ARMSTRONG ELAINA

Insurgent Citizenship WHOVPRO

This book is the first of its kind to specifically look at the issues of how disability is culturally placed and contextualized in different societies. Within, it covers a range of professional, inter-professional, and international perspectives of culture and disability. It also begins to look at the cultural considerations when researching culture and disability. These cutting edge chapters written by leading practitioners, researchers, and academics raise questions and provide answers to some of the critical issues around disability and culture. In their writings, they highlight current and seminal work on this topic while providing clarity on the meaning of disability and culture in a way that opens up debate and provides resolution. This book provides a positive outlook on the topic and makes it accessible to not only academics and professionals, but also service users and students alike. The authors throughout this book largely agree that those living with disability need to be provided for in society and that this is achieved through a cultural understanding of disability in society and an understanding of self. The importance of their comments relating to these concepts are to be noted.

Responding to the Educational Needs of Post-school Youth African Minds

Many bacteria, viruses, protozoa, and fungi play key roles in the development of gastrointestinal diseases, and this practical reference brings you up to speed with this increasingly important area. Covering a broad range of GI diseases and cancers, this resource provides an expert overview of the field, ideal for all gastroenterologists and infectious disease physicians. Covers infections associated with gastroesophageal reflux disease and Barrett's esophagus, gallbladder disease, acute pancreatitis, small intestinal bacterial overgrowth, irritable bowel syndrome, inflammatory bowel disease, appendicitis, Whipple Disease, Crohn's Disease, and more. Discusses esophageal cancer, gastric cancer, cholangiocarcinoma, hepatocellular carcinoma, and colorectal cancer. Includes chapters on gut microbiome, fecal transplants, and the molecular pathogenesis of gastrointestinal infections. Consolidates today's available information on this timely topic into a single convenient resource.

Mathematics MIT Press

This publication provides a set of guidelines for health care workers, health information managers and administrators to help them focus on improving the timeliness, accuracy and reliability of health care data. They describe key activities and tasks to be considered when addressing the question of data quality in health care, regardless of the setting or size of organisations.

Through the Eyes of an African Chef Little, Brown

The World Report on Disability suggests more than a billion people totally experience disability. They generally have poorer health, lower education and fewer economic opportunities and higher rates of poverty than people without disabilities. This report provides the best available evidence about what works to overcome barriers to better care and services.

White Paper on Arts, Culture, and Heritage Corwin Press

Offers a detailed account of all the most important aspects of the judiciary in South Africa, both now and in the past. Provides a general survey of the judiciary as an institution.

Long Walk to Freedom Human Sciences Research Council

In recent years, the world has seen unprecedented attention and political commitment to addressing malnutrition. Milestones such as the Scaling Up Nutrition (SUN) Movement, the Lancet Maternal and Child Nutrition Series, and the Second International Conference on Nutrition (ICN2) have marked the rapid rise of nutrition on the global policy and research agenda. These developments reverse years of relative neglect for nutrition. Undernutrition is a global challenge with huge social and economic costs. It kills millions of young children annually, stunts growth, erodes child development, reduces the amount of schooling children attain, and increases the likelihood of their being poor as adults, if they survive. Stunting persists through a lifetime and beyond—underweight mothers are more likely to give birth to underweight children, perpetuating undernutrition across generations. Undernutrition reduces global gross domestic product by US\$1.4–\$2.1 trillion a year—the size of the total economy of Africa south of the Sahara.

National Strategy on Screening, Identification, Assessment and Support OECD Publishing

The research reflected in this volume indicates that in South Africa there are almost three million youth between the ages of 18 and 24 who are not in education, training or employment - a situation which points not only to a grave wastage of talent, but also to the possibility of serious social disruption. The authors in this work paint a picture of the enormous reservoir of human talent which exists in the country, but is not provided with the means to develop. Responding to the Educational Needs of Post-School Youth attempts not only to sketch the scope and extent of the current post-school educational crisis, but also to explore possible solutions through collaboration in the higher education sector. The findings reported here are a result of three distinctive but linked research components conducted by the Further Education and Training Institute (University of Western Cape), the Centre for Higher Education Transformation, and the Southern Africa Labour and Development Research Unit (University of Cape Town). The research was funded by the Ford Foundation and the project conducted in consultation with the Department of Education.

Draft Annual Report African Minds

Insurgent citizenships have arisen in cities around the world. This book examines the insurgence of democratic citizenship in the urban peripheries of São Paulo, Brazil, its entanglement with entrenched systems of inequality, and its contradiction in violence. James Holston argues that for two centuries Brazilians have practiced a type of citizenship all too common among nation-states--one that is universally inclusive in national membership and massively inegalitarian in distributing rights and in its legalization of social differences. But since the 1970s, he shows, residents of Brazil's urban peripheries have formulated a new citizenship that is destabilizing the old. Their mobilizations have developed not primarily through struggles of labor but through those of the city--particularly illegal residence, house building, and land conflict. Yet precisely as Brazilians democratized urban space and achieved political democracy, violence, injustice, and impunity increased dramatically. Based on comparative, ethnographic, and historical research, Insurgent Citizenship reveals why the insurgent and the entrenched remain dangerously conjoined as new kinds of citizens expand democracy even as new forms of violence and exclusion erode it. Rather than view this paradox as evidence of democratic failure and urban chaos, Insurgent Citizenship argues that contradictory realizations of citizenship characterize all democracies--emerging and established. Focusing on

processes of city- and citizen-making now prevalent globally, it develops new approaches for understanding the contemporary course of democratic citizenship in societies of vastly different cultures and histories.

Muslims in Seychelles Elsevier Health Sciences

This book explores the complexities of curriculum studies by taking into account African perspectives of curriculum theory, curriculum theorising and the theoriser. It provides alternative pathways to the curriculum discourse in Africa by breaking traditions and experimenting on alternative approaches.

Apartheid Springer Nature

Why solving ongoing problems with the NQF (National Qualifications Framework) matters -- The challenges unemployment imposes on youth -- The challenge of youth-to-work transitions: an international perspective -- A statistical overview of further education and training colleges -- Strengthening the capacity of FET Colleges to meet the needs of young people -- Higher education and an expanded post-school educational system -- Trends in training in South Africa -- Key issues in the assessment of South Africa's national skills development strategy -- Opening the doors of learning? Viewing the post-school education and training landscape from a youth perspective.

Getting Skills Right: Future-Ready Adult Learning Systems Common Ground Publishing

Evidence-based best practices that improve classroom environments and assessment techniques! If your goal is a smoother-running, participatory classroom and improved student achievement, you'll find essential best practices in this new resource. Robert Slavin, Professor and Chairman of the Success for All Foundation, has gathered insights and findings from more than 25 leading education researchers, presented in succinct chapters focused on key aspects of teaching and classroom management practice. Readers will find: Strategies for assessment that address use of formative approaches, adaptation for differentiation and the Common Core, and more Proven techniques for classroom management, including immediate positive steps that teachers can take User-friendly content supported by quick-read charts and graphs

Opening Up Education DIANE Publishing

With digitalisation, deepening globalisation and population ageing, the world of work is changing. The extent to which individuals, firms and economies can harness the benefits of these changes critically depends on the readiness of adult learning systems to help people develop relevant skills

Nourishing millions: Stories of change in nutrition: Synopsis Princeton University Press

The book that inspired the major new motion picture Mandela: Long Walk to Freedom. Nelson Mandela is one of the great moral and political leaders of our time: an international hero whose lifelong dedication to the fight against racial oppression in South Africa won him the Nobel Peace Prize and the presidency of his country. Since his triumphant release in 1990 from more than a quarter-century of imprisonment, Mandela has been at the center of the most compelling and inspiring political drama in the world. As president of the African National Congress and head of South Africa's anti-apartheid movement, he was instrumental in moving the nation toward multiracial government and majority rule. He is revered everywhere as a vital force in the fight for human rights and racial equality. LONG WALK TO FREEDOM is his moving and exhilarating autobiography, destined to take its place among the finest memoirs of history's greatest figures. Here for the first time, Nelson Rolihlahla Mandela tells the extraordinary story of his life--an epic of struggle, setback, renewed hope, and ultimate triumph.

Democratic Local Government BRILL

Public Audit (Wales) Act 2004, written by HM Government describes about an Act to confer further functions on the Auditor General for Wales; to make provision about the audit of accounts of public bodies in Wales and related matters.

Student Retention & Graduate Destination Juta and Company Ltd

Student attrition has been a perennial theme in South African higher education throughout the decade. In its National Plan for Higher Education (2001), the Department of Education attributed high dropout rates primarily to financial and/or academic exclusions. Four years later, it reported that 30% of students dropped out in their first year of study and a further 20% during their second and third years. Against this backdrop, the erstwhile research programme on Human Resources Development initiated a research project to investigate more thoroughly why students dropped out, what led them to persist in higher education to graduation, and what made for a successful transition to the labour market. The chapters in this volume address these issues in relation to one or more of seven institutional case studies conducted in 2005.

Land Redistribution for Agricultural Development Taylor & Francis

Experts discuss the potential for open education tools, resources, and knowledge to transform the economics and ecology of education. Given the abundance of open education initiatives that aim to make educational assets freely available online, the time seems ripe to explore the potential of open education to transform the economics and ecology of education. Despite the diversity of tools and resources already available—from well-packaged course materials to simple games, for students, self-learners, faculty, and educational institutions—we have yet to take full advantage of shared knowledge about how these are being used, what local innovations are emerging, and how to learn from and build on the experiences of others. Opening Up Education argues that we must develop not only the technical capability but also the intellectual capacity for transforming tacit pedagogical knowledge into commonly usable and visible knowledge: by providing incentives for faculty to use (and contribute to) open education goods, and by looking beyond institutional boundaries to connect a variety of settings and open source entrepreneurs. These essays by leaders in open education describe successes, challenges, and opportunities they have found in a range of open education initiatives. They approach—from both macro and micro perspectives—the central question of how open education tools, resources, and knowledge can improve the quality of education. The contributors (from leading foundations, academic institutions, associations, and projects) discuss the strategic underpinnings of their efforts first in terms of technology, then content, and finally knowledge. They also address the impact of their projects, and how close they come to achieving a vision of sustainable, transformative educational opportunities that amounts to much more than pervasive technology. Through the support of the Carnegie Foundation for the Advancement of Teaching, an electronic version of this book is openly available under a Creative Commons license at The MIT Press Web site, <http://mitpress.mit.edu>. The Judiciary in South Africa Intl Food Policy Res Inst

Originally published in 1968, this volume traces the history and growth of Apartheid in South Africa. The acts which enforced Apartheid – the Group Areas Act, Population and Registration Act are given in full. The book also includes documents which reflected reaction to these measures: Parliamentary debates, newspaper reports and policy statements by the leading political parties and religious denominations. The documents are headed by a full historical and analytical introduction.

Shaping the Future of South Africa's Youth

The book documents the history of the prevention-of-mother-to-child transmission of HIV (PMTCT) program in Guyana, as well as the impact of HIV on pregnant and postpartum women's adherence to

antiretroviral therapy (ART). The book shows research work by reviewing the literature to investigate relevant adherence studies, presenting in-depth interviews on adherence perspectives of clinic patients and healthcare providers, and a cross-sectional descriptive study of pregnant women that investigated general adherence to pregnancy-related behaviours and ART, and the efficacy of a theoretical model (Health Belief Model) to understand and predict ART adherence within this group. Author discusses the factors affecting ART adherence among pregnant and postpartum women, since existing studies may not account for cultural and other local variations. The findings provide insight into the local situation, and will also inform policy and practice in Guyana, and the wider Caribbean Community (CARICOM).

Improving Data Quality

This food-lover's delight presents exciting, innovative recipes from a well-known figure in the culinary world. Enjoy uniquely presented traditional African cuisine with international flair, all tied together by the common element of ingredients that are organic, natural and sustainable. Elegantly produced with full colour photographs throughout.
