The authors present this art, which has a 7,000 year history, as a product of a civilization wholly different from our own. [Art and Religion in Ancient Egypt](#) Courier Dover Publications  
This book identifies, for the first time since antiquity, the sources and meanings of more than 50 ancient Egyptian symbols, including the Eye of Horus, evil god Seth and his strange head, 10 major crowns, and the symbolic foundations of Osirian mythology,

backbone of ancient Egyptian religion for more than 2000 years. These are paradigm-changing discoveries. Most of them are based on detailed examinations of living examples of ancient Egypt's two sacred flowers - the Blue and the White Waterlilies - and on resurrection texts found in ancient Egyptian tombs. More than 300 detailed illustrations, beautifully presented, make these discoveries easy to understand and appreciate. The book is organized for the general reader and scholar alike. \*Andrew Weil, MD - "Remarkable discoveries that, once seen, are completely obvious. A revelatory work." \*Carol Andrews, Egyptologist, author of "Amulets of Ancient Egypt," at the British Museum for 27 years - "This truly remarkable publication challenges the world of Egyptology to reassess long-held and clearly incorrect theories about the origin and meaning of so many symbols and representational forms which are fundamental to our understanding of ancient Egypt."

The Middle Kingdom (ca. 2030-1650 B.C.) was a transformational period in ancient Egypt, during which older artistic conventions, cultural principles, religious beliefs, and political systems were revived and reimagined. Ancient Egypt Transformed presents a comprehensive picture of the art of the Middle Kingdom, arguably the least known of Egypt's three kingdoms and yet one that saw the creation of powerful, compelling works rendered with great subtlety and sensitivity. The book brings together nearly 300 diverse works— including sculpture, relief decoration, stelae, jewelry, coffins, funerary objects, and personal possessions from the world's leading collections of Egyptian art. Essays on architecture, statuary, tomb and temple relief decoration, and stela explore how Middle Kingdom artists adapted forms and iconography of the Old Kingdom, using existing conventions to create strikingly original works. Twelve lavishly illustrated chapters, each with a scholarly essay and entries on related objects, begin with discussions of the distinctive art that arose in the south during the early Middle Kingdom, the artistic developments that followed the return to Egypt's traditional capital in the north, and the renewed construction of pyramid complexes. Thematic chapters devoted to the pharaoh, royal women, the court, and the vital role of family explore art created for different strata of Egyptian society, while others provide insight into Egypt's expanding relations with foreign lands and the themes of Middle Kingdom literature. The era's religious beliefs and practices, such as the pilgrimage to Abydos, are revealed through magnificent objects created for tombs, chapels, and temples. Finally, the book discusses Middle Kingdom archaeological sites, including excavations undertaken by the Metropolitan Museum over a number of decades. Written by an international team of respected Egyptologists and Middle Kingdom specialists, the text provides recent scholarship and fresh insights, making the book an authoritative resource.

This volume has a dual value; it is a collection of delicate portrayals of ancient Egyptian art, architectural features and sculpture, while also providing an insight into the work of Prisse d'Avennes, a 19th-century Egyptologist who was ahead of his time in realizing the need to record such vulnerable monuments - in a period when the camera had not fully developed, painting and sketches were the only way of doing this. In addition to the colour illustrations, the book includes notes to the plates and an introduction describing the life and work of the author. Rather expensive, but a pleasant experience nevertheless.

*Art for Eternity* UNC Press Books  
Ancient Egypt has always been a source of fascination to writers, artists and architects in the West. This book is the first study to address representations of Ancient Egypt in the modern imagination, breaking down conventional disciplinary boundaries between fields such as History, Classics, Art History, Fashion, Film, Archaeology, Egyptology, and Literature to further a nuanced understanding of ancient Egypt in cultures stretching from the eighteenth century to the present day, emphasising how some of the various meanings of ancient Egypt to modern people have traversed time and media. Divided into three themes, the chapters scrutinise different aspects of the use of ancient Egypt in a variety of media, looking in particular at the ways in which Egyptology as a discipline has influenced representations of Egypt, ancient Egypt's associations with death and mysticism, as well as connections between ancient Egypt and gendered power. The diversity of this study aims to emphasise both the multiplicity and the patterning of popular responses to ancient Egypt, as well as the longevity of this phenomenon and its relevance today.

*The Egyptian Book of Life* Routledge  
Diseases and injuries were major concerns for ancient Egyptians. This book, featuring some sixty-four objects from the Metropolitan Museum, discusses how both practical and magical medicine informed Egyptian art and for the first time reproduces and translates treatments described in the spectacular Edwin Smith Papyrus.
