 What if the solution to student debt was reinvesting in yourself? Are you a smart, hard-working person who always seems to struggle financially? Do you ever second-guess decisions to pursue higher education because of your student loans? Has extreme budgeting eliminated joy and comfort from life, yet you're still several years away from being debt-free? Conventional wisdom tells us the formula for success is simple: go to school, get a job, work hard, repeat as needed until you retire. It tells us that debt is the result of poor choices and irresponsible spending. Unfortunately, such advice fails to take into account the recent (and not-so-recent) graduates for whom predatory student lending rates have set them back tens or even hundreds of thousands of dollars before they even enter the job market. In *Buy the Avocado Toast*, Stephanie Bousley shares lessons learned through years of working hard and perpetually undervaluing herself while coming to terms with owing almost \$300,000 in

student debt. Through a holistic approach to both net worth and self-worth, Bousley offers readers hope for their own financial situations by providing step-by-step instructions on reducing debt, living better, and rooting out the self-defeating beliefs that keep us broke.

An inspirational and timely reflection on the way we bring up children that will resonate with parents everywhere.

'Longtime high school English teacher McCullough scores an A+ with this volume for teens and parents. Rich in

literary references and poetic in cadence, the author also offers plenty of hilarious and pointed comments on teens and today's society.' - Publishers Weekly So you think you're special? Well, think again: you're not. David McCullough Jr, a US high-school English teacher, found himself suddenly famous in 2012 when his commencement address to graduating high-school seniors went viral on Youtube. the main theme of that speech, 'You're not special', seemed to hit a nerve and validate a sense among people worldwide that something is deeply and fundamentally wrong with the way children are being raised today. From infancy, he observed, children are taught to believe they are unique and special, deserving of every advantage, destined for success. Consequently they learn to work hard and distinguish themselves for the sake of status and material reward rather than for the benefit of others - the larger community; the world. Success is defined as something almost entirely selfish. there is little attention or time given to the pursuit of education for the sake of wisdom, or even real happiness. Drawing from his long career as an educator and experience as a father of teenage boys, McCullough will expand upon the ideas laid out in his radical twelve-minute speech and argue that we can do better - as parents and as teachers - than fostering in our children a sense of privilege and entitlement. Toasts and Tributes helps men master

these important skills with examples of more than 40 different toasts and 40 different notes. Includes examples of what to say and, perhaps more important, examples of what not to say. Perhaps he's been asked to say a few words at his college roommate's engagement party. Maybe he's at a family cookout, toasting his sister's recent law school graduation. Have his parents reached a milestone anniversary that deserves a son's perspective? Is his professional mentor retiring after decades as a leader in his field? Throughout his adult life, a man encounters those occasions that depend on his ability to distill the emotions of the moment into a toast, a letter, or perhaps just a few words of gratitude. John Bridges and Bryan Curtis call on their trademark wit to illustrate the skill of meaningful expression and show how to avoid those clichés, awkward jokes, and rambling speeches that threaten to derail the mood of any occasion. Learn how to keep your "just a few words" as succinct as possible, which rare occasions are suitable for an e-mail, and the proper way to give a toast everyone will remember.

Language Processing Problems: A Guide for Parents and Teachers is an easy-to-read but thorough treatment of a problem which is quite prevalent but often overlooked. Children (and adults) vary in their language processing capacities. Recognizing this variation can be very useful in understanding why certain children are having unexpected difficulties with school or social interactions. Split-second delays in recognizing words, problems remembering what was said, difficulties finding the word needed or organizing a complex sentence can all interfere with communication. For some children these problems are quite significant in spite of perfectly adequate or even exceptional knowledge of words and grammatical rules. The book explains, in laymans

terms, how people use language to communicate, the components of the language processing system and the types of problems that can arise with its use. In particular an attempt is made to discriminate between language processing problems and other disorders such as Attention Deficit Disorder (ADD), Central Auditory Processing Disorder (CAPD), Specific Language Impairment (SLI) and Dyslexia. Guidelines are provided for recognizing language processing problems and for deciding how to proceed toward a solution. The book ends with many suggestions which parents, teachers and children can use to address specific and general language processing problems. A quick pass through the book finds that it begins with several examples of children who have language processing problems. It then provides down-to-earth descriptions of what language processing is and how we use speech to communicate. This is followed by discussions of the difference between language knowledge and language processing and other psycholinguistic topics such as word recognition and working memory. Distinctions are drawn between input and output processing and between auditory and visual language processing. These topics are followed by a chapter about how children learn to process language. After this introduction to the workings of language processing, problems with language processing are treated in detail. What are the problems? Who has them? And what causes language processing problems? Confusions of terminology are dealt with and then come two chapters which lay out the intrinsic (genetic) and extrinsic (environmental) factors related to language processing problems. In these chapters I compare and integrate

information about related problems which can co-occur or be confused with language processing problems. The next two long chapters help parents and teachers recognize whether a child has a language processing problem and then decide what to do about it. The first of these chapters is divided into sections dealing with preschoolers, school-age children and high school students. The second chapter helps parents and teachers decide whether a speech-language evaluation is needed, what that evaluation should include, and details various possible treatment routes. There are four chapters which provide suggestions for improving listening and following directions, verbal memory, word retrieval and organization of language output, respectively. In each chapter there are suggestions for external strategies (to be used by parents and teachers) and internal strategies (to be used by the child) as well as descriptions of the kinds of treatment available from speech-language pathologists for these problems. A short, final summary is followed by a glossary and references.

This volume examines how oral and written language function in school learning, and how oral texts can be successfully inter-connected to the written texts that are used on a daily basis in schools. Rather than argue for the prominence of one over the other, the goal is to help the reader gain a rich understanding of how both might work together to create a new discourse that ultimately creates new knowledge.

Talking Texts: Provides historical background for the study of talk and text. Presents examples of children's and adolescents' natural conversations as analyzed by linguists. Addresses talk as it interfaces with domains of knowledge taught in schools to show how talk is related to and may be influenced by the structure, language, and activities of a specific discipline. Bringing together seminal lines of research to create a cohesive picture of discourse issues germane to classrooms and other learning settings, this volume is an

essential resource for researchers, graduate students, classroom teachers, and curriculum specialists across the fields of discourse studies, literacy and English education, composition studies, language development, sociolinguistics, and applied linguistics.

What are you going to do with your lucky lottery ticket? That's a question every MBA faces. A lot of time and money has been invested in you, and once you graduate you're supposed to cash that ticket in for as much money and status as you can. Your parents and peers expect it. And you may feel that there's really no other choice. You can't risk wasting that expensive education. It's the safe thing to do. Isn't it? Not necessarily. Mark Albion doesn't pretend to have all the answers, but his unique perspective can help you find yours. There are other ways to look at potential risks and rewards, even when you have thousands of dollars of student loans to pay back. Money is important but it's not the key to fulfilment. The "safe" choice, the most monetarily rewarding one, can carry enormous psychological and spiritual pain. As Ralph Waldo Emerson put it, "Sometimes money costs too

much." In "More Than Money", Albion redefines the typical way the risk/reward equation is written, using his own life story and those of the many entrepreneurs, executives and MBAs he's met as both cautionary and inspirational tales. He introduces a framework of four crucial questions to consider when thinking about your career choices, as well as "lifelines," principles that can help you answer these questions and guide you to construct your personal, strategic destiny plan. A consciousness-raising book as well as a career guide, "More Than Money" encourages MBA students to give themselves permission to be who they really want to be and find their path of service. For, as Albion says, in the end "we won't remember you for the size of your wallet as much as the size of your heart."

February 1862. The Civil War is less than one year old. The fighting has begun in earnest, and the nation has begun to realize it is in for a long, bloody struggle. Meanwhile, President Lincoln’s beloved eleven-year-old son, Willie, lies upstairs in the White House, gravely ill. In a matter of days, despite predictions of a recovery, Willie dies and is laid to rest in a Georgetown cemetery. “My poor boy, he was too good for this earth,” the president says at the time. “God has called him home.” Newspapers report that a grief-stricken Lincoln returns, alone, to the crypt several times to hold his boy’s body. From that seed of historical truth, George Saunders spins an unforgettable story of familial love and loss that breaks free of its realistic, historical framework into a supernatural realm both hilarious and terrifying. Willie Lincoln finds himself in a strange purgatory where ghosts mingle, gripe, commiserate, quarrel, and enact bizarre acts of penance. Within this transitional state—called, in the Tibetan tradition, the bardo—a monumental struggle erupts over young Willie’s soul. Lincoln in the Bardo is an astonishing feat of imagination and a bold step forward from one of the most important and influential writers of his generation. Formally daring, generous in spirit, deeply concerned with matters of the heart, it is a testament to fiction’s ability to speak honestly and powerfully to the things that really matter to us. Saunders has invented a thrilling new form that deploys a kaleidoscopic, theatrical panorama of voices to ask a timeless, profound question: How do we live and love when we know that everything we love must end? “A luminous feat of generosity and humanism.”—Colson Whitehead, *The New York Times Book Review* “A masterpiece.”—Zadie Smith
