Many commentators tell us that, in today's world, everyday life has become selfish and atomised—that individuals live only to consume. But are they wrong? In *Me, Me, Me*, Jon Lawrence retells the story of England since the Second World War through the eyes of ordinary people—including his own parents—to argue that, in fact, friendship, family, and place all remain central to our daily lives, and whilst community has changed, it is far from dead. He shows how, in the years after the Second World War, people came increasingly to question custom and tradition as the pressure to conform to societal standards became intolerable. And as soon as they could, millions escaped the closed, face-to-face communities of Victorian Britain, where everyone knew your business. But this was not a rejection of community per se, but an attempt to find another, new way of living which was better suited to the modern world. Community has become personal and voluntary, based on genuine affection rather than proximity or need. We have never been better connected or able to sustain the relationships that matter to us. *Me, Me, Me* makes that case that it's time we valued and nurtured these new groups, rather than lamenting the loss of more 'real' forms of community—it is all too easy to hold on to a nostalgic view of the past.

The realization of information structural units has been intriguing as information packaging has reflections in the semantic, pragmatic, syntactic and prosodic domains. This book extends the investigation by bringing data from all these domains and presenting an analysis for the model of grammar. Based on three-way classification for information packaging, semantic investigation presents insights on compositionality and positional restrictions for topic, focus and discourse anaphoric phrases. The prosodic experimental studies reveal how focus shapes prosody and how diverse languages encode such information packaging. Drawing on the findings of experimental studies reflecting the interaction of information structure with quantifier scope, negation and aspectual markers, clause internal functional projections and scope domains are proposed in the syntactic analysis. The analysis offers new perspectives for movement operations, functional categories, phases which are central themes for the Minimalist Program. Building on the investigation of information structure within semantic, prosodic, syntactic perspectives, the book will appeal to researchers working on either of these domains or their interfaces.
