Oxford English Quest is an exciting English resource that provides quality complete texts for shared reading and comprehension, and activities to improve the quality of children's writing. Texts are carefully differentiated to provide for a range of

levels in the classroom. Through studying the texts, children will learn techniques to apply to their own writing. Each year group has a CD-ROM with Powerpoint texts for shared work, a Companion with short stories, non-fiction texts and poetry covering all required text types, and a Pupil Book with differentiated activities to support comprehension, grammar, speaking and listening, and drama. The Teacher's Resource Kit contains the CD-ROM, clear overviews of the unit objectives, and comprehensive teaching notes. Each year group is provided with six units, two per term, with each unit representing 10+ weeks' work. *American Book Publishing Record Cumulative, 1950-1977* Springer Agents are software processes that perceive and act in an

environment, processing their perceptions to make intelligent decisions about actions to achieve their goals. Multi-agent systems have multiple agents that work in the same environment to achieve either joint or conflicting goals. Agent computing and technology is an exciting, emerging paradigm expected to play a key role in many society-changing practices from disaster response to manufacturing to agriculture. Agent and multi-agent researchers are focused on building working systems that bring together a broad range of technical areas from market theory to software engineering to user interfaces. Agent systems are expected to operate in real-world environments, with all the challenges complex environments present. After 11 successful PRIMA workshops/conferences (Pacific-Rim International Conference/Workshop on Multi-Agents), PRIMA became a new conference titled "International Conference on Principles of Practice in Multi-Agent Systems" in 2009. With over 100 submissions, an acceptance rate for full papers of 25% and 50% for posters, a

demonstration session, an industry track, a RoboCup competition and workshops and tutorials, PRIMA has become an important venue for multi-agent research. Papers submitted are from all parts of the world, though with a higher representation of Pacific Rim countries than other major multi-agent research forums. This volume presents 34 high-quality and exciting technical papers on multimedia research and an additional 18 poster papers that give brief views on exciting research.

Principles of Practice in Multi-Agent Systems

Manni Editori

What do trainee teachers need to know about English to teach it effectively in primary schools? How do children learn English and how can students teach it? What does a good primary English lesson look like? Answering these important questions and more, this new edition covers all areas of the new National Curriculum for primary English. By offering insight into effective teaching, it helps students connect what they need to teach to how it can be taught. This book opens up

opportunities in the new curriculum for creative and imaginative teaching and covers all areas of children's literacy from poetry and literature to SPAG. Case studies of teaching are used as a starting point for learning, and guidance on practical teaching strategies is included throughout. Now comes with: A new chapter on Multi-modal texts A new chapter on Mastery in English *General references. Social sciences* Univ of California Press

This ambitious undertaking is designed to acquaint students, teachers, and researchers with reference sources in any branch of English studies, which Marcuse defines as "all those subjects and lines of critical and scholarly inquiry presently pursued by members of university departments of English language and literature." Within each of 24 major sections, Marcuse lists and annotates bibliographies, guides, reviews of research, encyclopedias, dictionaries, journals, and reference histories. The annotations and various indexes are models of clarity and usefulness, and cross references are liberally supplied where

appropriate. Although cost-conscious librarians will probably consider the several other excellent literary bibliographies in print, such as James L. Harner's *Literary Research Guide* (Modern Language Assn. of America, 1989), larger academic libraries will want Marcuse's volume.-- Jack Bales, Mary Washington Coll.  This dissertation, "Using Blogs to Promote Narrative Writing in English in Hong Kong Primary School" by Ngai, Ying, [?], was obtained from The University of Hong Kong (Pokfulam, Hong Kong) and is being sold pursuant to Creative Commons: Attribution 3.0 Hong Kong License. The content of this dissertation has not been altered in any way. We have altered the formatting in order to facilitate the ease of printing and reading of the dissertation. All rights not granted by the above license are retained by the author. Abstract: This study explored effectiveness of blog-based writing and compares it to traditional 'paper and pen' English

narrative in a primary school classroom. A group of 30 primary five (P5) students were selected based on results of a pre-test, and randomly assigned into one of two groups: blog group and pen group. The students had six English composition lessons with focus on narrative writing. The students from both groups were in same class, and teaching was conducted by a single English teacher. Only difference between the two groups was that the blog group students composed their writing assignments with computers in the computer laboratory through the blog interface. The pen group worked in the classroom in traditional 'paper and pen' way. The post-test was conducted after six lessons, and questionnaires and evaluation forms were administered to provide data. In addition, data collection included artefacts produced by students. Collection and analysis of quantitative and qualitative data suggest that blogging can support writing in three areas. Firstly, blogging helps to increase the volume of writing produced by students.

Secondly, blogging supports improvement in quality of narrative writing, more specifically in areas of Vocabulary, Language Use and Mechanics. Finally, blogging enhances students' positive attitude towards writing. It Using Blogs to promote English narrative writing in Hong Kong Primary School ii is hoped that the results of the study will have encouraging effect on English teachers in a primary school classroom to apply blogging for purpose of improving students' writing.
