Othello remains one of Shakespeare's most contemporary and moving plays, with its emphasis on race, revenge, murder, and lost love. Chris Ofili's new edition highlights the tragedy of Othello's plight in ways no other volume of this play has. In twelve etchings Ofili has produced to illustrate this play, Othello is depicted with tears in his eyes, which flow below various scenes visualized in his forehead. Ofili asks us to see in Othello the great injustices that still plague the world today. These images add feeling to Shakespeare's words, and together they form their own hybrid object—something between a book and a visual retelling of the tragedy. With a foreword by the renowned critic Fred Moten, this edition is the first of its kind and puts Othello's blackness and interiority front and center, forcing us to confront the complex world that ultimately dooms him. The first play in the Seeing Shakespeare Series, Othello is illustrated by English contemporary artist Chris Ofili. Future titles in the series include *A Midsummer Night's Dream* illustrated by Marcel Dzama and *The*

*Merchant of Venice* with images by Jordan Wolfson.

Despite a rich history of ethnographic research in Middle Eastern societies, the region is frequently portrayed as marginal to anthropology. The contributors to this volume reject this view and show how the Middle East is in fact vital to the discipline and how Middle Eastern anthropologists have developed

theoretical and methodological tools that address and challenge the region's political, ethical, and intellectual concerns. The contributors to this volume are students of Paul Dresch, an anthropologist known for his incisive work on Yemeni tribalism and customary law. As they expand upon his ideas and insights, these essays ask questions that have long preoccupied anthropologists, such as how do place, point of view, and style combine to create viable bodies of knowledge; how is scholarship shaped by the historical context in which it is located; and why have duration and form become so problematic in the study of Middle Eastern societies? Special attention is given to understanding local terms, contested knowledge claims, what remains unseen and unsaid in social life, and to cultural patterns and practices that persist over long stretches of time, seeming to predate and outlast events. Ranging from Morocco to India, these essays offer critical but sensitive approaches to cultural difference and the distinctiveness of the anthropological project in the Middle East.

looks to each person's last state of innocence—childhood—to recover the ability to truly be curious. Osho discusses why it is important to look to our “inner child” and how it can help you understand the person you have become. Osho challenges readers to examine and break free of the conditioned belief systems and prejudices that limit their capacity to enjoy life in all its richness. He has been described by the Sunday Times of London as one of the “1000 Makers of the 20th Century” and by Sunday Mid-Day (India) as one of the ten people—along with Gandhi, Nehru, and Buddha—who have changed the destiny of India. Since his death in 1990, the influence of his teachings continues to expand, reaching seekers of all ages in virtually every country of the world.

Livio Maitan's *Memoirs of a Critical Communist* tells of the life of a revolutionary communist in the second half of the 20th century. From his early commitment to communism in 1942

under fascism in Italy, Livio chose to be 'against the current' by rejecting both Stalinism and social democracy, and charted a course towards democratic and revolutionary Marxism. His translator, Gregor Benton, writes: Livio Maitan helped inspire the growth of Italian Trotskyism. There was also a wave of Maoism in the 1960s and a debate ensued, to which Livio contributed his book on China, Party, Army, and Masses. I was deeply influenced by it, and I translated it for New Left Books. The book combined criticism of the Chinese Revolution with support. From it, I learned how to write engaged scholarship. Livio could have shone at a leading university had he wanted, but instead he spent most of his life working on a shoestring. In 2002, he wrote this history of the Fourth International to go alongside his autobiography. Translating this new book was a bittersweet experience. Through it, I was able to relive chapter by chapter my wild political youth and my middle age. Livio Maitan's spirit lifts this story from a catalogue of false starts into a chronicle of heroism and

optimism. He died before Black Lives Matter, Me Too, Corbynism, Gilets Jaunes, Extinction Rebellion, and other new struggles, but he paved the way for them. This book shows the road to socialism remains open. The Pocket Emily Dickinson St. Martin's Griffin

Essays on the downsides,

dysfunctions, and dangers of automated decision-making: “An excellent survey of the algorithmically managed life.” —Choice The phone systems that businesses use to screen calls. The link between student standardized test scores and public schools’ access to resources. The algorithms that regulate patient diagnoses and reimbursements to doctors. The impenetrable corporate bureaucracy that can drive customers in need of help up the wall—or drive them to suicide. The storage, sorting, and analysis of massive amounts of information have enabled the automation of decision-making at an unprecedented level. Meanwhile, computers have offered a model of cognition that increasingly shapes our approach to the world. The proliferation of “robotprocesses” is the result, as editors Catherine Besteman and Hugh Gusterson observe in this rich and wide-ranging volume, which features contributions from a distinguished cast of scholars in anthropology, communications, international studies, and political science. Though

automatic processes are designed to be engines of rational systems, the stories in *Life by Algorithms* reveal how they can in fact produce absurd, inflexible, or even dangerous outcomes. Joining the call for “algorithmic transparency,” the contributors bring exceptional sensitivity to everyday sociality into their critique to better understand how the perils of modern technology affect finance, medicine, education, housing, the workplace, food production, public space, and emotions—not as separate problems but as linked manifestations of a deeper defect in the fundamental ordering of our society. “‘The Machine Stops,’ E. M. Forster’s 1909 science fiction story, tells the tale of a human society collapsing when the technology upon which it has become dependent fails. Think of [this] volume as ‘The Machine Starts,’ a collection of unsettling ethnographic accounts of the rise of algorithmic governance . . . A necessary and sobering call to arms.” —Stefan Helmreich, Massachusetts Institute of Technology Contributors include: Catherine

 This book explores the incorporation of untranslated fragments from various languages within modernist writing. It studies non-translation in modernist fiction, poetry, and other forms of writing, with a principally European focus and addresses the following questions: what are the

aesthetic and cultural implications of non-translation for modernist literature? How did non-translation shape the poetics, and cultural politics, of some of the most important writers of this key period? This edited volume, written by leading scholars of modernism, explores American, British, and Irish texts, alongside major French and German writers and the wider modernist recovery of Classical languages. The chapters analyse non-translation from the dual perspectives of both 'insider' and 'outsider', unsettling that false opposition and articulating in the process their individuality of expression and experience. The range of voices explored indicates something of the reach and vitality of the matter of translation--and specifically non-translation--across a selection of poetry, fiction, and non-fictional prose, while focusing on mainly canonical voices. Together, these essays seek to provoke and extend debate on the aesthetic, cultural, political, and conceptual dimensions of non-translation as an important yet hitherto

neglected facet of modernism, thus helping to re-define our understanding of that movement. It demonstrates the rich possibilities of reading modernism through instances of non-translation.
