Whether you're new to accounting, or looking to freshen up your skills so you can join an audit firm, this course will teach you

everything you need to know to learn how to audit a financial statement. Unlike other audit books that only focus on theory, I've designed this book in a way that is both practical and useful, using real world companies like Facebook and WeWork and Apple to drive home each concept. You'll learn what an auditor does as well as the tools and procedures auditors need to follow out in the field. We'll examine financial statements, the General Ledger and the trial balance. We'll also learn how to obtain appropriate audit evidence as well as how to make a list of requirements. Other topics include: · Learning and using test of details and analytical procedures · Learning how to select materiality · Learning how to select samples for testing · Learning how to document your working paper correctly · And more! To benefit from this book you'll want to have a good grasp on basic accounting to ensure you understand each lesson. However, once you've finished, you feel confident knowing you know have the knowledge and ability needed to begin a career as an auditor.
