A History of Baroque Music Hal Leonard Corporation
 Guide to the Tuba Repertoire is the most comprehensive investigation ever undertaken into the literature and discography of any single musical instrument. Under the direction of R. Winston Morris and Daniel Perantoni, this publication

represents more than 40 years of research by dozens of leading professionals throughout the world. The guide defines the current status of the tuba and documents its growth since its inception in 1835. Contributors are Ron Davis, Jeffrey Funderburk, David Graves, Skip Gray, Charles A. McAdams, R. Winston Morris, Mark A. Nelson, Timothy J. Northcut, Daniel Perantoni, Philip Sinder, Joseph Skillen, Kenyon Wilson, and Jerry A.

Choral Repertoire Alfred Music
 "Choral Repertoire is the definitive and comprehensive one-volume presentation of the most significant composers and compositions of choral music from the Western Hemisphere throughout recorded history. The book is designed for multiple uses-as a programming guide for practicing conductors, instructional resource for students and teachers of choral music, historic and

stylistic reference for choral singers, and source of information about composers and compositions for choral enthusiasts-and as such, the book intends to further and make accessible important information relevant to the vast scope of choral music. Organized by era (Medieval, Renaissance, Baroque, Classical, and Modern), Choral Repertoire covers general characteristics of each historical era, trends and styles unique to various countries, biographical

sketches of more than six hundred composers, and performance annotations of more than five thousand individual works. Of the composers, there is substantive coverage of women and composers of color, and of the repertoire, there is inclusion of lesser-known works as well as those works that are considered standard"--

more than one hundred of
the greatest compositions
by world-renowned

composer that have entered the standard orchestral repertory. The author surveyed dozens of major American orchestras to focus on those works that an average audience member is most likely to hear. Concertgoers who are intimidated by the modern repertoire finally have a single resource that will help them understand and enjoy it. Like an educated guide, he walks the listener through the piece, explaining how all the elements come together

to form a unified whole. This book serves the general reader interested in 20th-century music, plus students, teachers, and scholars.

"This book presents music titles in which the organ is part of a chamber ensemble. Alphabetized by composer, entries contain the bibliographical information for each title and a brief commentary

or description, as well as information on the level of difficulty, timing, mood, fingerings/pedalings, and other performance aids.

The selections are suitable for concerts and religious services and are written in a variety of styles, from Baroque to contemporary." "This catalogue will be of interest to church organists searching for a piece for organ and brass appropriate for Easter, visiting instrumentalists choosing music for a Sunday service, teachers introducing their organ

students to the experience of accompanying a violin, and instrumentalists seeking a composition to play with the organ, among many others."--

 Minimalism, savagery, the raw and the cooked, the primal and the pre-verbal, Elvis's hips, The Rite of Spring . . . Earth Dances is

an original investigation of how music and primitivism intersect – a dazzling journey through music and culture. With alternating chapters of criticism and interviews, including with Liza Lim and Brian Eno, composer and broadcaster Andrew Ford explores the relationship between primal forms of music and the most refined examples of the art – between passion and control. He looks at the voice, the drum, the drone and the dance, at 'music that is in touch

with something fundamental in our existence, music that seeks and rediscovers the earthy side of our nature, the primitive, the "simple, rude or rough", and in doing so restores and resets our humanity'. 'The perfect, knowledgeable, enthusiastic friend . . . I couldn't put it down!'
 —David Robertson 'Much has been made of the search for the lost chord. But chords are sophisticated structures. Earth Dances documents Andrew Ford's intrepid quest for the lost thud,

and the lost scream . . .
 Music can't survive
 without primitivism. It is
 the bushfire clearing
 overgrown and cluttered
 musical landscapes,
 paring them to essentials.
 This results in fresh
 structures, materials and
 practices that lead us to
 the place we belong.'

Timpani Tone and the Interpretation of Baroque

and Classical Music explores the nature, production, and evolution of timpani tone and provides insights into how to interpret the music of J. S. Bach, Handel, Haydn, and Mozart. In drawing on 31 years of experience, Steven L. Schweizer focuses on the components of timpani tone and methods for producing it. In so doing, he discusses the importance of timpani bowl type; mallets; playing style; physical gestures; choice of drums; mallet grip; legato,

marcato, and staccato strokes; playing different parts of the timpano head; and psychological openness to the music in effectively shaping and coloring timpani parts. In an acclaimed chapter on interpretation, Schweizer explores how timpanists can use knowledge of the composer's style, psychology, and musical intentions; phrasing and articulation; the musical score; and a conductor's gestures to effectively and convincingly play a part with emotional dynamism and power. The

greater part of the book is devoted to the interpretation of Baroque and Classical orchestral and choral music. Meticulously drawing on original sources and authoritative scores from the seventeenth through nineteenth centuries, Schweizer convincingly demonstrates that timpanists were capable of producing a broader range of timpani tone earlier than is normally supposed. The increase in timpani size, covered timpani mallets, and thinner timpani heads

increased the quality of timpani tone; therefore, today's timpanist's need not be entirely concerned with playing with very articulate sticks. In exhaustive sections on Bach, Handel, Haydn, and Mozart, Schweizer takes the reader on an odyssey through the interpretation of their symphonic and choral music. Relying on Baroque and Classical performance practices, timpani notation, the composer's musical style, and definitive scores, he interprets timpani parts from major works of these

composers. Schweizer pays particular attention to timpani tone, articulation, phrasing, and dynamic contouring: elements necessary to effectively communicate their part to listeners. **Dvořák** Schirmer (Meredith Music Percussion).
