Every March 10th, from 1961 until 2011, in commemoration of the greatest uprising of the Tibetan people against the Chinese military occupation, the Dalai Lama delivered an appeal to the world on behalf of his people. Each statement is a heartfelt call to recognize the truth and the factual reality of Tibet's history and situation; a cry for help, a plea for justice, and a pledge of determination to withstand the worst and to overcome. In these annual addresses, he began to articulate and fully express his overarching appeal to humanity. All of the Dalai Lama's March 10th speeches, at their most poignant and eloquent, are collected here, introduced and historically contextualized by Sofia Stril-Rever, an author and scholar of Tibetan history and culture and Buddhist spirituality who has long served as his French translator. Here in this book is his appeal to us all. The people of all nations have heard it and have tried to help, but their governments still have not dared to stand up effectively for justice on behalf of the Tibetan people and for recognition of the basic human rights to which we all are entitled. --Publisher's description.

This book presents an alternative paradigm in understanding and appreciating World Englishes (WEs) in the wake of globalization and its accompanying shifting priorities in many dimensions of modern life, including the emergence of the English language as the dominant lingua franca (ELF). Chew argues that history is a theatre for the realization of lingua francas, offering a model that shows the present as derived from the past and as a bearer of future possibility, the understanding of which is rooted in the understanding of World Englishes and ELF. The book will engage with some of the current theoretical debates in WEs and includes, as a means of fleshing out the model, sociolinguistic case studies of Arabia, China Fujian, and Singapore.

Mayan Calendar experts cracked the language code, finding the date predicted when the solar system would cross into the northern hemisphere of the Milky Way Galaxy and the golden age would begin. In the Great Pyramid the same information and the end time when the last day is the same date, but it also predicts the return of Christ and He is on the planet today. The Great Pyramid conspiracy is the direct result of the Catholic Church, which hung a mask of Jesus hung upon the body of Lucifer. There is however a linking of ancient wonders within the Great Pyramid, which predicts that Brian Leonard Golightly Marshall was reborn to the earth January 11th 1944 in Australia. The key that opens the mysteries of the old Testament Hebrew pinpointing the second coming of Jesus is in the Mayan Calendar found also in the 5000 year old pyramid and is why the church destroyed the Mayans proof of Jesus far removed from the greatest enemy of Jesus the Catholic Church.

Ancient calendars found around the world are designed to end one point in

time. They communicate an urgent warning to everyone alive today! Complex bronze and gold clocks with multiple dials are found in museums around the world. Why they have such advanced intricacy has stumped scientists for hundreds of years. This book reveals why the ancients built so many pyramids, observatories as well as those complex gold and bronze clocks with more than one dial. It surprised me greatly to discover that their various complex designs in one way or another converge on 21 December 2012. It amazes me that ancient cultures separated by thousands of miles of geography and thousands of years in chronology agree so precisely in the cyclical nature of time, history and prophecy, which is history written in advance. The most famous example is the Mayan-Aztec calendar, which ends its 25,626-year cycle on that momentous date. Some researchers have also found 21 December 2012 in what is called, the Bible Code. Using very different research methods, I discovered it in the Bible's book of Revelation and Daniel's prophecies. It is one of the most important dates in the plan of God for all humanity!

Many centuries ago the ancient Desert Fathers and Mothers moved into the wilderness to leave behind the compulsions of the world and draw near to God. For Mary Lou Kownacki, a Benedictine nun and long-time peacemaker, her wilderness is the inner-city of Erie, Pennsylvania, surrounded by poor families trying to survive and keep hope alive in the midst of drugs, violence, and despair. From this outpost on the margins, she observes the world in poetic meditations, written with the passion of a prophet and the heart of a

mystic. "I write about days when spiritual security, not fear, was a neighborhood's gift to children. I write about the sin of ignoring those who have the same needs we all do but no way to satisfy them. It is one way of trying to stretch my monk's robe until it embraces the suffering world."

THE MAYA BOOK OF LIFE:

UNDERSTANDING THE XULTUN TAROT is the companion book to the Xultun Tarot Classic Edition. It explores the archetypes and alchemy of the major arcana of the Xultun Tarot through indigenous teachings and the analytical psychology of C G Jung and casts new light on the meaning of 2012. The Xultun Tarot was created by Peter Balin in 1976 based on images from Maya history and culture. Taken from a single painting, it is the only tarot deck where the major arcana form a complete picture. This picture is a symbolic image of the alchemical marriage of spirit and matter and a map of what Jung called the individuation process. Only 500 copies of the original Xultun Tarot were ever printed. Now Kahurangi Press (xultun.com) has recreated this classic, long out-of-print deck true to its original large size and vibrant colours together with a book that explains the profound symbolism of the cards. Michael Owen is a clinical psychologist in private practice and author of Jung and the Native American Moon Cycles. He lives in New Zealand.

This is a colorful and captivating tale of self discovery, adventure and exploration, historical reflections, and a vivid portrait of a striving community trying to hang on in one of the harshest climates on planet Earth. In *Elbow Room* you will find Torkildson rubbing shoulders with salty fisherman, historians and archeologists, world renowned explorers, America's Most Wanted, African and Cuban fish processors, ghosts from the past, Aleut artists and Japanese fish masters, a landscape both inhospitable and stunningly beautiful.

Throughout English history the rule of law and the preservation of liberty have been inseparable, and both are intrinsic to England's constitution. This accessible and entertaining history traces the growth of the law from its beginnings in Anglo-Saxon times to the present day. It shows how the law evolved from a means of ensuring order and limiting feuds to become a supremely sophisticated dispenser of justice and the primary guardian of civil liberties. This development owed much to the

English kings and their judiciary, who, in the twelfth century, forged a unified system of law - predating that of any other European country - from almost wholly Anglo-Saxon elements. Yet by the seventeenth century this royal offspring - Oedipus Lex it could be called - was capable of regicide. Since then the law has had a somewhat fractious relationship with that institution upon which the regal mantle of supreme power descended, Parliament. This book tells the story of the common law not merely by describing major developments but by concentrating on prominent personalities and decisive cases relating to the constitution, criminal jurisprudence, and civil liberties. It investigates the great constitutional conflicts, the rise of advocacy, and curious and important cases relating to slavery, insanity, obscenity, cannibalism, the death penalty, and miscarriages of justice. The book concludes by examining the extension of the law into the prosecution of war criminals and protection of universal human rights and the threats posed by over-reaction to national emergencies and terrorism. Devoid of jargon and replete with good stories, *Law, Liberty and the Constitution* represents a new approach to the telling of legal history and will be of interest to anyone wishing to know more about the common law - the spinal cord of the English body politic. Harry Potter is a former fellow of Selwyn College, Cambridge and a practising barrister specialising in criminal defence. He has

authored books on the death penalty and Scottish history and wrote and presented an award-winning series on the history of the common law for the BBC.
