In the year 1260,

Nicola Pisano, the

sculptor who initiated

the revival of classicizing ideals that would later form a major component of Italian Renaissance art, created a remarkable and unusual monument for the Baptistry of Pisa, a hexagonal pulpit supported by seven

colorful columns and displaying on its parapet five visually compelling narrative reliefs; several years later he designed a second pulpit, this time for the cathedral of Siena. Toward the end of the century, his son Giovanni received a pulpit commission for the parish church of Sant'Andrea, Pistoia, to be followed a few years later (c. 1302) by another one for the cathedral of Pisa. These four extraordinary monuments, each building upon both older traditions and its own immediate predecessors, yet each a highly innovative and original solution, are the primary subject of this book. The pulpits by Nicola and Giovanni Pisano were produced during a period of

enormous economic, intellectual, cultural and spiritual flux. The expanded body of knowledge that resulted from the rise of Scholasticism—a theological-intellectual current that, beginning in the French cathedral schools of the twelfth century, attempted to reconcile Christian faith with the newly valued ideals of observation and reason, in short, to synthesize Christian and classical learning—found expression in new themes and naturalistic motifs abounding in painting, book illumination and sculpture, and in religious and civic iconography. In contrast to the emphasis on transcendental experience of the earlier Middle Ages,

the new urban-centered religious orders of the thirteenth-century, such as the Dominicans and the Franciscans, fostered a more direct, empathetic relationship between ordinary mortals and God and his saints. The Pisano pulpits were profoundly informed by these new conditions and concerns, and in turn they contributed to changing perceptions about the natural world and the nature of religious experience. Indeed, these pulpits are among the earliest visual manifestations in Italy of the scholastic inclination to embrace a wide range of knowledge, for the narratives relating biblical history are augmented by representations of

Virtues and Vices, Liberal Arts, and pagan prophetesses of antiquity. The sermons expounded from these and other urban pulpits were very much enhanced by the charisma of their preachers and the interplay between the verbal and the visual, both of which were expressed in the vernacular, that is, in the case of sermons no longer only in the remote Latin tongue, and in the case of visual imagery no longer employing the abstract forms and symbols of earlier periods. But preaching was by no means the sole function of these raised platforms; they were used for a variety of ceremonial occasions and, like the para-liturgical mystery and miracle plays that

were becoming increasingly popular, they satisfied the needs for edification, diversion, and even entertainment, needs as compelling in the thirteenth and fourteenth centuries as they are today. In this book, we explore in word and image these and other issues related to the pulpits of Nicola and Giovanni Pisano, both as individual masterpieces and as monuments within the larger context of pulpit traditions. Nicola and Giovanni, different as were their sculptural styles, were both consummate storytellers and it is nothing less than astonishing to observe the formal devices employed to make those stories as compelling as possible: We shall thus witness

varying interpretations of the narratives, differing iconographic emphases and formal devices, changing conceptions of the human figure, and the development of spatial awareness in the work of both father and son. By offering close readings of the narrative and figural iconography, and the sculptural form conceived to give them expression, this book invites the modern viewer-reader to follow the itinerary of their original audience, the worshiper standing before and walking around each pulpit. In addition, however, numerous close-up views of passages difficult to see in situ offer privileged access to details readily visible primarily to the sculptor at work rather

than the standing or circumambulating spectator.

In 13th-century Toledo, King Alfonso the Wise fostered the publication of Castilian translations of certain Arabic works that had in turn been translated from Greek and Pehlvi. In this book, which is the revised English

version of the Spanish original published under the title of *Modelos griegos de la sabiduría castellana y europea*, the author studies four of these Castilian translations - the *Libro de los Buenos Proverbios*, *Poridad de las Poridades* or *Secreto de secretos*, *Bocados de Oro* and *Historia de la Donzella Teodor* - works of sapiential literature that had an enormous influence in all of Europe. Their Arabic models had been translated from Greek in Bagdad at the instigation of the great caliphs of the 9th century and also in the Fatamid court at Cairo in the 11th century. The traditional view is that this literature is simply of oriental origin, but the author believes that the

models were Greek Byzantine works discovered by the Arabs in Syria and Egypt in the 7th and 8th centuries. Their true origin is to be found in the Greek sapiential literature that developed around the figures of Socrates, Plato, Aristotle and Alexander in the Hellenistic, Roman and Byzantine schools of philosophy; its influence can frequently be found reflected in authors of Christian literature. A detailed study of themes, vocabulary and expressions in the works themselves confirms these origins. *FRIDERICI SPANHEMII F. F. Professoris Batavi Primarii OPERUM TOMUS I. From microaggressions to the wage gap, The

Memo empowers women of color with actionable advice on challenges and offers a clear path to success. Most business books provide a one-size-fits-all approach to career advice that overlooks the unique barriers that women of color face. In *The Memo*, Minda Harts offers a much-needed career guide tailored specifically for women of color. Drawing on knowledge gained from her past career as a fundraising consultant to top colleges across the country, Harts now brings her powerhouse entrepreneurial experience as CEO of *The Memo* to the page. With wit and candor, she acknowledges "ugly truths" that keep women of color from having a seat at the table in corporate

America. Providing straight talk on how to navigate networking, office politics, and money, while showing how to make real change to the system, The Memo offers support and long-overdue advice on how women of color can succeed in their careers.

leads to an evolution of knowledge, and the free exchange of knowledge leads to fresh findings. In the Middle Ages things were no different. The inheritance of ancient knowledge deeply influenced medieval thought. The writings of ancient Greek philosophers such as

Aristotle reached medieval readers primarily through translations.

Translators made an interpretation of the source-text, and their translations became the subject of commentaries. An understanding of the complex web of relations among source-texts, translations, and commentaries reveals how scientific thinking evolved during the Middle Ages. Aristotle's *Problemata*, a text provoking various questions about scientific and everyday topics, amply illustrates the communication of ideas during the transition between antiquity and the Renaissance. *Heraldry and the Heralds* Bollingen

prints, in both the north and south, are best understood as highly accessible objects shaped and framed by individual viewers. Author David Areford offers a synthetic historical narrative of early prints that stresses their unusual material nature, as well as their accessibility to a variety of viewers, both lay and monastic. This volume represents a shift in the study of the early printed image, one that mirrors the widespread movement in art history away from issues of production, style, and the artist toward issues of reception, function, and the viewer. Areford's approach is intensely grounded in the object, especially the unacknowledged material complexity of

the print as a portable, malleable, and accessible image that depended on a response that was not only visual but often physical, emotional, and psychological. Recognizing that early prints were not primarily designed for aesthetic appreciation, the author analyzes how their meanings stemmed from specific functions involving private devotion, protection, indulgences, the cult of saints, pilgrimage, exorcism, the art of memory, and anti-Semitic propaganda. Although the medium's first century was clearly transitional and experimental, Areford explores how its potential to impact viewers in new ways?both positive and negative?was quickly

realized.
