Making the Case brings

together established and emerging philosophers who use case studies to address a variety of contemporary social justice causes. The contributors show both the depth and breadth of work in this area and highlight the distinctive approaches that feminist and critical race theorists, in particular, have pursued. For these theorists, the choice of the kinds of cases analyzed matters, not only pushing philosophy as a field to foreground the challenges facing

marginalized groups but also affecting the kind of philosophy that results. This ensures that their theories do not reproduce the conceptual frameworks of dominant groups. By using thickly described cases, as opposed to the thinly described or hypothetical situations that have been the historic mainstay of philosophy, the contributors strive to create philosophy that never strays too far from the complexities of people's lives on the ground. The book

provides philosophers with a host of methodologies, theories, and practical examples for use in social justice case work, with topics ranging from census design and gender bias in science to incarceration and the spate of recent police killings of black men and women. *Language in Late Capitalism* Pushkin Children's Books

research and in the process demystifies some of the multilingual aspects of contemporary ethnographic work. It does this by offering a set of engaging and accessible accounts of language learning and use written by ethnographers who are at different stages of their academic career. A key theme is how researchers' experiences of learning and using other languages in fieldwork contexts relate to wider structures of power, hierarchy and inequality.

The volume aims to promote a wider debate among researchers about how they themselves learn and use different languages in their work, and to help future fieldworkers make more informed choices when carrying out ethnographic research using other languages.

La domination s'exerce aussi par le langage. Les "élites" imposent leur manière de parler comme la seule légitime. Ceux qui s'en écartent par leur accent, leur vocabulaire

ou leurs tournures de phrases sont renvoyés à un statut inférieur et méprisés. Le livre donne un nom à cette discrimination fondée sur le langage: la glottophobie. Linguiste, son auteur la démontre, démonte et dénonce, exemples à l'appui, pour mieux la combattre.

A trip around a city block is like a trip around the world! Peeking out through a die-cut window

on the jacket, Madlenka invites the reader to enter her world. And what a world it is! On the surface, it looks like an ordinary city block, but as we meet Madlenka's neighbors -- the French baker, the Indian news vendor, the Italian ice-cream man, the Latin American grocer, a retired opera singer from Germany, an African American school friend, and the Asian shopkeeper -- and look through die-cut windows to the images and memories they have carried from old country to new, we can

see that Madlenka's block is as richly varied as its inhabitants. And why is Madlenka going around the block, jumping for joy? Her tooth is loose, and she wants everyone to know! Madlenka is a 2000 New York Times Book Review Notable Children's Book of the Year. This title has Common Core connections.

Le français pour et par la diversité et l'éducation plurilingue et interculturelle Farrar, Straus and Giroux (BYR)
Les 41 contributions au volume 5, venues de 27

pays, témoignent de l'importance de la prise en compte de la diversité dans l'enseignement du français, de différents points de vue, et de l'intérêt qu'y attachent les professeur.e.s de français. Il ne s'agit pas seulement de diffuser le français mais de s'inscrire dans des situations locales très diversifiées en examinant de façon minutieuse leurs caractéristiques, tant sur le plan des pratiques didactiques que des représentations qui documentent les projets d'appropriation de leurs

élèves et étudiants. Les textes réunis insistent sur différentes modalités pour mettre en oeuvre un enseignement du français incluant des formes d'éducation plurilingue et interculturelle. Celles-ci se déclinent de diverses façons en recourant par exemple à des démarches contrastives, à des approches plurielles, à des entraînements à l'intercompréhension. Elles renouent aussi, dans un certain nombre de cas, avec un intérêt pour des activités mobilisant la littérature et la traduction,

en valorisant une réflexion sur ce qui advient " entre les langues ", dans une perspective non plus seulement inter- mais aussi alter- linguistique et culturelle.

This book asks how we—as citizens, immigrants, activists, teachers—can counter the abuse of language in our midst. How can we take back the power of language from those who

flaunt that power to silence or erase us and our fellows? In search of answers, Linguistic Disobedience recalls ages and situations that made critiquing, correcting, and caring for language essential for survival. From turn-of-the-twentieth-century Central Europe to the miseries of the Third Reich, from the Movement for Black Lives to the ongoing effort to decolonize African languages, the study and practice of linguistic disobedience have been crucial. But what are we

to do today, when reactionary supremacists and authoritarians are screen-testing their own forms of so-called disobedience to quash oppositional social justice movements and their languages? Blending lyric essay with cultural criticism, historical analysis, and applied linguistics, Linguistic Disobedience offers suggestions for a hopeful pathway forward in violent times.

Non-linguistic conflicts are often projected on to language differences, and may be played out in the language policies of governments and other holders of power. This text deals broadly with this interaction of language issues and political process.

Globalization, the Internet and an era of mass travel have combined to produce a world with a

language mix on a huge scale. Linguanomics explains this multilingualism in a material, economic and cultural sense. What is the effect of this multilingualism on society, organizations and individuals? What are the economic benefits and drawbacks? Should we invest in language skills? Should there be interventionist policies, and if so, at what level? Should there be a global lingua mundi? The debate surrounding multilingualism is often

clouded by emotion and misconception. With an analysis devoid of rhetoric, Gabrielle Hogan-Brun takes an objective look at this charged area. The result is Linguanomics: a major step towards a clearer understanding of the market potential of multilingualism, its benefits, costs and points of contention. Asking significant questions of profound concern to the future of global collaboration, Linguanomics is an essential guide to

students, teachers, policy makers and politicians and anyone who cares about the role of language in the modern world.

Advances in Discourse Analysis Cambridge University Press

This book examines the ways in which our ideas about language and identity which used to be framed in national and political terms as a matter of rights and citizenship are increasingly recast in economic terms as a matter of added value. It argues that this discursive shift is connected to specific characteristics of

the globalized new economy in what can be thought of as "late capitalism". Through ten ethnographic case studies, it demonstrates the complex ways in which older nationalist ideologies which invest language with value as a source of pride get bound up with newer neoliberal ideologies which invest language with value as a source of profit. The complex interaction between these modes of mobilizing linguistic resources challenges some of our ideas about

globalization, hinting that we are in a period of intensification of modernity, in which the limits of the nation-State are stretched, but not (yet) undone. At the same time, this book argues, this intensification also calls into question modernist ways of looking at language and identity, requiring a more serious engagement with capitalism and how it constitutes symbolic (including linguistic) as well as material markets. Even a cursory look at

conference programs and proceedings reveals a burgeoning interest in the field of social and affective factors in home language maintenance and development. To date, however, research on this topic has been published in piecemeal fashion, subsumed under the more general umbrella of 'bilingualism'. Within bilingualism research, there has been an extensive exploration of linguistic and psycholinguistic perspectives on the one hand, and educational

practices and outcomes on the other. In comparison, social and affective factors – which lead people to either maintain or shift the language – have been under-researched. This is the first volume that brings together the different strands in research on social and affective factors in home language maintenance and development, ranging from the micro-level (family language policies and practices), to the meso-level (community initiatives) and the macro-

level (mainstream educational policies and their implementation). The volume showcases a wide distribution across contexts and populations explored. Contributors from around the world represent different research paradigms and perspectives, providing a rounded overview of the state-of-the-art in this flourishing field. *The Invention of Multilingualism* Routledge "Form" and "formalism" are a pair of highly productive and polysemous terms that

occupy a central place in much linguistic scholarship. Diverse notions of "form" – embedded in biological, cognitive and aesthetic discourses – have been employed in accounts of language structure and relationship, while "formalism" harbours a family of senses referring to particular approaches to the study of language as well as representations of linguistic phenomena. This volume brings together a series of contributions from historians of science and

philosophers of language that explore some of the key meanings and uses that these multifaceted terms and their derivatives have found in linguistics, and what these reveal about the mindset, temperament and daily practice of linguists, from the nineteenth century up to the present day. [The Creolization of Theory](#) Cambridge University Press
Childhood multilingualism has become a norm rather than an exception. This is the first handbook to

survey state-of-the-art research on the uniqueness of early multilingual development in children growing up with more than two languages in contact. It provides in-depth accounts of the complexity and dynamics of early multilingualism by internationally renowned scholars who have researched typologically different languages in different continents. Chapters are divided into six thematic areas, following the trajectory, environment and

conditions underlying the incipient and early stages of multilingual children's language development. The many facets of childhood multilingualism are approached from a range of perspectives, showcasing not only the challenges of multilingual education and child-rearing but also the richness in linguistic and cognitive development of these children from infancy to early schooling. It is essential reading for anyone interested in deepening their understanding of the

multiple aspects of multilingualism, seen through the unique prism of children.

[The Routledge Handbook of Plurilingual Language Education](#) Liverpool University Press

This book addresses contemporary issues in the assessment of plurilingual competence and plurilingual learners. Offering theoretical and practical lenses, it contributes towards an integrated and holistic assessment of plurilingual competence and plurilingual learners. The

book provides both theoretical considerations and empirical approaches around how the specificities of plurilingual learners can be considered when assessing their various competences. It covers topics relating to learners in a variety of plurilingual settings: from the education of adult immigrants, assessment of young refugees and assessment of students in school and university, to the assessment of plurilingual competence in foreign language

education. Showcasing a wide range of international authors, the book provides cutting-edge research in the domain of multilingual foreign, second and heritage language assessment, and assessment of content knowledge of plurilingual

students. It bridges the gap between the fields of language policies and practices, research on plurilingual competence, and assessment in language education. Providing new insights into a crucial and contentious issue, this

volume will be an essential reading for researchers and postgraduate students in the fields of educational language policies, applied linguistics and multilingualism, in particular those involved in the assessment of plurilingual competence.
