The Dalai Lama has said that Tibetans consider themselves “the child of Indian civilization” and that India is the “holy land” from whose sources the Tibetans have built their own civilization. What explains this powerful allegiance to India? In *The Holy Land Reborn*, Toni Huber investigates how Tibetans have maintained a ritual relationship to India, particularly by way of pilgrimage, and what it means for them to consider India as their holy land. Focusing on the Tibetan creation and recreation of India as a destination, a landscape, and a kind of other, in both real and idealized terms, Huber explores how Tibetans have used the idea of India as a religious territory and a sacred geography in the development of their own religion and society. In a timely closing chapter, Huber also takes up the meaning of India for the Tibetans who live in exile in their Buddhist holy land. A major contribution to the study of Buddhism, *The Holy Land Reborn* describes changes in Tibetan constructs of India over the centuries, ultimately challenging largely static views of the sacred geography of Buddhism in India.

Coins have long been a vital part of the discipline of classical studies of the ancient world. However, many scholars have commented that coins have not been adequately integrated into the study of the New Testament. This book provides an interdisciplinary gateway to the study of numismatics for those who are engaged in biblical studies. Wenkel argues that coins from the 1st century were cultural texts with communicative power. He establishes a simple yet comprehensive hermeneutic that defines coins as cultural texts and explains how they might be interpreted today. Once coins are understood to be cultural texts, Wenkel proceeds to explain how these texts can be approached from three angles. First, the world in front of the coin is defined as the audience who initially read and responded to coins as cultural texts. The entire Roman Empire used coins for payment. Second, the world of the coin refers to the coin itself - the combination of inscriptions and images. This combination of inscription and image was used ubiquitously as a tool of propaganda. Third, the world behind the coin refers to the world of power and production behind the coins. This third angle explores the concept of authorship of coins as cultural texts.

During the last twenty years, mutations within agricultural systems in France and Europe have brought on a spectacular worsening of soil erosion and degradation. This volume, contributed to by scientists from 25 countries, discusses how this risk can be evaluated, and which solutions should be adopted without radically disturbing the socio-economic orientation of major agricultural regions. It is an excellent starting point for the development of new research themes, and will be of great value to soil and environmental scientists, and to all those involved in land irrigation and drainage.

"This amply illustrated, attractive book is valuable for dress history scholars . . . [an] ideal textbook for courses on clothing and cultural history." —The Journal of Dress History Ottoman Dress and Design in the West is a richly illustrated exploration of the relationship between West and Near East through the visual culture of dress. Charlotte Jirousek examines the history of dress and fashion in the broader context of western relationships with the Mediterranean world from the dawn of Islam through the end of the twentieth century. The significance of dress is made apparent by the author's careful attention to its political, economic, and cultural context. The reader comes to understand that dress reflects not simply the self and one's relation to community but also that community's relation to a wider world through trade, colonization, religion, and technology. The chapters provide broad historical background on Ottoman influence and European exoticization of that influence, while the captions and illustrations provide detailed studies of illuminations, paintings, and sculptures to show how these influences were absorbed into everyday living. Through the medium of dress, Jirousek details a continually shifting Ottoman frontier that is closely tied to European and American history. In doing so, she explores and celebrates an essential source of influence that for too long has been relegated to the periphery.

The "Vinland Map" first surfaced on the antiquarian market in 1957 and the map's authenticity has been hotly debated ever since—in controversies ranging from the anomalous composition of the ink and the map's lack of provenance to a plethora of historical and cartographical riddles. Maps, Myths, and Men is the first work to address the full range of this debate. Focusing closely on what the map in fact shows, the book contains a critique of the 1965 work The Vinland Map and the

Tartar Relation; scrutinizes the marketing strategies used in 1957; and covers many aspects of the map that demonstrate it is a modern fake, such as literary evidence and several scientific ink analyses performed between 1967 and 2002. The author explains a number of the riddles and provides evidence for both the identity of the mapmaker and the source of the parchment used, and she applies current knowledge of medieval Norse culture and exploration to counter widespread misinformation about Norse voyages to North America and about the Norse world picture.
