The Early Grade Reading Assessment (EGRA) measures students' progress towards reading. EGRA gauges early literacy skills through a 15-minute individual oral assessment of five fundamental reading skills. RTI worked with education experts to develop the EGRA in 2006, and it has been piloted and

implemented in more than 40 countries. This volume aims to take stock of the substantial amount of information and experience generated through the use of EGRA, and to share this knowledge with practitioners, policymakers, and international donors. Chapters cover not only particular applications of the instrument but also put EGRA in the context of broader issues and developments in literacy and education.

Library of Congress Catalog: Motion Pictures and Filmstrips UNESCO Publishing

Vols. for 1871-76, 1913-14 include an extra number, The Christmas bookseller, separately paged and not included in the consecutive numbering of the regular series.

The Road to Zero Haan Publishing

This book uniquely explores the impact of indigenous ideology and thought on everyday life in Northeast Africa. Furthermore, in highlighting the diversity in pre-Christian, pre-Islamic regional beliefs and practices that extend beyond the simplistic political arguments of the current dominant narratives, the study shows that for millennia complex indigenous institutions have bound people together beyond the labels of Christianity and Islam; they have sustained peace through cultural exchange and tolerance (if not always complete acceptance). Through recent archaeological and ethnographic research, the concepts, landscapes, materials and rituals believed to be associated with the indigenous and shared culture of the Sky-God belief are examined. The author makes sense, for the first time, of the relationship between the notion of sacred fertility and a number of regional archaeological features and on-going ancient practices including FGM, spirit possessions, and other physically invasive practices and the ritual hunt. The book explores one of the most important pilgrimage centres in Somaliland and Somalia, the sacred landscape of Saint Aw-Barkhadle, founded ca. 12th century AD. It is believed to be the burial place of the rulers of the first Muslim Ifat and Awdal dynasties in this region, and potentially the lost first capital of Awdal kingdom before Harar. This ritual centre is seen as a 'microcosm' of the ancient Horn of Africa with its exceptional multi-religious heritage, through which the author lays out a locally appropriate archaeological interpretational framework, the "Ritual Set," also applied here to the Ethiopian sites of Tiya, Sheikh Hussein Bale, Aksum and Lalibela, setting these places against a wider historical background of indigenous Sky-God belief. This archaeological study of sacred landscapes, stelae

traditions, ancient Christian and medieval Muslim centres of Northeast Africa is the first to put forward a theoretical and analytical framework for the interpretation of the shared regional heritage and the indigenous archaeology of the region. It will be invaluable to archaeologists, anthropologists, historians and policymakers interested in Africa and beyond.

Debrett's Peerage, Baronetage, Knightage, and Companionship
Columbia University Press

Postwar multilateral cooperation is often viewed as an attempt to overcome the limitations of the nation-state system. However, in 1945, when the United Nations was founded, large parts of the world were still under imperial control. Building States investigates how the UN tried to manage the dissolution of European empires in the 1950s and 1960s—and helped transform the practice of international development and the meaning of state sovereignty in the process. Eva-Maria Muschik argues that the UN played a key role in the global proliferation and reinvention of the nation-state in the postwar era, as newly independent states came to rely on international assistance. Drawing on previously untapped primary sources, she traces how UN personnel—usually in close consultation with Western officials—sought to manage decolonization peacefully through international development assistance. Examining initiatives in Libya, Somaliland, Bolivia, the Congo, and New York, Muschik shows how the UN pioneered a new understanding and practice

of state building, presented as a technical challenge for international experts rather than a political process. UN officials increasingly took on public-policy functions, despite the organization's mandate not to interfere in the domestic affairs of its member states. These initiatives, Muschik suggests, had lasting effects on international development practice, peacekeeping, and post-conflict territorial administration. Casting new light on how international organizations became major players in the governance of developing countries, *Building States* has significant implications for the histories of decolonization, the Cold War, and international development.
