This book will allow anyone with little botanical knowledge to identify plants that they are most likely to encounter while walking in Victoria's High Country. The guide is written in plain English and includes a glossary of botanical terms. Plants of the Victorian High Country contains species descriptions and photographs of plants to be found along popular walking tracks, such as Harrietville to Mt Feathertop and Mt Hotham. Plants of the montane, sub-alpine and alpine zones are included, sorted into five easily distinguished groups: herbs, daisy herbs, low woody shrubs, tall shrubs and trees, and eucalypts. The guide features straightforward identification keys and clear photos of the leaves, flowers and

stems of the plant. If you are a nature lover, planning to walk in the Victorian High Country, this book is an essential addition to your backpack.

Lavishly illustrated with over 400 color photos taken by the author, the book's format is unique. Each chapter is a new month in the typical blooming "window" of perennials - March through September - beginning with an extensive list of plants divided by blossom color. Using this feature of the book alone, the gardener can plan ahead, orchestrating sequences of color in favorite harmonies throughout the growing season.

Alphabetized entries on each of the blooming candidates make up the bulk of each chapter, with detailed information on the current scientific and common names (plus recent synonyms), hardiness zones and distribution (or origin for introduced hybrids), blossom color and flowering span, and a specific list of commercially available cultivars. Cultural preferences regarding soil, moisture, and light - along with information on insect pests and diseases - are all supplied in one convenient place for superior growing results.

The Alpina name has been intimately associated with BMW for 40 years, and Alpina is probably the most widely and best respected of the German tuning companies. Granted the status of vehicle manufacturer by the German authorities years ago, Alpina continues to stun the automotive world with its superbly re-engineered BMW cars. This book traces the complete story of Alpina from its beginnings in the 1960s right through to 2005. Focusing on the cars, for which it represents both a catalogue and a unique information resource, it also looks at the development of the company and at the individuals behind it.

This book is a quick and easy-to-use reference guide for choosing plant material for landscape designs. This reference manual includes comprehensive lists with search criteria for each of the major plant groups, including trees, shrubs, groundcovers, perennials, vines, grasses, and ferns. These plant groups contain hundreds of specific species, varieties, and cultivars that are readily available in the marketplace from the major production

nurseries. Landscape architects, designers, contractors, or anyone who designs with plants, can easily choose plants that will work on their site. The book is technical enough for the professional, yet simple enough to be used by the layperson. Both botanical and common names are used and an extensive amount of cultural and environmental information is presented. While many other books of this kind give only basic information such as sun/shade, height/width, there are so many as 30 specific categories for each plant group. The categories cover such important criteria as light and soil requirements, zone hardiness, height

and width, pest and disease susceptibility, urban tolerance, and tolerance to salt and drought. The lists also include many criteria often overlooked such as growth rates, overall messiness, root systems, minimal fall clean up, maintenance levels, soil PH and landscape value/use, and many visual characteristics such as texture, foliage color and fall colors, bloom colors and seasons, shapes and forms, attractive bark and foliage and more. There is also a candid Pros & Cons section covering some realistic considerations for each of the plant species groups.
