The gripping true tale of a devastating plane crash, the investigation into its causes, and the race to prevent similar disasters in the future. On July 25, 2000, a Concorde, the world's fastest passenger plane, was taking off from Charles de Gaulle Airport in Paris when it suddenly burst into flames. An airliner capable of flying at more than twice the speed of sound, the Concorde had completed 25 years of successful flights, whisking wealthy passengers--from diplomats to rock stars to corporate titans--between continents on brief and glamorous flights. Yet on this fateful day, the chartered Concorde jet, en route to America, crashed and killed all 109 passengers and crew onboard and four people on the ground. Urgent questions immediately arose as investigators scrambled to discover what had gone wrong. What caused the fire? Could it have been prevented? And, most urgently, was the Concorde safe to fly? *Last Days of the Concorde* addresses these issues and many more, offering a fascinating insider's look at the dramatic disaster, the hunt for clues, and the systemic overhauls that followed the crash.

The Autocar Addison-Wesley Professional Approaching Business Models from an Economic Perspective examines business model logic and explores the model from different aspects including definition, design, functionality, elements, and self-sustaining logic. It explains the essence and core elements of a business model and unlocks its mysteries, helping transform business model practices into an expedient set of theories that in turn facilitate application in real scenarios. The book explores the logic behind the six major elements and enables entrepreneurs to study and implement business model theory and make decisions

confidently based on a compelling logic. Moreover, it demonstrates through an array of convincing examples that a transaction structure and its six elements follow the principles of increasing transaction value, reducing transaction costs, and mitigating transaction risks. *Central Station* Veloce Publishing Ltd This book reports on cutting-edge theories and methods for analyzing complex systems, such as transportation and communication networks and discusses multi-disciplinary approaches to dependability problems encountered when dealing with complex systems in practice. The book presents the most noteworthy methods and results discussed at the International Conference on Reliability and Statistics in Transportation and Communication (RelStat), which took place remotely from Riga, Latvia, on October 14 - 17, 2020. It spans a broad spectrum of topics, from mathematical models and design methodologies, to software engineering, data security and financial issues, as well as practical problems in technical systems, such as transportation and telecommunications, and in engineering education.

Competition Law Frederick Geyer Cars.

Road Making and Maintenance Routledge This book was published in 2003.

Competition/anti-trust law, as a separate body of law, is very much a creation of the 20th century and grew only in maturity in the latter half of that century. As developments in US anti-trust law have had, and continue to have, an important influence on the development of competition law in Europe and worldwide, articles have been selected for this collection from both sides of the Atlantic. The volume focuses on the following aspects: the objectives and nature of competition law, the scope of competition law, selected legal concepts and challenges in competition law, and the global application of competition law.

Japan Transportation Springer Nature 'Faced with the challenge of studying EU law, students and other interested parties need guidance and accessible materials. Despite the ground clearing of the Lisbon Treaty, the terrain is still not properly mapped. Edward and Lane's completely rewritten book provides just what's needed. Clear, comprehensible and comprehensive, it will be an important port of call for anyone trying to figure out key aspects of the EU's ever burgeoning legal order.' - Jo Shaw, University of Edinburgh, UK A comprehensively updated and expanded new edition of a classic text, this authoritative volume provides expert analysis on the key issues across all areas of European Union law - including its constitutional, procedural and substantive aspects. Importantly, the book incorporates the Treaty of Lisbon reorientation and immediate post-Lisbon developments. Throughout the book there is extensive reference to primary sources (Treaty, legislation, case law) and to issues of national adaptation which, together, bring a depth of understanding and analysis to this increasingly complex discipline.

Refactoring is gaining momentum amongst the object oriented programming community. It can transform the internal dynamics of applications and has the capacity to transform bad code into good code. This book offers an introduction to refactoring.

Road & Track

This book guides B2B leaders along a step by step path to uncommon growth through three transformative shifts: The Digital Selling Shift to digital demand generation, The Digital Customer Experience Makeover to digital customer engagement, The Digital Proposition Pivot to data-powered, digital solutions. The Definitive Guide is informed by the work of Fred Geyer at Prophet, a leading digital transformation consultancy, and Joerg Niessing at INSEAD, a global standard-

bearer for business education. Rich case studies from Maersk, Michelin, Adobe, and Air Liquide with best practices from IBM, Salesforce.com, Thyssenkrupp, and scores of leading B2B companies illustrate how putting customers at the heart of digital transformation drives uncommon growth. Fred and Joerg map the route from customer insight to in-market implementation for each transformational shift in four steps: Where to Play - Identify top customer growth opportunities, How to Win - Build the strategy to win customer preference, What to Do - Effectively deliver the strategy, Who is Needed - Assemble the team to make it happen. The two biggest barriers to successful digital transformation, effectively using

customer data and enabling employees, are addressed by outlining a clear path to navigate forward based on best practices from other leading companies. The guide has won rave reviews from B2B leaders: "This book illuminates the secret sauce of digital transformation in the B2B space" - David Aaker, renowned brand strategist and bestselling author. "A thought-provoking exploration of three crucial transformational shifts for B2B companies" - Vincent Clerc, CEO, Maersk Ocean & Logistics "This is a great guide to applying best practices to the formidable challenge of digital transformation in complex markets and supply chains." - Dr. Lars Brzoska, Chairman of the Board of Management, Jungheinrich AG. "By providing case examples and step by step

assistance in determining where to play, how to win, what to do and who to win, this book fulfilled my need for inspiring and pragmatic transformation guidance" - Lindy Hood, Chief Customer Experience Officer, Zurich Financial North America
