The achievements and failures of key figures from many arenas--politics, technology, warfare, religion, and the arts among them--are drawn vividly, and social, cultural, and economic insights are included alongside the record of geopolitical strife. We read of the personality cult as exemplified by the Soviet portraits glorifying Lenin; the importance of the nylon stocking in the post-World War II economic boom; the influence of religion as five new nations (Serbia, Montenegro, Bulgaria, Romania, and Albania) emerged between 1871 and 1914--an influence that continues to be both vigorous and deadly; and the confrontation between traditional and modern cultures captured as the railway age began in Russia. Beautifully illustrated with over 200 pictures in color and black and white, this insightful book offers an unparalleled, informed perspective on the history of an ever-changing continent. <i>London's Contemporary Architecture</i> + Palala Press Vilified by leading architectural modernists and Victorian critics alike, mass-produced architectural ornament in iron has received little sustained study since the 1960s; yet it proliferated in Britain in the half century after the building of the Crystal Palace in 1851 - a time when some architects, engineers, manufacturers, and theorists believed that the fusion of iron and ornament would reconcile art and technology and create a new, modern architectural language. Comprehensively illustrated and richly researched, Iron, Ornament and Architecture in Victorian Britain presents the most sustained study to date of the development of mechanised architectural ornament in iron in nineteenth-century architecture, its reception and theorisation by architects, critics and engineers, and the contexts in which it flourished, including industrial buildings, retail and seaside architecture, railway stations, buildings for export and exhibition, and street furniture. Appealing to architects, conservationists, historians and students of nineteenth-century visual culture and the built environment, this book offers new ways of understanding the notion of modernity in Victorian architecture by questioning and re-evaluating both Victorian and modernist understandings of the ideological split between historicism and functionalism, and ornament and structure. <i>The Fundamentals of Illustration</i> e-artnow Jewish history in London began with the arrival of a group of Jews with William the Conqueror. The story comes right up to the present day. Gerry Black's lively account offers a sharp insight into the contribution made by modern Jews to the culture and economy of London. <b>An Illustrated Dictionary for the Modern Trombone, Tuba, and Euphonium Player</b> DigiCat A gorgeously illustrated look at the profound influence that classical ballet and the ballerina have had on high fashion Ballerina: Fashion's Modern Muse is a revelatory, irresistible treat for dance aficionados and fashionistas alike. Written by fashion and ballet experts, the book is illustrated with archival photography by such masters as Richard Avedon, Edward Steichen, Irving Penn, Man Ray, and Cecil Beaton, along with newly commissioned photography of contemporary ballerinas wearing ballet-influenced couture. <b>"Iron, Ornament and Architecture in Victorian Britain "</b> Vendome Press This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This book examines the health/fitness interaction in an historical context. Beginning in primitive hunter-gatherer communities, where survival required adequate physical activity, it goes on to consider changes in health and physical activity at subsequent stages in the evolution of "civilization." It focuses on the health impacts of a growing understanding of medicine and physiology, and the emergence of a middle-class with the time and money to choose between active and passive leisure pursuits. The book reflects on urbanization and industrialization in

relation to the need for public health measures, and the ever-diminishing physical demands of the work-place. It then evaluates the attitudes of prelates, politicians, philosophers and teachers at each stage of the process. Finally, the book explores professional and governmental initiatives to increase public involvement in active leisure through various school, worksite, recreational and sports programmes.

*The Oxford Illustrated History of Modern Europe*

An illustrated tour through New York's five boroughs and the past 100 years of its modern architecture, told through the charming yet bold drawings of Lukas Novotny. Modern New York: The Illustrated Story of Architecture in the Five Boroughs from 1920 to Today takes the reader on a roller-coaster ride through the changing fortunes of New York City throughout the last hundred years, from the heights of the Roaring Twenties and "Mad Men" Fifties, to the depths of the Great Depression Thirties, through to "Fear City" in the Seventies, and beyond. Many of the featured buildings won't be found in city guides and some of them are no longer around—but each one played an integral part in the fascinating story of the five boroughs. The ten decades are explored

through some 150 buildings in all corners of the city, from Rockefeller Center to the Pan Am Building to the Standard Hotel, as well as treasures lost, such as the 1927 Savoy-Plaza Hotel, and treasures rescued, such as the astonishingly glamorous 1924 American Radiator Building, now the Bryant Park Hotel. New York City has been described from every possible angle through thousands of books. But not many of them venture out of Manhattan, let alone visit all five boroughs. Out of these, only a handful is accessible to non-experts and fewer still are entertaining and illustrated. And none of them offer such a crisp and visually unified picture of the Big Apple.
