OLSON SANTOS

Progress on Drinking Water and Sanitation American Water Works Association

This volume provides new insights and conceptual understandings of the human and gender dimension of vulnerability in relation to the dynamics of tenure reforms in the dryland forests of Asia and Africa. The book analyzes the interaction between biophysical factors such as climate variability (e.g. droughts) with socio-political processes (e.g. new institutions and authority) and gender dimensions at various temporal and spatial scales. The book presents a number of case studies based on empirical research on forest tenure reform and its consequences on forest-dependent people. In particular, it highlights the interaction between legal, policy and institutional reform and the inclusion and/or exclusion of local people from deriving benefits from forest resources in the drylands. The book focuses on the questions how land tenure reform and natural resource governance impacts upon marginal groups (along individual, collective and gender dimensions); how do forest-dependent people prepare for and respond to vulnerability; and what is the effect of forest tenure policy reform on the human rights, gender and citizenship issues in relation to the use and management of forest resources and on conflict in forest zones. These issues are approached from the perspective of marginalized groups (gender and social diversity such as indigenous peoples and herders) in vulnerable dryland forests with a high risk of being exposed to climate variability.

The Flower Grower Routledge

A view of 'development at the margins' in the pastoral areas of the Horn of Africa highlights innovation and entrepreneurialism, cooperation and networking and diverse approaches rarely in line with standard development prescriptions. Through twenty detailed empirical chapters, the book highlights diverse pathways of development, going beyond the standard 'aid' and 'disaster' narratives.

Interpreting Indicators of Rangeland Health International Potato Center

This timely book makes accessible to a broad audience the ideas, principles and practicalities of establishing effective social protection in Africa. It focuses on the major shift in strategy for tackling hunger and vulnerability, from emergency responses mainly in the form of food transfers to predictable cash transfers to the chronically poorest social groups. The first part of the book comprises nine theme chapters, covering vulnerability, targeting, delivery, coordination, cost-effectiveness, market impacts, and asset effects, while the second part consists of fifteen social protection case studies. The continuous interplay between these two parts makes for a unique contribution to the contemporary literature on social protection. The book takes a positive and forward looking view regarding the feasibility of achieving successful social transfers to the poorest in Africa; nevertheless, a critical stance is taken where appropriate, and unresolved strategic issues regarding the targeting, coverage and scale of social transfers are highlighted. Social Protection in Africa is an essential read for personnel, advisors and consultants working for aid donors, United Nations agencies, NGOs and governments on social transfer programmes in sub-Saharan African countries. In addition, the book represents a valuable resource for training courses on social protection, and will be vital reading for Masters level students and researchers studying emergency relief, social protection, vulnerability and poverty reduction in low-income countries.

Greek Aims in Fortification Springer

This book analyzes the impact food aid programmes have had over the past fifty years, assessing the current situation as well as future prospects. Issues such as political expediency, the impact of international trade and exchange rates are put under the microscope to provide the reader with a greater understanding of this important subject matter. This book will prove vital to students of development economics and development studies and those working in the field.

Biosecurity for Highly Pathogenic Avian Influenza World Bank Publications

Self Supply highlights the approaches used where governments have recognised self-supply, illustrating key technological and socio-economic issues. The book focuses on sub-Saharan Africa where self-supply is especially relevant to the urgent challenge of extending water services to all, as demanded by the Sustainable Development Goals.

Barley Research in Ethiopia East African Publishers

DIVA compilation of definitions, terms, and critical commentary on aspects of sustainable development and environmental policy, with a strong emphasis on policy tools, policy practices, and systems of international environmental governance./div

Transformative Social Protection

Human Rights Watch

This FAO manual provides technical advice and guidelines for each of the livestock interventions most common during emergency response to natural and human-induced disasters. These are: destocking, veterinary support, provision of feed, provision of water, shelters and provision of livestock. There is also a chapter on the use of cash transfer and one on monitoring, evaluation and assessing the impact of emergency livestock projects. The manual complements the Livestock Emergency Guidelines and Standards (LEGS) handbook.

Cultivating Knowledge BoD - Books on Demand

Reflects new approaches and concepts in the field of conservation and the development of local crops. Case studies from Africa, Latin America and Asia address these issues from different angles, examining the significance of local knowledge, and documenting new approaches and methodologies.

Food, the State, and International Political Economy Routledge

This edited volume "Food Security in Africa" is a collection of reviewed and relevant research chapters offering a comprehensive overview of recent developments in the field of food safety and availability, water issues, farming and nutrition. The book comprises single chapters authored by various researchers and edited by an expert active in the

public health and food security research area. All chapters are complete in itself but united under a common research study topic. This publication aims at providing a thorough overview of the latest research efforts by international authors on Africa's food security challenges, quality of water, small-scale farming as well as economic and social challenges that this continent is facing. Hopefully, this volume will open new possible research paths for further novel developments.

Social Protection in Africa ITDG Publishing

Social protection is fast becoming an important theme in development policy. This book examines the political processes shaping social protection policies; compares the key conceptual frameworks available for analyzing social protection; and provides a comparative discussion on social protection policies focused on the poor and the poorest.

Freshwater Fishes of Ethiopia National Academies Press

This book is concerned with the question of how people in developing countries survive, and how their lives have been affected by the great changes since the Second World War. Throughout large parts of the developing world rural livelihoods are in crisis. Even in those parts of the third world where there has been growth of food output, that growth has rarely been translated into a commensurate expansion of livelihoods. Frequently, both economic stagnation and economic growth are translated into suffering for those who live in the countryside. Many people are aware that there is a crisis of livelihoods in sub-Saharan Africa, but the understanding of that crisis rarely transcends simple conceptions of food or environmental crisis or the inadequacy of states: the ubiquity of crisis is rarely comprehended. This book addresses the pressing question of rural poverty. It examines the diverse human implications of rural change, the various crises of rural livelihoods which arise from change, and the survival strategies of individuals and households. It describes the great processes of agrarian transformation which have fundamentally altered rural livelihoods in developing countries and identifies some of the dilemmas for public action which arise from agrarian transformation and the crises of rural livelihoods. The contributors draw upon a range of disciplinary approaches to the subject, including anthropology, sociology, economics, political economy, agricultural science, and development studies.

Livestock Production Systems Oxfam

The WHO/UNICEF Joint Monitoring Programme for Water Supply and Sanitation (JMP) reports every two years on progress towards the drinking-water and sanitation target under Millennium Development Goal 7. This target calls for halving the proportion of the population without sustainable access to safe drinking water and basic sanitation between 1990 and 2015. Estimates presented in its 2012 update report describe the situation at the end 2010 and supersede those of the JMP update published in March 2010.-- Publisher description.

Pastoralism and Development in Africa Edward Elgar Publishing

This textbook provides a basic introduction to ethnobiology with key concepts for beginners. It is also written for those who teach ethnobiology or related fields. The core issues and concepts, as well as approaches and theoretical positions are fully covered.

Industrialization in Kenya Intl Food Policy Res Inst

This paper describes in detail the current situation and state of knowledge about biosecurity in relation to H5N1 HPAI, discusses species- and sector-specific issues, proposes possible options for biosecurity in important parts of the domestic poultry and captive bird sector, stresses the importance of situating biosecurity in appropriate economic and culture settings, and makes the case for the role of communication. Also published in French.

Measuring Food Insecurity and Hunger Oxford University Press, USA

Focuses on three political economy themes: developing countries' food policies; the international political economy of food and agriculture (trade relations, foreign food aid, agribusiness); and what mixture of capital-intensive and labour-intensive techniques to use.

Contested Agronomy World Health Organization

Aims to correct the widely held but questionable view that the Ethiopian famine was and is an inevitable consequence of environmental, social and cultural factors. The book is based on extensive original field research in Ethiopia, involving detailed surveys of over 500 families.

Public Works as a Safety Net MacMillan Education, Limited

In emergencies, distributing cash in a targeted manner can often meet people's immediate needs more quickly and appropriately than the direct distribution of commodities such as food aid. Cash gives people choices and thereby preserves their dignity. Commodity

distribution may pose logistical problems, takes time, and in the case of food aid, may disrupt local markets if food is actually available within the affected country or region. But among humanitarian agencies there are fears that cash transfers will pose security risks, create inflation, and fail to be used to meet basic needs. In this guide, the first of its kind, Oxfam staff members present the rationale behind cash-transfer programs, considering the arguments for and against cash as an alternative to commodity distribution. They also give guidance on when cash is the most appropriate intervention and how to assess this. Different types of cash intervention are compared--cash grants, vouchers, and cash-for-work--and the guide uses checklists to explain the practical steps involved in implementing them. They draw on the experience of Oxfam and other agencies of operating such programs, including responses to the devastation caused by the Indian Ocean tsunami in December 2004. The guidelines are primarily intended for NGO personnel: humanitarian program managers, food-security specialists, public-health engineers, finance staff, and logisticians. Policymakers in donor organizations and international agencies will also find them relevant. The sixteen cards contain key elements from the book to explain how to assess whether cash is the most appropriate response to any particular emergency. The cards and the paperback are also available as a set.

Guide to Sustainable Development and Environmental Policy CABI

"The protocol described in this technical reference is designed to: be used only by knowledgeable, experienced people; provide a preliminary evaluation of soil/site stability, hydrologic function, and biotic integrity (at the ecological site level); be used to communicate fundamental ecological concepts to a wide variety of audiences; improve communication among interest groups by focusing discussion on critical ecosystem properties and processes; select monitoring sites in the development of monitoring programs; provide early warnings of potential problems and opportunities by helping land managers identify areas that are potentially at risk of degradation or where resource problems currently exist"--P. 1.

Self-Supply Routledge

Based on extensive field research and in-depth interviews, Achieving Water Security draws conclusions for policy and practice of relevance not just for Ethiopia, but for sub-Saharan Africa more widely,

linking findings with current international debates on service delivery in rural areas. Published in association with ODI.
Food Aid After Fifty Years Springer

This practical textbook examines how individual species of domestic livestock can be integrated into the whole concept

of sustainable agriculture in the tropics. A wide range of different case studies from tropical countries provide practical models for livestock husbandry
