Weaving Freeform Wire Jewelry is a guide to understanding and using wire weaves to create 20 beautiful freeform jewelry projects. With a tight focus on five wire weaves—over-under, over-over, coiling, looping, and circular weaving — the reader will learn by making rings, pins, earrings, pendants, clasps, and bracelets. Author Kaska Firor offers a wonderful variety of symmetrical and asymmetrical designs to inspire the budding wireworker, in addition to showing the evolution of wirework design from simple to complex for more advanced jewelry-makers.

National Occupational Classification, 2006 Penguin

During the long 19th century, Scotland was home to an

established body of skilled jewellers who were able to access a range of materials from the country's varied natural landscape: precious gold and silver; sparkling crystals and colourful stones; freshwater pearls, shells and parts of rare animals. Following these materials on their journey from hill and shore, across the jeweller's bench and on to the bodies of wearers, this book challenges the persistent notion that the forces of industrialisation led to the decline of craft. It instead reveals a vivid picture of skilled producers who were driving new and revived areas of hand skill, and who were key to fostering a focused cultural engagement with the natural world – among both producers and consumers – through the things they made. By placing producers and their skill in cultural context, the book reveals how examining the materiality of even the smallest of objects can offer new and multifaceted insights into the wider transformations that marked British history during the long 19th century. *The Material Landscapes of Scotland's Jewellery Craft 1780-1914* brings together a vast array of jewellery objects with a range of other sources – including paintings, engravings, newspaper reports, letters, inventories of big houses and small workshops, sketchbooks, novels, works of literary geology and early travel writings – to provide a detailed cultural history of jewellery production. In doing so, it sets out innovative methodologies for writing about the histories of craft production, the natural environment and the material world.

Weaving Freeform Wire Jewelry

The Phenomenon of Studio Goldsmithing When the history of art in the 1980s is written, much of it will be etched in gold. This is the time of the contemporary goldsmith, an artist who chooses to work in precious metals rather than oils or marble. The contemporary jeweler-as-artist has only recently become a recognized force. With rare exceptions, the whole field is little more than thirty years old. But it is only within the past fifteen years that these jewelers have entered the jewelry mainstream. The phenomenon of contemporary goldsmithing embraces an eclectic group of artists, each with a unique vision, each taking a personal path to jewelry producing. They have as little relationship to the typical, mass-produced jewelry as a champagne maker has to a bottler of orange soda. They approach a piece of art, not a piece of metal. The work is personal and a perfect expression of the "back to the land" movement that spawned it. Many of these goldsmiths were looking not merely for a way to make a living but for a way to make a life that was worthy of living. Running a business while trying to remain a creative metalsmith at the same time is the ongoing challenge. The jeweler-artists have solved or resolved these often conflicting needs in slightly different ways and in a beautiful variety of techniques and styles. Their methods, their growth, and their work are discussed here.

Classification and definitions

This catalogue covers around 200 pieces of jewellery dating from the 1850s to the 1980s, products of the American company Tiffany & Co. The essays chart the early years of the store, its transformation into a world leader and its re-establishment as a worldwide brand after 1945.

Dictionary of Occupational Titles. Supplement. Edition II.
