Go from the initial idea to a production-deployed web app using Django 2.0. Key Features A beginners guide to learning python's most popular framework, Django Build fully featured web projects in Django 2.0 through examples. Deploy web applications in quick and reliable fashion with Docker Book Description This project-based guide will give you a sound understanding of Django 2.0 through three full-featured applications. It starts off by building a basic IMDB clone and adding users who can register, vote on their favorite movies, and upload associated pictures. You will learn how to use the votes that your users have cast to build a list of the top 10 movies. This book will also take you through deploying your app into a production environment using Docker containers hosted on the server in Amazon's Electric Computing Cloud (EC2). Next, you're going to build a Stack Overflow clone wherein registered users can ask and answer questions. You will learn how to enable a user asking a question to accept answers and mark them as useful. You will also learn how to add search functionality to help users find questions by using Elasticsearch. You'll discover ways to apply the principles of 12 factor apps while deploying Django on the most popular web server, Apache, with mod_wsgi. Lastly, you'll build a clone of MailChimp so users can send and create emails, and deploy it using AWS. Get set to take your basic Python skills to the next level with this comprehensive guide! What you will learn 1. Build new projects from scratch using Django 2.0 2. Provide full-text searching using Elasticsearch and Django 2.0 3. Learn Django 2.0 security best practices and how they're applied 4. Deploy a full Django 2.0 app almost anywhere with mod_wsgi 5. Deploy a full Django 2.0 app to AWS's PaaS Elastic Beanstalk 6. Deploy a full Django 2.0 app with Docker 7. Deploy a full Django 2.0 app with NGINX and uWSGI Who this book is for If you have some basic knowledge of HTML, CSS, and Python and want to build fully-featured and secure applications using Django, then this book is for you.

The march of the Android-based tablets has begun, including Galaxy Samsung Tab, Motorola XOOM, Nook and more. But where do you start? And what can you do with an Android tablet? Taking Your Android Tablets to the Max is a one-stop shop for users of all skill levels, helping you get the most out of any Android tablet. This book offers: A breakdown of the differences between an Android 2.0+

or an Android 3.0 device Tips for choosing the best device for you and how to best network (i.e., best wireless carrier for 3G or 4G or just WIFI) Detailed walkthroughs on how to get the most out of your tablet and the apps for it

Marketing Research Routledge

This encyclopedia aims to offer researchers an indication of the breadth and importance of information systems in education, including the way IT is being used, and could be used to enable learning and teaching. The encyclopedia covers all aspects of the interaction between education and information technologies, including IT in kindergartens, primary and secondary schools, universities, training colleges, industry training, distance education and further education. It also covers teaching and computing, the use of IT in many different subject areas, the use of IT in educational administration, and national policies of IT and education.

Using Social Media in the Classroom Springer

The two volumes IFIP AICT 551 and 552 constitute the refereed proceedings of the 15th IFIP WG 9.4 International Conference on Social Implications of Computers in Developing Countries, ICT4D 2019, held in Dar es Salaam, Tanzania, in May 2019. The 97 revised full papers and 2 short papers presented were carefully reviewed and selected from 185 submissions. The papers present a wide range of perspectives and disciplines including (but not limited to) public administration, entrepreneurship, business administration, information technology for development, information management systems, organization studies, philosophy, and management. They are organized in the following topical sections: communities, ICT-enabled networks, and development; digital platforms for development; ICT for displaced population and refugees. How it helps? How it hurts?; ICT4D for the indigenous, by the indigenous and of the indigenous; local technical papers; pushing the boundaries - new research methods, theory and philosophy in ICT4D; southern-driven human-computer interaction; sustainable ICT, informatics, education and learning in a turbulent world - "doing the safari way".

Django 2 by Example SAGE

This book examines the phenomenon of prime time soap operas on Indian television. An anthropological insight into social issues and practices of contemporary India through the television, this volume analyzes the production of soaps within India's cultural fabric. It deconstructs themes and issues surrounding the "everyday" and the "middle class" through the fiction of the "popular". In its second edition, this still remains the only book to examine prime time soap operas on Indian

television. Without in any way changing the central arguments of the first edition, it adds an essential introductory chapter tracking the tectonic shifts in the Indian "mediascape" over the past decade – including how the explosion of regional language channels and an era of multiple screens have changed soap viewing forever. Meticulously researched and persuasively argued, the book traces how prime time soaps in India still grab the maximum eyeballs and remain the biggest earners for TV channels. The book will be of interest to students of anthropology and sociology, media and cultural studies, visual culture studies, gender and family studies, and also Asian studies in general. It is also an important resource for media producers, both in content production and television channels, as well as for the general reader.

Taking Your Android Tablets to the Max UNESCO Publishing

'Internet Communication and Qualitative Research is a trailblazing introduction to data sources that will come to the fore in the new millennium. Its cogent discussion of the techniques, ethics and methods of analysis of Internet data should be read by every qualitative researcher' - David Silverman, Goldsmiths College 'The internet is exploding with possibilities for conducting social research. Mann and Stewart offer the first in-depth consideration of the prospects and potentials for doing qualitative research on-line. This wide ranging, clearly-written book is essential reading for researchers working at the cutting edge of qualitative methodology' - James A. Holstein, Marquette University 'This is e-scholarship. The book is a transformative project which brings the best skills of the old print scholarship to the cyberworld. The authors are no mere theoreticians - but hands-on net-users, who have made the imaginative leap to the dot.com world, and who have mapped the way for net research and researchers. The authors are pioneers in the realm of digit-crit - opening the way with their critical evaluation of the digital media and net research. They profile the skills required by the online researcher and evaluate the context in which they are used - in relation to privacy, security, ethics and legal considerations. They also take up issues of power; they explore the social and political implications of the digital media, (with specific reference to gender) and the role of the online researcher. An absolute must for cybercitizens and an indispensable guide for students, researchers, and knowledge workers in the dot.com world' - Dale Spender 'Mann and Stewart have prized open the mysteries of on-line qualitative research. For those new to this methodology the technology review demystifies; the social science research ethics issues are re-addressed with reference to the on-line situation; methods of conducting online focus groups and interviews, in particular, are detailed. The tone is both analytical and practical with a host of techniques suggested. I recommend this accessible text for all qualitative researchers, both academic and practitioner' - Rehan Ul-Haq, University of Birmingham Business School 'Here is the clear, useful guide to the Internet research needed by all of us interested in on-line relationships and research. The authors address such issues as ethics, confidentiality, the theory and practice of on-line research, and on-line power relationships (which will be of concern in distance learning plans and programs). A very valuable book.' - Cheris Kramarae, Center for the Study of Women in Society, University of Oregon 'Wonderful - "beyond the software" and into on-line interaction to aid and abet our qualitative research. This book shines the light. Mann and Stewart are to be congratulated in offering qualitative researchers effective and authentic ways forward through electronic communication. I'll use and recommend it!' - Gilly Salmon, Centre for Information and Innovation,

Open University Business School 'Opens to view a whole new avenue for social research. Internet communication is the wave of the future. Mann and Stewart capture its potential with insight, caution, and consummate procedural skill. Pathbreaking in its area of research methodology! Students and researchers will be very pleased with its clarity and usefulness' - Jaber F Gubrium, Department of Sociology, University of Florida 'The authors have produced a timely and stimulating publication with handy explanations of Internet terms and qualitative research applications. This work should be made readily available not only for reference to academics and practitioners of marketing, but also to those with a lay interest in it' - Professor Len Tiu Wright, De Montfort University 'Internet Communication and Qualitative Research is the first textbook to examine the impact of Internet technology on qualitative research methods. Drawing on many pioneering studies using computer-mediated communication (CMC), the authors show how online researchers can employ Internet-based qualitative methods to collect rich, descriptive, contextually-situated data. They discuss the methodological, practical and theoretical considerations associated with such methods as: in-depth online interviewing, virtual focus groups, participant observation in virtual communities. This is a comprehensive and practical guide that: - reviews online research practice and basic Internet technology - looks in detail at the skills required by the online researcher - examines the ethical, confidentiality, security and legal issues involved in online research - considers the theoretical challenges surrounding data collected in a 'virtual venue' - addresses the social and cultural impact of researching online through a discussion of power, gender and identity issues in the virtual world. Internet Communication and Qualitative Research will be an indispensable guide for all students and researchers working in the digital age.

Innovative Technologies and Learning Springer

Services Management: An Integrated Approach 2/e The book provides a comprehensive insight into the service management industry and its importance in today's economies. The book is based on three central strands of services management: customers, employees and operations. The final part of the book addresses the issue of performance management and service strategy. *Services Management* second edition is ideal for Service Management students within a Business or Tourism degree, but also of great interest to operations, management, marketing and general business students. *Essence of Business Process Re-Engineering* 1/e A concise, usable guide to re-engineering business processes for competitive advantage, this quick guide goes beyond the hype to demonstrate exactly what business process re-engineering (BPR) is all about, and what it can and cannot accomplish. Readers will learn how and where to begin the BPR process and the do's and don'ts for making sure that BPR really pays off.

Digital Disruption Financial Times/Prentice Hall

Explorations of science, technology, and innovation in Africa not as the product of "technology transfer" from elsewhere but as the working of African knowledge. In the STI literature, Africa has often been regarded as a recipient of science, technology, and innovation rather than a maker of them. In this book, scholars from a range of disciplines show that STI in Africa is not merely the product of "technology transfer" from elsewhere but the working of African knowledge. Their contributions focus on African ways of looking, meaning-making, and creating. The chapter authors see Africans as intellectual agents whose perspectives constitute authoritative knowledge and

whose strategic deployment of both endogenous and inbound things represents an African-centered notion of STI. "Things do not (always) mean the same from everywhere," observes Clapperton Chakanetsa Mavhunga, the volume's editor. Western, colonialist definitions of STI are not universalizable. The contributors discuss topics that include the trivialization of indigenous knowledge under colonialism; the creative labor of chimurenga, the transformation of everyday surroundings into military infrastructure; the role of enslaved Africans in America as innovators and synthesizers; the African ethos of "fixing"; the constitutive appropriation that makes mobile technologies African; and an African innovation strategy that builds on domestic capacities. The contributions describe an Africa that is creative, technological, and scientific, showing that African STI is the latest iteration of a long process of accumulative, multicultural knowledge production. Contributors Geri Augusto, Shadreck Chirikure, Chux Daniels, Ron Eglash, Ellen Foster, Garrick E. Louis, D. A. Masolo, Clapperton Chakanetsa Mavhunga, Neda Nazemi, Toluwalo Odumosu, Katrien Pype, Scott Remer

India Reloaded Springer

Thinking German Translation is a comprehensive practical course in translation for advanced undergraduate students of German and postgraduate students embarking on Master's translation programmes. Now in its third edition, this course focuses on translation as a decision-making process, covering all stages of the translation process from research, to the 'rewriting' of the source text in the language of translation, to the final revision process. This third edition brings the course up to date, referencing relevant research sources in Translation Studies and technological developments as appropriate, and balancing the coverage of subject matter with examples and varied exercises in a wide range of genres from both literary and specialised material. All chapters from the second edition have been extensively revised and, in many cases, restructured; new chapters have been added—literary translation; research and resources—as well as suggestions for further reading. Offering around 50 practical exercises, the course features material from a wide range of sources, including: business, economics and politics advertising, marketing and consumer texts tourism science and engineering modern literary texts and popular song the literary canon, including poetry A variety of translation issues are addressed, among them cultural differences, genre conventions, the difficult concept of equivalence, as well as some of the key differences between English and German linguistic and textual features. Thinking German Translation is essential reading for all students seriously interested in improving their translation skills. It is also an excellent foundation for those considering a career in translation. A Tutor's Handbook offers comments and notes on the exercises for each chapter, including not only translations but also a range of other tasks, as well as some specimen answers. It is available to download from www.routledge.com/9781138920989.

Information and Communication Technologies for Development. Strengthening Southern-Driven Cooperation as a Catalyst for ICT4D Amazon Publishing

This highly anticipated print collection gathers articles published in the much-loved International Journal of Proof-of-Concept or Get The Fuck Out. PoC||GTFO follows in the tradition of Phrack and Uninformed by publishing on the subjects of offensive security research, reverse engineering, and file format internals. Until now, the journal has only been available online or printed and distributed

for free at hacker conferences worldwide. Consistent with the journal's quirky, biblical style, this book comes with all the trimmings: a leatherette cover, ribbon bookmark, bible paper, and gilt-edged pages. The book features more than 80 technical essays from numerous famous hackers, authors of classics like "Reliable Code Execution on a Tamagotchi," "ELFs are Dorky, Elves are Cool," "Burning a Phone," "Forget Not the Humble Timing Attack," and "A Sermon on Hacker Privilege." Twenty-four full-color pages by Ange Albertini illustrate many of the clever tricks described in the text.

Strategies for Doubling the Farmers' Income "O'Reilly Media, Inc."

Introduction to Sociology 3e aligns to the topics and objectives of many introductory sociology courses. It is arranged in a manner that provides foundational sociological theories and contexts, then progresses through various aspects of human and societal interactions. The new edition is focused on driving meaningful and memorable learning experiences related to critical thinking about society and culture. The text includes comprehensive coverage of core concepts, discussions and data relevant to a diverse audience, and features that draw learners into the discipline in powerful and personal ways. Overall, Introduction to Sociology 3e aims to center the course and discipline as crucial elements for understanding relationships, society, and civic engagement; the authors seek to lay the foundation for students to apply what they learn throughout their lives and careers.

Encyclopedia of Education and Information Technologies Springer

The digital world is omnipresent. The rise of the Internet, smartphones, video games, and dating apps have provided people with more information, entertainment, and communication than ever before. While technology continues to develop at breakneck speed, its results are not always positive. Addiction to the tech world has resulted in serious mental health problems, overuse injuries, privacy challenges, and worry on the part of parents and other adults about its long-term effects. With the aid of media literacy questions and terms, this collection of thought-provoking and educational New York Times articles helps readers take a critical look at the tech phenomenon.

Mobile technologies have been used in higher education for many years. They provide good solutions for teaching and learning and make learning available anywhere and anytime. This book includes six sections: design, development, adoption, collaboration, evaluation and future of mobile teaching and learning technology in higher education. It includes different projects and practices in higher education across different countries. The book provides in-depth background information and cases studies in high technology teaching and learning and future expectations for new technology in higher education. The variety of projects and programs running in different country helps boost innovation and discussion in future projects and practices. It also provide guidelines for future design and development of mobile applications for higher education.

Bihar Diaries No Starch Press

Professor Brill de Ramirez's book 10 Strategies for Your Success in College provides 10 essential tips that will help college students succeed and high school students prepare for success in college. Readers will learn about the importance of relationships, collaborations, teamwork, and strong networks for success in college, career, and life. Each chapter includes specific guidance to help students make smart choices, hyperlinks to important resources to help students be more informed,

and a list of key chapter take-aways as the end of each chapter and a list of the 10 Strategies at the end of the book. Most important for readers is the vital fact that each student matters. Every person matters. Each person, YOU, can potentially contribute to the world in big ways. In order to do this, students need to discover and act upon the following: * Who you are and what your strengths are, * What you are interested in and what you want to see materialize in your life and career, * And what difference you want to make in the world. No matter where you are right now, if you use this book as a guidepost for your academic, career, and life success, you will learn strategies that, when applied successfully, will make your life and career journey that much more rewarding and successful.

The Indian Media Business Springer

Fundamentals of Telemedicine and Telehealth provides an overview on the use of information and communication technologies (ICTs) to solve health problems, especially for people living in remote and underserved areas. With the advent of new technologies and improvement of internet connectivity, telehealth has become a new subject requiring a new understanding of IT devices and how to utilize them to fulfill health needs. The book discusses topics such as digitizing patient information, technology requirements, existing resources, planning for telehealth projects, and primary care and specialized applications. Additionally, it discusses the use of telemedicine for patient empowerment and telecare in remote locations. Authored by IMIA Telehealth working group, this book is a valuable source for graduate students, healthcare workers, researchers and clinicians interested in using telehealth as part of their practice or research. Presents components of healthcare that can be benefitted from remote access and when to rely on them Explains the current technologies and tools and how to put them to effective use in daily healthcare Provides legal provisions for telehealth implementation, discussing the risks of remote healthcare provision and cross border care

Thinking German Translation O'Reilly Media

Bruce Tate, author of the Jolt Award-winning *Better, Faster, Lighter Java* has an intriguing notion about the future of Java, and it's causing some agitation among Java developers. Bruce believes Java is abandoning its base, and conditions are ripe for an alternative to emerge. In *Beyond Java*, Bruce chronicles the rise of the most successful language of all time, and then lays out, in painstaking detail, the compromises the founders had to make to establish success. Then, he describes the characteristics of likely successors to Java. He builds to a rapid and heady climax, presenting alternative languages and frameworks with productivity and innovation unmatched in Java. He closes with an evaluation of the most popular and important programming languages, and their future role in a world beyond Java. If you are agree with the book's premise--that Java's reign is coming to an end--then this book will help you start to build your skills accordingly. You can download some of the frameworks discussed and learn a few new languages. This book will teach you what a new language needs to succeed, so when things do change, you'll be more prepared. And even if you think Java is here to stay, you can use the best techniques from frameworks introduced in this book to improve what you're doing in Java today.

Using ICTs and blended learning in transforming technical and vocational education and training MIT Press

"" Morimoto, a young professional woman in Japan, wishes her parents would stop trying to get her

to marry a man and settle down. In an unexpected move, her friend from high school offers to be her wife in a sham marriage, to make Morimoto's parents back off. But this "fake" marriage could unearth something very real! ""

Beyond Java Taylor & Francis

Volume 3 of the PoC || GTFO collection--read as Proof of Concept or Get the Fuck Out--continues the series of wildly popular collections of this hacker journal. Contributions range from humorous poems to deeply technical essays bound in the form of a bible. The International Journal of Proof-of-Concept or Get The Fuck Out is a celebrated collection of short essays on computer security, reverse engineering and retrocomputing topics by many of the world's most famous hackers. This third volume contains all articles from releases 14 to 18 in the form of an actual, bound bible. Topics include how to dump the ROM from one of the most secure Sega Genesis games ever created; how to create a PDF that is also a Git repository; how to extract the Game Boy Advance BIOS ROM; how to sniff Bluetooth Low Energy communications with the BCC Micro:Bit; how to conceal ZIP Files in NES Cartridges; how to remotely exploit a TetriNET Server; and more. The journal exists to remind us of what a clever engineer can build from a box of parts and a bit of free time. Not to showcase what others have done, but to explain how they did it so that readers can do these and other clever things themselves.

PoC or GTFO Bombay : N. M. Tripathi ; Dobbs Ferry, N.Y. : Oceana Publications

"Technological Addictions is the first guide designed to provide insight and strategies to clinicians, patients, and families grappling with the collateral damage of technology's pervasiveness and pull. Mental health professionals are beginning to understand that video games, online pornography, internet gaming, internet gambling, and other technological pastimes can be every bit as addictive as substances such as alcohol, tobacco, and illicit drugs. Editor Petros Levounis is among the foremost experts on addiction and, together with coeditor James Sherer and a roster of prominent contributors, has created a groundbreaking book that emphasizes the lived reality of the people who struggle with these addictions every day. In 10 rigorous yet down-to-earth chapters, the book explores the psychological and cultural context of each technology and related behavior, from social media to cybersex, and examines thoroughly the difference between healthy engagement with technology and addiction. This discussion premised on the understanding that technology should not be rolled back or restricted but is an increasingly beneficial and even necessary part of modern life. Two chapters specifically focus on the way technology addictions impact particular populations, such as children and adolescents and older adults. Addiction to technology does not discriminate; no preexisting psychological or physical conditions are required, and everyone is susceptible. Technological Addictions provides guidance found nowhere else, guidance that both clinicians and laypeople will find useful and compelling"--

Technological Addictions Nirali Prakashan

You always knew digital was going to change things, but you didn't realize how close to home it would hit. In every industry, digital competitors are taking advantage of new platforms, tools, and relationships to undercut competitors, get closer to customers, and disrupt the usual ways of doing business. The only way to compete is to evolve. James McQuivey of Forrester Research has been teaching people how to do this for over a decade. He's gone into the biggest companies, even in

traditional industries like insurance and consumer packaged goods, and changed the way they think about innovation. Now he's sharing his approach with you. McQuivey will show you how Dr. Hugh Reinhoff of Ferrokin BioSciences disrupted the pharmaceutical industry, streamlining connections with doctors and regulators to bring molecules to market far faster--and then sold out for \$100

million. How Charles Teague and his team of four people created Lose It!, a weight loss application that millions have adopted, achieving rapid success and undermining titans like Weight Watchers and Jenny Craig in the process.
