Ninth in a series of annual reports comparing business regulations in 183 economies, *Doing Business 2012* measures regulations affecting 11 areas of everyday business activity: starting a business dealing with construction permits employing workers registering property getting credit protecting investors paying taxes trading across borders enforcing contracts closing a business getting electricity The report updates all indicators as of June 1, 2011, ranks countries on their overall "ease of doing business", and analyzes reforms to business regulation identifying which countries are strengthening their business environment the most. *Doing Business 2012* includes a new set of indicators on the time, steps, and cost for a private business to get an electricity connection. The data on connection services can inform utilities, regulators and governments seeking to strengthen the performance of the electricity sector. Drawing on a now longer time series, this year's report introduces a measure to illustrate how the regulatory environment for business has changed in each economy since *Doing Business 2006* was published in 2005. A new "distance to frontier" measure complements the aggregate ranking on the ease of doing business, which benchmarks each economy's current performance on the indicators against that of all other economies in the sample for a given year. A fundamental premise of *Doing Business* is that economic activity requires good rules that are transparent and accessible to all. Such regulations should be efficient, striking a balance between safeguarding some important aspects of the business environment and avoiding distortions that impose unreasonable costs on businesses. Where business regulation is burdensome and competition limited, success depends more on whom you know than on what you can do. But where regulations are relatively easy to comply with and accessible to all who need to use them, anyone with talent and a good idea should be able to start and grow a business in the formal sector. The *Doing Business* report, which was started in 2003, has become one of the key ways in which the bank and other observers gauge business climate within developing countries... -- The Financial Times [Doing Business started] as a way to encourage countries to reduce obstacles to entrepreneurship. Developing countries compete to land a spot on the top 10 list of most-improving countries because it is seen as a way to get attention and investment. -- The Wall Street Journal [Doing Business] has succeeded in putting the issue of business red tape on the international political agenda. -- The Economist

Financial Accounting Essentials You Always Wanted To Know World Bank Publications

The market-leading European text on management accounting and comprehensive authority on all aspects of the subject has been streamlined and substantially redesigned in its 6th edition to make it even more suitable for the needs of today's student. The aim of the new edition is to explain the principles involved in the design and evaluation of management and cost accounting information systems. The emphasis in the book is on management accounting systems that will be used for internal decision-making purposes within an organisation, however, cost accounting systems for external reporting are also comprehensively covered. It has been brought up to date with the latest developments in the subject. Having been made stronger pedagogically with the addition of the answers to the questions and more real-world mini cases, the text brings home the relevance of the subject matter to the real world of business.

A Comprehensive Bibliography: Pakistan Government and Administration Elsevier

This book identifies reforms that can help manage environmental priority problems associated with transport's impacts on air quality, noise pollution, road safety, hazardous-materials transport, climate change, and urban sprawl. The policy options are contextualized in light of the Government of Pakistan's 2011 Framework for Economic Growth and its strategic objectives. Appendixes A-D present additional background information, describe the economic and institutional analyses undergirding this report, and detail the report's methodology. This analytical work by a team of World Bank specialists focuses on: • analyzing the policy and institutional adjustments required to address environmental, social, and poverty aspects of increased transportation efficiency in Pakistan; • identifying policy options for the Government of Pakistan to better serve the population, to enhance social cohesion, and to foster equitable benefit sharing with low-income or other vulnerable groups; • developing a broad participatory process to give a voice to stakeholders who could be affected by enhancements of freight transport productivity; and • making robust recommendations to strengthen governance and the institutional capacity of agencies to manage the environmental, social, and poverty consequences of freight transportation infrastructure.

From Terrorism to Television Verso

This book studies the wars Pakistan has fought over the years with India as well as other non-state actors. Focusing on the first Kashmir war (1947-48), the wars of 1965 and 1971, and the 1999 Kargil war, it analyses the elite decision-making, which leads to these conflicts and tries to understand how Pakistan got involved in the first place. The author applies the 'gambling model' to provide insights into the dysfunctional world view, risk-taking behaviour, and other behavioural patterns of the decision makers, which precipitate these wars and highlight their effects on India-Pakistan relations for the future. The book also brings to the fore the experience of widows, children, common soldiers, displaced civilians, and villagers living near borders, in the form of interviews, to understand the subaltern perspective. A nuanced and accessible military history of Pakistan, this book will be indispensable to scholars and researchers of military history, defence and strategic studies, international relations, political studies, war and conflict studies, and South Asian studies.

Hybrid Nanofluids: Preparation, Characterization and Applications presents the history of hybrid nanofluids, preparation techniques, thermoelectrical properties, rheological behaviors, optical properties, theoretical modeling and correlations, and the effect of all these factors on potential applications, such as solar energy, electronics cooling, heat exchangers, machining, and refrigeration. Future challenges and future work scope have also been included. The information from this book enables readers to discover novel techniques, resolve existing research limitations, and create novel hybrid nanofluids which can be implemented for heat transfer applications. Describes the characterization, thermophysical and electrical properties of nanofluids Assesses parameter selection and property measurement techniques for the calibration of thermal performance Provides information on theoretical models and correlations for predicting hybrid nanofluids properties from experimental properties

Hybrid Nanofluids Balboa Press

Outraged conscience, careful argument, poetry and political analysis -- gathered here is the diversity of voices, traditions, and approaches that are weaving themselves into an anti-nuclear and peace movement in India and Pakistan. In these essays, written before, during, and after the May 1998 nuclear explosions, scholars and activists from both countries attempt to understand and challenge the nuclearisation of South Asia. The essays are an act of resistance against governments that see nuclear weapons as a currency of power, as symbols of prestige, as sources of security, as moments of glory in an otherwise dismal contemporary history. The collection includes Mahatma Gandhi's response to the atomic bombing of Hiroshima, and recent writings by renowned scholars Egbal Ahmad, Rajni Kothari, Ashis Nandy, and Amartya Sen, as well as Arundhati Roy and veteran anti-nuclear activists, academics and journalists. The volume also contains the texts of many of the historic public statements protesting the May 1998 nuclear tests which helped mobilise public opposition to the bomb in South Asia. There is a resource guide to books, films and websites on nuclear weapons, as well as information on many organisations now working on this issue.

The Most Authentic Source Of Information On Higher Education In India The Handbook Of Universities, Deemed Universities, Colleges, Private Universities And Prominent Educational & Research Institutions Provides Much Needed Information On Degree And Diploma Awarding Universities And Institutions Of National Importance That Impart General, Technical And Professional Education In India. Although Another Directory Of Similar Nature Is Available In The Market, The Distinct Feature Of The Present Handbook, That Makes It One Of Its Kind, Is That It Also Includes Entries And Details Of The Private Universities Functioning Across The Country. In This Handbook, The Universities Have Been Listed In An Alphabetical Order. This Facilitates Easy Location Of Their Names. In Addition To The Brief History Of These Universities, The Present Handbook Provides The Names Of Their Vice-Chancellor, Professors And Readers As Well As Their Faculties And Departments. It Also Acquaints The Readers With The Various Courses Of Studies Offered By Each University. It Is Hoped That The Handbook In Its Present Form, Will Prove Immensely Helpful To The Aspiring Students In Choosing The Best Educational Institution For Their Career Enhancement. In Addition, It Will Also Prove Very Useful For The Publishers In Mailing Their Publicity Materials. Even The Suppliers Of Equipment And Services Required By These Educational Institutions Will Find It Highly Valuable.

THE WISDEN BOOK OF THE YEAR and THE CROSS SPORTS BOOK AWARDS CRICKET BOOK OF THE YEAR. 'The most complete, best researched, roses-and-thorns history of cricket in Pakistan' Independent 'As good as it's likely to get' Guardian The nation of Pakistan was born out of the trauma of Partition from India in 1947. Its cricket team evolved in the chaotic aftermath. Initially unrecognised, underfunded and weak, Pakistan's team grew to become a major force in world cricket. Since the early days of the Raj, cricket has been entwined with national identity and Pakistan's successes helped to define its status in the world. Defiant in defence, irresistible in attack, players such as A.H.Kardar, Fazal Mahmood, Wasim Akram and Imran Khan awed their contemporaries and inspired their successors. The story of Pakistan cricket is filled with triumph and tragedy. In recent years, it has been threatened by the same problems affecting Pakistan itself: fallout from the 'war on terror', sectarian violence, corruption, crises in health and education, and a shortage of effective leaders. For twenty years, Pakistan cricket has been stained by the scandalous behaviour of the players involved in match-fixing. After 2009, the fear of violence drove Pakistan's international cricket into exile. But Peter Osborne's narrative is also full of hope. For all its troubles, cricket gives all Pakistanis a chance to excel and express themselves, a sense of identity and a cause for pride in their country. Packed with first-hand recollections, and digging deep into political, social and cultural history, *Wounded Tiger* is a major study of sport and nationhood.

Heavy Metal Toxicity in Plants: Physiological and Molecular Perspectives highlights the various metal induced impacts on plants and adaptation strategies employed to avoid these stressful conditions. The volume comprise the chapters from the different areas ranging from latest biotechnological to omics approaches. This comprehensive volume emphasizes on the recent updates about the current research on the heavy metal stress in plant biology covering different aspects related to challenges and opportunities in the concerned field. This book is an attempt to bring together researchers who have been engaged in the area of stress signaling, crosstalk and mechanisms of heavy metal stress and share their research findings. Various chapters deal with the topics ranging from sensing and signalling in plants to translational research. The book will provide a direction towards implementation of programs and practices that will enable sustainable production of crops, resilient to environmental heavy metal pollution. Features: The book covers the heavy metal impact on plants in detail. Chapters cover an array of topics and issues related to heavy metal pollution and its management strategies by plants Recent research results and some pointers to future advancements in current topic.

The field of HCV therapeutics continues to evolve rapidly and since the World Health Organization (WHO) issued its first Guidelines for the screening care and treatment of persons with hepatitis C infection in 2014 several new medicines have been approved by at least one stringent regulatory authority. These medicines called direct-acting antivirals (DAAs) are transforming the treatment of HCV enabling regimens that can be administered orally are of shorter duration (as short as eight weeks) result in cure rates higher than 90% and are associated with fewer serious adverse events than the previous interfere on containing regimens. WHO is updating its hepatitis C treatment guidelines to provide recommendations for the use of these new medicines. The objectives of these WHO guidelines are to provide updated evidence-based recommendations for the treatment of persons with hepatitis C infection using where possible all DAA-only combinations. The guidelines also provide recommendations on the preferred regimens based on a patient's HCV genotype and clinical history and assess the appropriateness of continued use of certain medicines. This document also includes existing recommendations on screening for HCV infection and care of persons infected with HCV that were first issued in 2014. The key audience for these guidelines are policy-makers in low- and middle-income countries who formulate country-specific treatment guidelines and who plan infectious disease treatment programmes and services in addition to those people responsible for delivering treatment. The guidelines are appropriate for all countries including high-income countries.

Cost Accounting World Health Organization

'In my bestselling book Triggers', I raised this important question. Why don't we become the person we really want to be? In his book, 'Tick Tick Dollar', Qaier gives us the answer to this question and shares his proven philosophy to make that life a reality'. Marshall Goldsmith - World's #1 Leadership

Coach. #1 New York Times Bestselling Author of TRIGGERS' Tick Tick Dollar philosophy is not my invention. It is my discovery. I discovered this philosophy when I was at the lowest point in my own life. My 24 years struggle to turn my life around brought me to a point where I was homeless, jobless, visionless, hopeless, resourceless, loveless, and almost lifeless. My annual income was less than 200\$. I had a destructive self-image, stumpy self-confidence, and a poor concept about who I was and what I thought I could do. I had lost faith and was nearly about to give up. And then I embraced Tick Tick Dollar philosophy. Tick Tick Dollar approach was my companion, inspiration, and north star in all those frustrating, shattering, and devastating instants. The fact is that with no financial resources, no professional network, no background, and no confidence, God granted me all that which a few years ago existed only in my imagination. What made me do all of this that I could never have imagined doing even in my daydreams only a few short years ago? It was just a simple shift in my thinking, beliefs, and philosophy. I committed myself to stick to three decisions I made when my life was in a complete directionless mess: 1. Each day I will commit to following my purpose 2. I will use every waking moment to pursue my deepest passion 3. Every day, I will use the joint power of my purpose and passion for performing at the finest optimum levels.

Universities Handbook Zed Books

Natural resources and associated biological diversity provide the basis of livelihood for human population, particularly in the rural areas and mountain regions across the globe. Asia is home to the world's highest mountain regions including the Himalayas, Karakorum and Hindukush. These regions are renowned around the globe because of their unique beauty, climate, and biocultural diversity. Because of geoclimatic conditions, the mountains of Asia are medicinal and food plant diversity hot spots. The indigenous communities residing in the valleys of these mountains have their own culture and traditions, and have a long history of interaction with the surrounding plant diversity. Local inhabitants of these mountains areas possess significant traditional knowledge of plant species used as food, medicine, and for cultural purposes. So far, many workers have reported traditional uses of plant species from different regions of Asia including some mountain areas; however, there is not one inclusive document on the ethnobotany of mountains in Asia. This book provides a comprehensive overview on ethno-ecological knowledge and cross cultural variation in the application of plant species among various communities residing in the mountains of Asia; cross cultural variation in traditional uses of plant species by the mountain communities; high value medicinal and food plant species; and threats and conservation status of plant species and traditional knowledge. This book should be useful to researchers of biodiversity and conservation, ethnobiologists, ethnoecologists, naturalists, phytochemists, pharmacists, policy makers, and all who have a devotion to nature.
