; London: Evans Bros.

This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally

published in 1958.

Learn the true process of a successful entrepreneur with *Introduction to Entrepreneurship, 8/e International Edition*. Presenting the most current thinking in this explosive field, this renowned entrepreneurship text provides a practical, step-by-step approach that makes learning easy. Using exercises and case presentations, you can apply your own ideas and develop useful entrepreneurial skills. Cases and examples found throughout the text present the new venture creations or corporate innovations that permeate the world economy today. This book will be your guide to understanding the entrepreneurial challenges of tomorrow.

Price Control and Inflation Anchor

"Forall x is an introduction to sentential logic and first-order predicate logic with identity, logical systems that significantly influenced twentieth-century analytic philosophy. After working through the material in this book, a student should be able to understand most quantified expressions that arise in their philosophical reading. This book treats symbolization, formal semantics, and proof theory for each language. The discussion of formal semantics is more direct than in many introductory texts. Although forall x does not contain proofs of soundness and completeness, it lays the groundwork for understanding why these are things that need to be proven. Throughout the book, I have tried to highlight the choices involved in developing sentential and predicate logic. Students should realize that these two are not the only possible formal languages. In translating to a formal language, we simplify and profit in clarity. The simplification comes at a cost, and different formal languages are suited to translating different parts of natural language. The book is designed to provide a semester's worth of material for an introductory college course. It would be possible to use the book only for sentential logic, by skipping chapters 4-5 and parts of chapter 6"--Open Textbook Library.

Nigerian Peoples and Culture Jones & Bartlett Learning

In a remote area of Mali, West Africa, the people called Dogon survive today as they have for thousands of years: in mud-brick houses below the Bandiagara cliffs. In the sandy plains, they grow the millet and sorghum they need to live. This arresting photographic portrait allows us privileged access to their traditional way of life, remarkably maintained today even after extensive contact with Western civilization. Stephenie Hollyman's intimate pictures show a tightly knit, cooperative society engaging in daily activities and sacred rituals: planting and harvesting crops, creating crafts, and performing varied religious ceremonies, most notably the masked dances with which the Dogon celebrate the honored burial of their dead. Walter van Beek's engaging narrative displays the authority and observant eye of an anthropologist who has long lived among the people he writes about. This astonishing volume will find a rapt audience among readers of Abrams' acclaimed *African Ceremonies* and other popular books on vanishing African tribal customs.

An Introduction to Logic Taylor & Francis

The Book Arises Out Of A Seminar Organized By All India Kissan Sabha - Contains 15 Papers Which Seek To Analyse And Assess The Social Changes Brought About By New Technology In The Arena Of Agriculture. Eminent Persons Participated In The Seminar, The Papers Relate To Technological Changes - Right To Work, Land Reforms - Commercialization & Agriculture Among Other Subjects. Without Dust Jacket.

Count Cavour: His Life and Career Harry N. Abrams

Founded in the mid-17th century, Rationalism was philosophy's first step into the modern era. This volume contains the essential statements of Rationalism's three greatest figures: Descartes, who began it; Spinoza, who epitomized it; and Leibniz, who gave it its last serious expression.

New Trends in Integrated Science Teaching State University of New York Oer Services

This two-volume set (CCIS 175 and CCIS 176) constitutes the refereed proceedings of the International Conference on Computer Education, Simulation and Modeling, CSEM 2011, held in Wuhan, China, in June 2011. The 148 revised full papers presented in both volumes were carefully reviewed and selected from a large number of submissions. The papers cover issues such as multimedia and its application, robotization and automation, mechatronics, computer education, modern education research, control systems, data mining, knowledge management, image processing, communication software, database technology, artificial intelligence, computational intelligence, simulation and modeling, agent based simulation, biomedical visualization, device simulation & modeling, object-

oriented simulation, Web and security visualization, vision and visualization, coupling dynamic modeling theory, discretization method , and modeling method research.

Library Bulletins Charles C. Thomas Publisher

Nigeria is Africa's most populous country and the world's eighth largest oil producer, but its success has been undermined in recent decades by ethnic and religious conflict, political

instability, rampant official corruption and an ailing economy. Toyin Falola, a leading historian intimately acquainted with the region, and Matthew Heaton, who has worked extensively on African science and culture, combine their expertise to explain the context to Nigeria's recent troubles through an exploration of its pre-colonial and colonial past, and its journey from

independence to statehood. By examining key themes such as colonialism, religion, slavery, nationalism and the economy, the authors show how Nigeria's history has been swayed by the vicissitudes of the world around it, and how Nigerians have adapted to meet these challenges. This book offers a unique portrayal of a resilient people living in a country with immense, but unrealized, potential.
