In this original, provocative, well-reasoned, and thoroughly documented book, Frank Klaassen proposes that two principal genres of illicit learned magic occur in late medieval manuscripts: image magic, which could be interpreted and justified in scholastic terms, and ritual magic (in its extreme form, overt necromancy), which could not. Image magic tended to be recopied faithfully; ritual magic tended to be adapted and reworked. These two forms of magic did not usually become intermingled in the manuscripts, but were presented separately. While image magic was often copied in the fourteenth and fifteenth centuries, *The Transformations of Magic* demonstrates that interest in it as an independent genre declined precipitously around 1500. Instead, what persisted was the other, more problematic form of magic: ritual magic. Klaassen shows that texts of medieval ritual magic were cherished in the sixteenth century, and writers of new magical treatises, such as Agrippa von Nettesheim and John Dee, were far more deeply indebted to medieval tradition—and specifically to the medieval tradition of ritual magic—than previous scholars have thought them to be.

Underlying the discussion are basic questions about the format of medieval religious experience, ranging from the nature of authority to the relationship between priests and laity, and how far it is actually possible to talk of a monolithic catholicism.

Mining the rich Venetian archives, especially the unusually detailed records of Venice's own branch of the Roman Inquisition, Guido Ruggiero provides a strikingly new and provocative interpretation of the end of the

Renaissance in Italy. In this boldly structured work, he develops five narrative accounts of individual encounters with the Inquisition that illustrate the double-edged metaphor of how passions were both bound by late Renaissance society and were seen in turn as binding people. In this way new perspectives are opened on magic, witchcraft, love, marriage, gender, and discipline at the level of the community and beyond. Witches, courtesans, prostitutes, women healers, nobles, Cardinals, and renegade priests and monks speak from these pages describing their lives, beliefs, hopes, fears, and lies. With an imaginative flair for storytelling and impeccable scholarship, Ruggiero exposes the rich complexity of the culture and poetics of the everyday at the end of the Renaissance and illuminates a previously unexplored chapter in Italian history.

"Two enterprises have proceeded in anthropology since its earliest days. One, objective in its aspirations and inspired by biological disciplines, seeks explanation and is concerned to discover laws and causes. The other, subjective in its orientation and influenced by philosophy, linguistics, and the humanities, attempts interpretation and seeks to elucidate meanings. I take any radical separation of the two to be misguided, for the relationship between them, with all of its difficulty, ambiguity, and tension, is a reflection of, or metaphor for, the condition of a species that lives in terms of meanings in a physical world devoid of intrinsic meaning but subject to causal law. The concept of adaptation when applied to human society must take account of meaning as well as cause, and of the complex dynamic of their relationship." -from the book.

Ephesians: Power and Magic Oxford University Press

This book explores the influence of literacy on eleventh and twelfth-century life and thought on social organization, on the criticism of ritual and symbol, on the rise of empirical attitudes, on the relationship

between language and reality, and on the broad interaction between ideas and society. Medieval and early modern literacy, Brian Stock argues, did not simply supersede oral discourse but created a new type of interdependence between the oral and the written. If, on the surface, medieval culture was largely oral, texts nonetheless emerged as a reference system both for everyday activities and for giving shape to larger vehicles of interpretation. Even when texts were not actually present, people often acted and behaved as if they were. The book uses methods derived from anthropology, from literary theory, and from historical research, and is divided into five chapters. The first treats the growth and shape of medieval literacy itself. The other four look afresh at some of the period's major issues—heresy, reform, the Eucharistic controversy, the thought of Anselm, Abelard, and St. Bernard, together with the interpretation of contemporary experience—in the light of literacy's development. The study concludes that written language was the chief integrating instrument for diverse cultural achievements.

The story of the beliefs and practices called 'magic' starts in ancient Iran, Greece, and Rome, before entering its crucial Christian phase in the Middle Ages. Centering on the Renaissance and Marsilio Ficino - whose work on magic was the most influential account written in premodern times - this groundbreaking book treats magic as a classical tradition with foundations that were distinctly philosophical. Besides Ficino, the premodern story of magic also features Plotinus, Iamblichus, Proclus, Aquinas, Agrippa, Pomponazzi, Porta, Bruno, Campanella, Descartes, Boyle, Leibniz, and Newton, to name only a few of the prominent thinkers discussed in this book. Because pictures play a key role in the story of magic, this book is richly illustrated.
