Shows how digital media connects people to their lived environments Every day, millions of people turn to small handheld screens to search for their destinations and to seek recommendations for places to visit. They may share texts or images of

themselves and these places en route or after their journey is complete. We don't consciously reflect on these activities and probably don't associate these practices with constructing a sense of place. Critics have argued that digital media alienates users from space and place, but this book argues that the exact opposite is true: that we habitually use digital technologies to re-embed ourselves within urban environments. The Digital City advocates for the need to rethink our everyday interactions with digital infrastructures, navigation technologies, and social media as we move through the world. Drawing on five case studies from global and mid-sized cities to illustrate the concept of "re-placing," Germaine R. Haleboua shows how different populations employ urban

broadband networks, social and locative media platforms, digital navigation, smart cities, and creative placemaking initiatives to turn urban spaces into places with deep meanings and emotional attachments. Through timely narratives of everyday urban life, Haleboua argues that people use digital media to create a unique sense of place within rapidly changing urban environments and that a sense of place is integral to understanding contemporary relationships with digital media.

Digital Photography was first introduced to the general public around 1989, depending in what part of the world you were during that time. Since then, people have been getting rid of their film cameras and turning them in for new DSLR s (Digital Single Lens Reflex) which has given photographer many new options to choose from that they didn t have with film cameras. Since DSLR s affords so many options, unless you know a lot about digital photography, you might think that if you went out and purchased a \$2000.00 camera you d be able to take photographs just like a National Geographic photographer. But just buying an expensive camera won t make you take better photographs then you did with your film camera. When I teach my Basic Digital Photography I tell

the class that you need to first and foremost, you need to learn the language of photography which is not as easy as one may think. Learning how to make photographs rather than take photographs requires one to understand the many options that digital photography has to offer. Most people get frustrated in learning how to use their camera and just wind up setting the automatic setting on the camera which defeats the whole purpose of buying a digital camera in the first place. Because a digital camera gives more options to the photographer, what this booklet does is cut the many options down to three basic camera controls. Once you've learned the three controls you can move on in learning more advanced options of the camera."

Criminal Profiling: An Introduction to Behavioral Evidence Analysis, Fifth Edition, maintains the same core foundation that made previous editions best sellers in the professional and academic community worldwide. Written for practicing behavioral analysts and aspiring students alike, this work emphasizes an honest understanding of crime and criminals. Newly updated, mechanisms for the examination and classification of both victim and offender behavior have been improved. In addition to refined approaches toward international perspectives, chapters on psychological autopsies, scene investigation reconstruction, court issues

and racial profiling have also been added. Outlines the scientific principles and practice standards of BEA-oriented criminal profiling, with an emphasis on applying theory to real cases Contains contributions from law enforcement, academia, mental health fields, and forensic science communities Includes a complete glossary of terms, along with an instructor website and student companion site

Encyclopedia of Transportation

Lonely Planet

The world's most popular sport, soccer is a global and cultural phenomenon. The television audience for the 2010 World Cup included nearly half of the world's population, with viewers in nearly every country. As a reflection of soccer's significance, the sport impacts countless

aspects of the world's culture, from politics and religion to business and the arts. In *The World through Soccer: The Cultural Impact of a Global Sport*, Tamir Bar-On utilizes soccer to provide insights into worldwide politics, religion, ethics, marketing, business, leadership, philosophy, and the arts. Bar-On examines the ways in which soccer influences and reflects these aspects of society, and vice versa. Each chapter features representative players, providing specific examples of how soccer comments on and informs our lives. These players—selected from a wide array of eras, countries, and backgrounds—include Diego Maradona, Pelé, Hugo Sánchez, Cha Bum-Kun, Roger Milla, José Luis Chilavert, Zinedine Zidane, Paolo Maldini, Cristiano Ronaldo,

Xavi, Neymar, Clint Dempsey, Mia Hamm, and many others. Employing a unique lens to view a variety of topics, *The World through Soccer* reveals the sport's profound cultural impact. Combining philosophical, popular, and academic insights about our world, this book is aimed at both soccer fans and academics, offering readers a new perspective into a sport that affects millions.

Sitting down to a daily family meal has long been a tradition for billions of people. But in every corner of the world this age-old custom is rapidly changing. From increased trade between countries to the expansion of global food corporations like Kraft and Nestlé, current events are having a tremendous impact on our eating habits. Chances are your supermarket is stocking a variety of international foods, and American fast food chains like McDonald's and Kentucky Fried Chicken are popping up all over the planet. For the first time in history, more people are overfed than underfed. And while some people still have barely enough to eat, others

overeat to the point of illness. To find out how mealtime is changing in real homes, authors Peter Menzel and Faith D'Aluisio visited families around the world to observe and photograph what they eat during the course of one week. They joined parents while they shopped at mega grocery stores and outdoor markets, and participated in a feast where a single goat was shared among many families. They watched moms making dinner in kitchens and over cooking fires, and they sat down to eat with twenty-five families in twenty-one countries--if you're keeping track, that's about 525 meals! The foods dished up ranged from hunted seal and spit-roasted guinea pig to U.N.-rationed grains and gallons of Coca-Cola. As Peter and Faith ate and talked with families,

they learned firsthand about food consumption around the world and its corresponding causes and effects. The resulting family portraits offer a fascinating glimpse into the cultural similarities and differences served on dinner plates around the globe. This book has been selected as a Common Core State Standards Text Exemplar (Grades 2-3, Read-Aloud Informational Texts) in Appendix B.

The Digital City Elsevier

Presidential Picture Stories is about the photographers who cover the presidents, how they viewed the presidents they covered, and what the presidents thought of them. It is a unique new history of US presidents and their families. Stories about photographer s tricks, triumphs, defeats, and of course,

war stories. There are stories about the iconic presidential photographs and how the photographers made them. An important part of the book tells about the tools that photographers used from Mathew Brady to today. Presidential Picture Stories is a fast history of the news picture business and a collection of delightful stories about the characters behind the cameras."

Producing Women Little, Brown

Using a novel approach to consider the available literature and research, this book focuses on the psychology of social media based on the assumption that the experience of being in a social media has an impact on both our identity and social relationships. In order to 'be online', an individual has to create an online presence – they have to share

information about themselves online. This online self is presented in different ways, with diverse goals and aims in order to engage in different social media activities and to achieve desired outcomes. Whilst this may not be a real physical presence, that physicality is becoming increasingly replicated through photos, video, and ever-evolving ways of defining and describing the self online. Moreover, individuals are using both PC-based and mobile-based social media as well as increasingly making use of photo and video editing tools to carefully craft and manipulate their online self. This book therefore explores current debates in Cyberpsychology, drawing on the most up-to-date theories and research to explore four main aspects of the social media experience

(communication, identity, presence and relationships). In doing so, it considers the interplay of different areas of psychological research with current technological and security insight into how individuals create, manipulate and maintain their online identity and relationships. The social media are therefore at the core of every chapter, with the common thread throughout being the very unique approach to considering diverse and varied online behaviours that may not have been thus far considered from this perspective. It covers a broad range of both positive and negative behaviours that have now become integrated into the daily lives of many westernised country's Internet users, giving it an appeal to both scholarly and industry readers alike.

A look at Jenna Citrus's photography through May 2013. Jenna Citrus is a portrait photographer who engages her subjects in the process of art making. Some of her works directly engage the models with having their face as the canvas. Jenna's love for splatter paint can be taken to a new level when integrating photography and people into her arsenal of tools. Each page of this full color photo compilation deals with

color and subject themes with a homogenous feel throughout the whole book. Color is integrated to create a harmonious feel and convey the subjects.

Golden Embryo CRC Press

Feature and Narrative Storytelling for Multimedia Journalists is the first text that truly focuses on the multimedia and documentary production techniques required by professional journalists. Video and audio production methods are covered in rich detail, but more importantly, various storytelling techniques are explored in depth. Likewise, author Duy Linh Tu tackles the latest topics in multimedia storytelling, including mobile reporting, producing, and publishing, while also offering best practices for using social media to help

promote finished products. Whether you're a student, a professional seeking new techniques, or simply looking to update your skills for the new digital newsroom, this book will provide you with the information and tools you need to succeed as a professional journalist. **Integrated:** The lessons in this book deftly combine traditional media production principles with storytelling craft. It is written with the perspective of modern professional journalists in mind. **Practical:** While rich with theory, this text is based on the real-world work of the author and several of his colleagues. It features Q&As with some of the best editors and video producers from top publications, including NPR, Vice, and Detroit Free Press, as well as profiles of leading video news organizations such

as Frontline, Mediastorm, and Seattle Times. **Proven:** The author uses pedagogy from the world-renowned Columbia Journalism School as well as case studies from his own award-winning work. **Interactive:** The text is exercise- and drill-based, and the companion website provides multimedia examples and lesson files, as well as tutorials, case studies, and video interviews.

Tim Walden's photographic forte is capturing relationship images—emotionally resonant images that show the connection between subjects. To achieve this goal, he strives to proceed through a three-step portrait process: capture, adjust, and refine. He studies the clients and does not push the shutter button until he sees some magic unfold. If the clients are still “in the moment,” he may make a slight adjustment to the pose or lighting and capture a second, slightly varied image. If the subjects are still enthralled at that point, he will make a further refinement, producing a portrait that, in Tim's mind, is the pinnacle shot—the dynamic, emotionally evocative, storytelling images he strives for. In this book, Tim presents over 60 images from some of

his most memorable sessions, sharing with readers tips for capturing moments, enhancing the presentation, and truly amplifying the artistry of the capture to produce a fine-art image that will be cherished for generations.

Viewing transportation through the lens of current social, economic, and policy aspects, this four-volume reference work explores the topic of transportation across multiple disciplines within the social sciences and related areas, including geography, public policy, business, and economics. The book's articles, all written by experts in the field, seek to answer such questions as: What has been the legacy, not just

economically but politically and socially as well, of President Eisenhower's modern interstate highway system in America? With that system and the infrastructure that supports it now in a state of decline and decay, what's the best path for the future at a time of enormous fiscal constraints? Should California politicians plunge ahead with plans for a high-speed rail that every expert says—despite the allure—will go largely unused and will never pay back the massive investment while at this very moment potholes go unfilled all across the state? What path is best for emerging countries to keep pace with dramatic economic growth for their part? What are the social and financial costs of gridlock in our cities? Features: Approximately 675 signed articles

authored by prominent scholars are arranged in A-to-Z fashion and conclude with Further Readings and cross references. A Chronology helps readers put individual events into historical context; a Reader's Guide organizes entries by broad topical or thematic areas; a detailed index helps users quickly locate entries of most immediate interest; and a Resource Guide provides a list of journals, books, and associations and their websites. While articles were written to avoid jargon as much as possible, a Glossary provides quick definitions of technical terms. To ensure full, well-rounded coverage of the field, the General Editor with expertise in urban planning, public policy, and the environment worked alongside a Consulting Editor with a background in

Civil Engineering. The index, Reader's Guide, and cross references combine for thorough search-and-browse capabilities in the electronic edition. Available in both print and electronic formats, Encyclopedia of Transportation is an ideal reference for libraries and those who want to explore the issues that surround transportation in the United States and around the world.

Camera Basics Understanding the Basics of Photography - Simply. ABOUT THIS GUIDE: There was a time when you used to put a roll of film in your camera and then you only had to do three things - change the shutter speed, change the aperture and set the focus. No menus needed. Beyond this came the thought process of the photographer. This is

what this Companion Guide is about, an aide-memoire in the field to help you consider what you are doing with your camera and achieve more successful results. Take control of your photography! Fed up with inconsistent pictures from your camera? Disappointed with your photos? Getting lost in encyclopedic photography books full of technical jargon? You may want to excel more in your photography or just impress your friends and family with your photos. Light Academy Photo Companion Guides help you to become a better photographer, simply. I began training in 2013, since then students have commented that many books confuse them. Technical information becomes overwhelming and halts the learning process. The Light Academy

Photo Companion Guides are short, helpful and easy to follow. Some also contain a field guide at the back. Keep them with you, on your tablet or phone, or by your workstation. I have kept them at around 30 pages to keep the learning process manageable. Choose the areas of photography you want to expand your skill on. Buy what you need at prices that will not break the bank. About the Author - Tony Bramley FRPS Tony Bramley has been a professional photographer for over twenty years. His own photography passion started back in the 1980s as an amateur at his local camera club. He has shot from 35mm, medium format to DSLR and has been using mirrorless since 2013. Professionally, he has shot portraiture, weddings, commercial and PR

photography. His personal photography revolves around abstract, street, social documentary, landscape and architecture subjects. In December 2015, he received the prestigious title of Fellow of the Royal Photographic Society. In 2016 The Bill Wisden MBE HonFRPS Fellowship of the Year Award followed. Now semi-retired, he concentrates on training photographer groups and on a one-to-one basis. His company, The Light Academy organises workshops in East Anglia and the London area. He is still active in club photography as well as travelling for talks and judging. This is the third collection of Bodhi Smith's work compiled from Aug 2013-May 2014. Inside, three different portfolios exhibit landscape photography that has been captured along the US Highway 101 corridor in California and Oregon. This book is full of scenery that will astound the eyes with compositions capturing light in such a way as to create an impression or a feeling in the mind of the viewer. Some images convey

reflections and dancing light; other images amaze with bold and breathtaking colors; still other images have no color, they make a stark declaration with their contrasts of black and white. No matter what the design, all of Bodhi's photography studies light and its interplay with various elements, such as clouds, water, rocks, or wood to create perspective and meaning. Each photo in this book will leave the viewer enchanted, wanting more with each flip of the page."I hope you enjoy this modest collection of my images, my third, as I have enjoyed collecting these images." - D.
