Was ist Philosophie im Mittelalter? Qu'est-ce que la philosophie au moyen âge? What is Philosophy in the Middle Ages? BRILL

The series MISCELLANEA MEDIAEVALIA was founded by Paul Wilpert in 1962 and since then has presented research from the Thomas Institute of the University of Cologne. The cornerstone of the series is provided by the proceedings of the biennial Cologne Medieval Studies Conferences, which were established over 50 years ago by Josef Koch, the founding director of the Institute. The interdisciplinary nature of these conferences is reflected in the proceedings. The MISCELLANEA MEDIAEVALIA gather together papers from all disciplines represented in Medieval Studies - medieval history, philosophy, theology, together with art and literature, all contribute to an overall perspective of the Middle Ages.

Annual Report TESSLOFF Verlag

English summary: This book aims at a comprehensive understanding of diverging urban rejuvenation practices and gentrification processes in New York City, Berlin and Vienna. Regulative and supportive mechanisms at policy and planning level have been identified through a comparative analysis of urban rejuvenation policies and actors' embeddedness. Those mechanisms enable the development of contextualised parameters that support projection attempts of future gentrification processes at the neighbourhood level. As a result, a reflective understanding of gentrification and policy recommendations are drawn at a general level. The recommendations refer to the political understanding of gentrification and its role in urban development. This analysis argues that cities should include gentrification as a driving force in urban policies. However, processes of gentrification require mediation and monitoring by public authorities who should be aware of the risk of social fragmentation. As a consequence, cities should move towards a social entrepreneurial city that moves beyond the simple distribution of financial resources and responsibilities and ensures social responsibility within the force field of ongoing neoliberal forces. German description: Diese Publikation zielt auf ein umfassendes Verständnis unterschiedlicher Stadterneuerungspraktiken, die sich auf die Erhaltung der baulichen Substanz beziehen, sowie Gentrification-Prozesse in New York City, Berlin und Wien ab. Dabei wird eine vergleichende Analyse von politischen Strategien und involvierten Akteuren angewendet, um regulierende und unterstützende Mechanismen auf der politischen und stadtplanerischen Ebene zu identifizieren. Diese Mechanismen ermöglichen die Entwicklung von kontextualisierten Parametern. Als Ergebnis dienen eine reflektierte Betrachtung von Gentrification und Empfehlungen, die auf einer stadübergreifenden Ebene Entwicklungsleitlinien für den politischen Umgang mit Gentrification und dessen Rolle in der Stadtentwicklung aufzeigen.

Interdisciplinary essays on early modern Germany that address orthodoxy and its challenges in religion, politics, and the arts. Confronting the transformation of normative canons after the

Reformation, the essays investigate authority and knowledge in an era of shifting cultural foundations.

[Orthodoxies and Heterodoxies in Early Modern German Culture](#) TESSLOFF Verlag

Since the early transformation of European music practice and theory in the cultural centers of Asia, Latin America, and Africa around 1900, it has become necessary for music history to be conceived globally - a challenge that musicology has hardly faced yet. This book discusses the effects of cultural globalization on processes of composition and distribution of art music in the 20th and 21st century. Christian Utz provides the foundations of a global music historiography, building on new models such as transnationalism, entangled histories, and reflexive globalization. The relationship between music and broader changes in society forms the central focus and is treated as a pivotal music-historical dynamic.

In the seventeenth and eighteenth centuries, the cantors of the St. Thomas School and Church in Leipzig could be counted among the most significant German composers of their times. But what attracted these artists - from Seth Calvisius to J.S. Bach to Johann Adam Hiller - to the music school and choir and inspired them to explore new repertoire of the highest standing? And how did the cantors influence the musical profile of the school - a profile that often became a bone of contention between school and city hall? The success of the St. Thomas School was not a foregone conclusion; its history is replete with challenges and setbacks as well as triumphs. The school was caught between the conflicting interests of enthusiastic mayors and townspeople, who wanted to showcase the city's musical culture, and opposing parties, including jealous rectors and elitist sponsors, who argued for the traditional subordination of the cantorate to the school system. Drawing on many new, recently discovered sources, Michael Maul explores the phenomenon of the St Thomas School. He shows how cantors, local luminaries and municipal politicians overcame the School's detractors to make it a remarkable success, with a world-famous choir. Illuminating the social and political history of the cantorate and the musical life of an important German city, the book will be of interest to scholars of Baroque music and J.S. Bach, cultural historians, choral directors, and musicologists and performers studying historical performance practice. MICHAEL MAUL is Senior Scholar at the Bach-Archiv Leipzig and lecturer in musicology at the universities of Leipzig/Halle. He is also the artistic director of the annual Leipzig Bach Festival.

The Music of Herbert Howells Oxford University Press

This book explains how to unlock unlimited personal creativity and to create a culture that supports emotional health, inventiveness, and success through a comprehensive examination of creative thinking that integrates theoretical, scientific, psychological, and sociological perspectives. How do we teach innovative thinking and stimulate creativity? Creative thinking is a highly desirable trait in today's world, where creativity lends the mental fitness and flexibility necessary to switch easily between patterns of thinking and contend with the constant changes that result from ongoing technological advancements. Yet research shows that the national level of creativity in both children and adults is declining. This book showcases methods that build "outside of the box" thinking skills that can empower people to succeed not only in school or work but in life in general, resulting in greater self-esteem, reduced stress, increased productivity, improved overall health, and more satisfaction in everyday life. Brainstorm! Practice for Unrestricted Imagination and Original Thought shows, with scientific proof, that the powerful engine of creativity has unlimited fuel and can power every sphere of life, from food preparation to personal relationships and from academia to government administration. It is a manual for leveraging creative thought in order to overcome barriers, solve difficult problems, and streamline and optimize day-to-day living. Educators, institutional leaders, and CEOs will discover how creativity-boosting courses and trainings can promote unprecedented performance and productivity among students and employees. Based on extensive research data and more than 100 interviews with experts worldwide, this accessible and engaging book presents vivid analogies and metaphors; insights from experts in various fields ranging from education to neurology, music, and technology; and fun exercises that make it clear that creativity is indispensable in every realm of life—and that anyone can take simple, effective steps to tap into their own creative potential.

Music, Piety, and Propaganda: The Soundscapes of Counter-Reformation Bavaria explores the nature of sound as a powerful yet ambivalent force in the religious struggles that permeated Germany during the Counter-Reformation. Author Alexander J. Fisher goes beyond a musicological treatment of composers, styles, and genres to examine how music, and more broadly sound itself, shaped the aural landscape of Bavaria as the duchy emerged as a militant Catholic bulwark. Fisher focuses particularly on the ways in which sound—including bell-ringing, gunfire, and popular song, as well as cultivated polyphony—not only was deployed by Catholic secular and clerical elites to shape the religious identities of Bavarian subjects, but also carried the potential to challenge and undermine confessional boundaries. Surviving literature, archival documents, and music illustrate the ways in which Bavarian authorities and their allies in the Catholic clergy and orders deployed sound to underline crucial theological differences with their Protestant antagonists, notably the cults of the Virgin Mary, the Eucharist, and the saints. Official and popular rituals like divine worship, processions, and pilgrimages all featured distinctive sounds and music that shaped and reflected an emerging Catholic identity. Although officials imposed a severe regime of religious surveillance, the Catholic state's dominance of the soundscape was hardly assured. Fisher traces archival sources that show the resilience of Protestant vernacular song in Bavaria, the dissemination and performance of forbidden, anti-Catholic songs, the presence of Lutheran chorales in nominally Catholic church services into the late 16th century, and the persistence of popular "noise" more generally. Music, Piety, and Propaganda thus reveals historical, theological, and cultural issues of the period through the piercing dimension of its sounds, bringing into focus the import of sound as a strategic cultural tool with significant impact on the flow of history.

Kerstin von Lingen shows how Nazi SS-General Karl Wolff avoided war crimes prosecution because of his role in "Operation Sunrise," negotiations conducted by high-ranking American, Swiss, and British officials - in violation of the Casablanca agreements with the Soviet Union - for the surrender of German forces in Italy. Von Lingen suggests that the Cold War started already with "Operation Sunrise," and helps us understand rollback operations thereafter: one was the failure of justice and selective prosecution for high ranking Nazi criminals. The Western Allies not only failed to ensure cooperation between their respective national war crimes prosecution organizations, but in certain cases even obstructed justice by withholding evidence from the prosecution.

Georg Philipp Telemann gave us one of the richest legacies of instrumental music from the eighteenth century. Though considered a definitive contribution to the genre during his lifetime, his concertos, sonatas, and suites were then virtually ignored for nearly two centuries following his death. Yet these works are now among the most popular in the baroque repertory. In *Music for a Mixed Taste*, Steven Zohn considers Telemann's music from stylistic, generic, and cultural perspectives. He investigates the composer's cosmopolitan "mixed taste"—a blending of the French, Italian, English, and Polish national styles—and his imaginative expansion of this concept to embrace mixtures of the old (late baroque) and new (galant) styles. Telemann had an equally remarkable penchant for generic amalgamation, exemplified by his pioneering role in developing hybrid types such as the sonata in concerto style ("Sonate auf Concertenart") and overture-suite with solo instrument ("Concert en ouverture"). Zohn examines the extramusical meanings of Telemann's "characteristic" overture-suites, which bear descriptive texts associating them with literature, medicine, politics, religion, and the natural world, and which acted as vehicles for the composer's keen sense of musical humor. Zohn then explores Telemann's unprecedented self-publishing

enterprise at Hamburg, and sheds light on the previously unrecognized borrowing by J.S. Bach from a Telemann concerto. *Music for a Mixed Taste* further reveals how Telemann's style polonaise generates musical and social meanings through the timeless oppositions of Orient-Occident, urban-rural, and serious-comic.

Here is the answer for anyone who comes across a foreign-language quotation in a newspaper article or a book and isn't quite sure what it means. Here are famous sayings, in five European languages--Latin, French, German, Italian, and Spanish--accompanied by their translations into English and cross-indexed for easy reference. Just what did Mussolini say about making the trains run on time? Did Marie-Antoinette really tell the poor to eat cake? *Concise Dictionary of Foreign Quotations* includes more than 3,000 entries, chosen by five editors, each one widely read in the language concerned. The majority of entries were included because they are familiar, those an English reader would be most likely to encounter. Literary quotations, political quotations, poetic thoughts, pungent comments, polished epigrams, shrewd perceptions--by everyone from Cicero to Sartre, from Michelangelo to Picasso.

Even prior to her widely observed 500th anniversary, Teresa of Ávila (1515-1582) was already considered one of the most important authors of occidental mysticism. This volume gathers together contributions from a multitude of disciplines to explore the writings and reception of the Spanish author and saint.

Previously disregarded lines of tradition are explored for a new understanding of her oeuvre, which is examined here with special regard to the potential to affect its readers. Teresa proves to not only be an accomplished, but also a very literary writer. Santa Teresa proves to be a figure of cultural memory, and the diffusion of her thinking is traced up to the present, whereby a recurrent focus is put on the phenomenon of ecstasy. Part of the widespread resonance of her work is the image of the iconic saint whose emergence as an international phenomenon is presented here for the first time. The volume is closed by an interview with Marina Abramovi answering four questions about Teresa.

Brainstorm! TESSLOFF Verlag

In 1932 there appeared the work of SCHMORL and JUNGHANNS, *Die gesunde und kranke Wirbelsäule im Röntgenbild*, which laid the foundations of diagnostic radiology of the spine. Since that time the discipline has been extended and refined in a systematic manner and our knowledge has been greatly enriched by the large number of monographs in which leading experts have assembled additional data. An encyclopedic treatment of all that is currently known requires not only that reference be made to all work published since 1932 in order to reveal the problems that remain but also that a serious attempt be made to contribute to the solution of such problems. For this reason, Professor TONDURY and Professor THEILER of Zurich, who know more than anyone else about the ontogeny of the spine, have been invited to display their erudition in this field. Should contra dictions or

divergent opinions on certain points be revealed through this confrontation with radiologically obtained findings, so much the better; the effect of this could only be to spur workers in both disciplines on to more advanced research. We have only to recall how in Goethe's time the premaxilla was still the subject of controversy, yet this great man pursuing his studies in comparative anatomy and anthropology was able to prove its existence beyond all doubt. Mainz, May 1974 L. DIETHELM

This volume draws together a collection of Robin A. Leaver's essays on Bach's sacred music, exploring the religious aspects of this repertoire through consideration of three core themes: liturgy, hymnology, and theology. Rooted in a rich understanding of the historical sources, the book illuminates the varied ways in which Bach's sacred music was informed and shaped by the religious, ritual, and intellectual contexts of his time, placing these works in the wider history of Protestant church music during the Baroque era. Including research from across a span of forty years, the chapters in this volume have been significantly revised and expanded for this publication, with several pieces appearing in English for the first time. Together, they offer an essential compendium of the work of a leading scholar of theological Bach studies.
