HOWARD LACI

Developing Spatial Data Infrastructures Springer

Rapid growth of geodetic information provided by the Global Positioning System (GPS) and stringent requirements for a precise geoid in ocean areas for ocean circulation models have spurred interest in geoid studies. As a result, the International Geoid Commission was formed to provide a focus for this important geoid research. Determination of the Geoid: Present and Future is the result of the first meeting of the Commission, held at the Instituto di Topografia, Fotogrammetria e Geofisica at the Politecnico di Milano, June 1990. Six major topics are presented: Global Geopotential Models: Present and Future; Role of Topography in Geoid Computations; the Geoid and the Global Positioning System; the State of Computation of National or Regional Geoids; Software and Data Improvements for Geoid Computations; and Recent Developments in the GEOMED (Determination of the Geoid in the Mediterranean) Project.

Management in Tourism Transportation Research Board

Beyond Mentoring: A Guide for Librarians and Information Professionals looks at mentorship, mentorship programs, what works, what doesn't, and different techniques, such as group and peer mentoring. The book considers many aspects of mentoring, various programs, and their successes and failures, going beyond the usual types of mentoring by looking at newer models. An example of the cohort model from the American Library Association Emerging Leader model is included as a case study. In addition, another case study on the Sunshine State leadership Institute provides a toolkit for building your own program. The final section of the book offers perspectives and tools that people can use in designing their own programs.

Photogrammetry and Remote Sensing
Chandos Publishing

The International Federation of Library Associations and Institutions (IFLA) is the leading international body representing the interests of library and information services and their users. It is the global voice of the information profession. The series IFLA Publications deals with many of the means through which libraries, information centres, and information professionals worldwide can formulate their goals, exert their influence as a

group, protect their interests, and find solutions to global problems.

Skills for Knowledge Management CRC Press

Expert perspectives on SDI theory and practice The spatial data infrastructure (SDI) concept continues to evolve and become an increasingly important element of the infrastructure that supports economic development, environmental management, and social stability. Because of its dynamic and complex nature, however, it remains a fuzzy concept

Land Administration Guidelines New York : United Nations

Jesenko and Kiereta gather work on less-studied aspects of tourism management. Human resources, the planning process in tourism, and the need for implementation of new media related to holidays and business travel are major subjects discussed here.

The Latin Orient Peter Lang Publishing

This book constitutes the refereed post-conference proceedings of the 5th European Conference on Information Literacy, ECIL 2017, held in Saint Malo, France, in September 2017. The 84 revised papers included in this volume were carefully reviewed and selected from 358 submissions. The papers cover a wide range of topics in the field of information literacy and focus on information literacy in the workplace. They are organized in the following topical sections: workplace information literacy, employability and career readiness; data literacy and research data management; media literacy; copyright literacy; transliteracy, reading literacy, digital literacy, financial literacy, search engine literacy, civic literacy; science literacy; health information literacy; information behavior; information literacy in higher education;

information literacy in K-12; information literacy instruction; information literacy and libraries; and theoretical framework.

Doctoral Dissertations in Musicology

Springer Science & Business Media

The science of taking measurements using photographs is called photogrammetry and it complements the discipline of remote sensing. This book attempts to assist those with a goal of delving into the field of photogrammetry and remote sensing by covering photogrammetric methods and their applications in diverse fields such as architecture, engineering, geology, meteorology, etc. From theories to research to practical applications, case studies related to all contemporary topics of relevance to this field have been included in this book. It is highly recommended for students, academicians and researchers of this field.

Beyond Mentoring Springer Nature

This book provides professionals, as well as students, with the understanding that Social Entrepreneurship and Corporate Social Responsibility (CSR) are now core business principles for sustainably. It encourages social entrepreneurs in their role as forerunners, in creating new business models that develop, facilitate or implement constructive solutions to social, cultural and environmental issues. At the same time, this book views corporate social responsibility as a means of challenging existing entities to realize and modify prior unsustainable and predatory business models; and to increase social, cultural and environmental accountability. By linking these two concepts, this book prompts a paradigmatic awakening, whereby the foundational driver of business creation and management no longer rests on profit maximization, but on improvement

of the quality of life for society.
