ICISPE 2019 Edinburgh University Press

Ethnographic research in Pakistan, the Middle East, and the United States helps to explain how transnational working classes from Pakistan are produced in the context of American empire and its War on Terror.

Muslim Students and Pakistan Movement Princeton University Press

We are delighted to introduce the proceedings of the 5th International Conference on Sports, Health, and Physical Education (ISMINA 2021) with the theme "Transformation on Sports, Health and Physical Education Facing the Global Pandemic". This conference has brought researchers, educators and practitioners around the world. The 5th ISMINA 2021 Proceedings contains 75 articles. Consisting of 35 sports-themed articles, 25 health-themed articles, and 15 physical education-themed articles. The 5th ISMINA 2021 collaborates with ICSSPE, APPORI and several leading Indonesian universities in the fields of physical education, sports, and health education. The 5th ISMINA 2021 aims to gather all knowledge and transformation to face the global pandemic in the fields of physical education, health, and sports. Finally, we would like to express our gratitude and appreciation for all committee and the reviewers who helped us maintain the high quality of manuscripts included in the proceedings published by EUDL. Also, we are thankful to all the authors who submitted papers, because of which the conference became a story of success.

Emerging Issues in the Natural and Applied Sciences CRC Press
Class tested by the authors over 3 years, this new Java textbook takes a unique approach to the difficult job of introducing students to programming. There are several unique aspects to the approach taken in this book. First, its sequencing of topics is fresh and innovative and very much in step with current trends. The book is structured into 3 main parts: Structured Programming, Object-based Programming, and Object-oriented Programming. The themes that run through the book instill core programming principles and are: object-oriented programming; concepts rather than syntax; fundamental data modelling, and developing algorithms. The presentation is examples-driven and focuses on problem solving techniques which is an essential pedagogy for a practical subject such as programming. A two semester of this title is also available featuring extra content on applying OOP.

An Enemy We Created World Scientific

The Britannica Book of the Year 2011 provides a valuable viewpoint on the people and events that shaped the year. In addition to keeping the Encyclopaedia Britannica updated, it serves as a great reference source for the latest news on the ever-changing populations, governments, and economies throughout the world.

Pesticide Contamination in Freshwater and Soil Environs Springer Science & Business Media

Taking into consideration that the agricultural industry is greatly dependent on pesticide chemicals to deal with the damage caused due to pests, this new volume details the challenges along with the bioremediation and remediation measures, such as the use of beneficial microorganisms, polymeric nanocomposites for nanoremediation, phytoremediation, and more. It looks at pesticide contamination from agricultural activities in a variety of different environs and a selection of sustainable and eco-friendly remediation approaches. It provides a spectrum of concepts, ideas, and knowledge related to the detrimental actions of pesticides on the environment directly and on human beings indirectly and provides insight into sustainable and advanced pesticide remediation technology. It fills a gap in the available literature in this field and will provide valuable for academicians, researchers, agriculturists, and students.

Deep Currents and Rising Tides Oxford University Press, USA
Hosted by the Faculty of Social and Political Sciences, Universitas Diponegoro - Indonesia, International Conference on Indonesian Social and Political Enquiries (ICISPE) serves as a strategic venue for academicians and practitioners whose interest is Indonesian social and political studies to get interconnected with other academicians and other fields of study. It is also intended to be a venue for scholars from various backgrounds to connect and initiate collaborative and interdisciplinary studies. The papers presented at the ICISPE provide research findings and recommendations that are both directly and indirectly beneficial

for public needs, especially policy makers and practitioners in Indonesia. The 4th ICISPE 2019 was held in the Semarang, Indonesia, bringing up a theme of "People, Nature, and Technology: Promoting Inclusive Environmental Governance in the Era of Digital Revolution" as a response to the current dynamics of social and political issues in this millennial era. This theme aims at looking more closely on how the relations between social and political aspects on development in this region. It is indeed an emerging situation and a robust area for research. Some compelling sub-themes were offered and participated by a great number of presenters and participants including, among others are Social Movement Communication Approach, Global Environmental Issues, Environmental Governance, Millennials and Internet, Green Economy also Culture and Environmental Development. They share their insights, study results, or literature studies on those topics in a very dynamic discussion.

Britannica Book of the Year 2011 Progress IPS LLC

This book, Abdullah bin Abdul Kadir Munshi, is the most comprehensive, multi-disciplinary studies on Abdullah bin Abdul Kadir, widely known as Munshi Abdullah (1796-1854). He was a prominent literary figure and thinker in the Malay world in the 19th century and was also an early 'pioneer' of Singapore. The author, Professor Hadijah Rahmat, has spent more than 25 years studying Munshi Abdullah since her PhD studies in the School of Oriental and African Studies (SOAS), University of London, in 1992 to date. This book is covered in two volumes and is based on her research conducted using unexplored primary sources at several missionaries' archives at SOAS, London, Houghton Library, University Harvard, Library of Congress, Leiden University, KITVL, Holland, and the Perpustakaan Nasional Indonesia, Jakarta. The book consists of numerous academic papers presented at the regional and international seminars, and also published in international journals and as chapters of books. Besides academic papers, the excerpt of play titled Munshi, sketches, poetry, and song, and interviews by the national media are also included. This book provides new insight into Abdullah's life, backgrounds, writings, his influences and legacies and the reactions and thought provoking views of the western and eastern scholars on Abdullah. The book is indeed the key reference for studies on Munshi Abdullah, Malay literature, and the history of Singapore, Malaysia, and colonialism in Southeast Asia.

Islamic Legal Interpretation Cengage Learning EMEA

Terrorism: Commentary on Security Documents is a series that provides primary source documents and expert commentary on the worldwide counter-terrorism effort. Among the documents collected are transcripts of Congressional testimony, reports by such federal government bodies as the Congressional Research Service (CRS) and the Government Accountability Office (GAO), and case law covering issues related to terrorism. Most volumes carry a single theme, and inside each volume the documents appear within topic-based categories. The series also includes a subject index and other indices that guide the user through this complex area of the law. Volume 123, Global Stability and U.S. National Security, includes documents that illuminate instability concerns in key regions of the world and offer insights into how the lack of stability negatively affects U.S. interests, as well as the interests of other nations. The documents selected by Douglas Lovelace include primarily studies of instability concerns in the Middle East and North Africa, as well as a document providing a general assessment of global stability and reports on Southeast and Central Asia and Latin America.

A Muslim Archipelago Duke University Press

Algae Based Polymers, Blends, and Composites: Chemistry, Biotechnology and Material Sciences offers considerable detail on the origin of algae, extraction of useful metabolites and major compounds from algal bio-mass, and the production and future prospects of sustainable polymers derived from algae, blends of algae, and algae based composites. Characterization methods and processing techniques for algae-based polymers and composites are discussed in detail, enabling researchers to apply the latest techniques to their own work. The conversion of bio-mass into high value chemicals, energy, and materials has ample financial and ecological importance, particularly in the era of declining petroleum reserves and global warming. Algae are an important source of biomass since they flourish rapidly and can be cultivated almost everywhere. At present the majority of naturally produced algal biomass is an unused resource and normally is left to decompose. Similarly, the use of this enormous underexploited biomass is mainly limited to food consumption and as bio-fertilizer. However, there is an opportunity here for materials scientists to explore its potential as a feedstock for the production of sustainable materials. Provides detailed information on the extraction of useful compounds from algal biomass

Highlights the development of a range of polymers, blends, and composites Includes coverage of characterization and processing techniques, enabling research scientists and engineers to apply the information to their own research and development Discusses potential applications and future prospects of algae-based biopolymers, giving the latest insight into the future of these sustainable materials

Agindex Springer

The topics covered in this book are selected to teach fundamental programming concepts. This comprehensive version of Java Actually builds a foundation for novice programmers to move on to the more specialised and advanced technologies that use Java. Structured programming (control structures, strings and arrays) and Object-based programming (objects with no inheritance) are covered in the first two Parts so that objects are introduced as soon as possible. This material should be taught in all courses and a shorter version of this book exists to cover just these basics. For those moving onto an intermediary level, the last parts of the book describe OOP (object-oriented programming) concepts and explain how they are applied.

Indonesia Equinox Publishing

Recent events have focused attention on the perceived differences and tensions between the Muslim world and the modern West. As a major strand of Western public discourse has it, Islam appears resistant to internal development and remains inherently pre-modern. However Muslim societies have experienced most of the same structural changes that have impacted upon all societies: massive urbanisation, mass education, dramatically increased communication, the emergence of new types of institutions and associations, some measure of political mobilisation, and major transformations of the economy. These developments are accompanied by a wide range of social movements and by complex and varied religious and ideological debates. This textbook is a pioneering study providing an introduction to and overview of the debates and questions that have emerged regarding Islam and modernity. Key issues are selected to give readers an understanding of the complexity of the phenomenon from a variety of disciplinary perspectives. The various manifestations of modernity in Muslim life discussed include social change and the transformation of political and religious institutions, gender politics, changing legal regimes, devotional practices and forms of religious association, shifts in religious authority, and modern developments in Muslim religious thought.

India and South East Asia Bloomsbury Publishing

This book constitutes the thoroughly refereed post-conference proceedings of the Second International Joint Conference on Knowledge Discovery, Knowledge Engineering, and Knowledge Management, IC3K 2010, held in Valencia, Spain, in October 2010. This book includes revised and extended versions of a strict selection of the best papers presented at the conference; 26 revised full papers together with 2 invited lectures were carefully reviewed and selected from 369 submissions. According to the three covered conferences KDIR 2010, KEOD 2010, and KMIS 2010, the papers are organized in topical sections on knowledge discovery and information retrieval, knowledge engineering and ontology development, and on knowledge management and information sharing.

Java Actually Course Technology

The book traces India's links with countries of South East Asia, and examines why stability in that region is important for India. After an analysis of the modern concept of security, threats to each country of South East Asia and to the region are considered. The interest of foreign powers in the region and India's engagement, both bilaterally with individual countries and with the regional groupings, are covered in detail. A suggested comprehensive Action Plan has been included, which India can adopt for the period till 2035, to strengthen the 'Look East' Policy. **Jihadi Terrorism and the Radicalisation Challenge in Europe** Routledge

Political Islam and Violence in Indonesia presents a penetrating new investigation of religious radicalism in the largest Muslim country in the world. Indonesia is a country long known for its diversity and tolerant brand of Islam. However, since the fall of Suharto, a more intolerant form of Islam has been growing, one whose adherents have carried out terrorist attacks, waged sectarian war, and voiced strident anti-Western rhetoric. Zachary Abuza's unique analysis of radical Islam draws upon primary documents such as Jemaah Islamiyah's operations manual, interviews, and recorded testimonies of politicians, religious figures, and known militants, as well as personal interviews with numerous security and intelligence experts in Indonesia and elsewhere, to paint a picture at once guardedly optimistic about

the future of Indonesian democracy and concerned about the increasing role of conservative and radical Islam in Indonesian society. This book will be of great interest to students of Indonesian politics, Asian studies, political violence and security studies in general.

The Bulletin Ashgate Publishing, Ltd.

To this day, the belief is widespread that the Taliban and al-Qaeda are synonymous, that their ideology and objectives are closely intertwined, and that they have made common cause against the West for decades. In *An Enemy We Created*, Alex Strick van Linschoten and Felix Kuehn debunk this myth and reveal the much more complex reality that lies beneath it. Drawing upon their unprecedented fieldwork in Afghanistan, as well as their Arabic, Dari, and Pashtu skills, the authors show that the West's present entanglement in Afghanistan is predicated on the false assumption that defeating the Taliban will forestall further terrorist attacks worldwide. While immersing themselves in Kandahar society, the authors interviewed Taliban decision-makers, field commanders, and ordinary fighters, thoroughly exploring the complexity of the relationship between the Taliban and al-Qaeda and the individuals who established both groups. They show that from the mid-1990s onward, the Taliban and al-Qaeda diverged far more often than they converged. They also argue that this split creates an opportunity to engage the Taliban on two fundamental issues: renouncing al-Qaeda and guaranteeing that Afghanistan will not be a sanctuary for international terrorists. Yet the insurgency is changing, and it could soon be too late to find a political solution. The authors contend that certain aspects of the campaign in Afghanistan, especially night raids, the killings of innocent civilians, and attempts to fragment and decapitate the Taliban are having the

unintended consequence of energizing the resistance, creating more opportunities for al-Qaeda, and helping it to attain its objectives. The first book to fully untangle the myths from the realities in the relationship between the Taliban and al-Qaeda, *An Enemy We Created* is essential reading for anyone who wants to understand what's really happening in Afghanistan.

Global Stability and U.S. National Security Springer Nature Southeast Asia continues to beckon policymakers and scholars alike to revisit its history in spite of the tomes of appraisals already written, deconstructive or otherwise. Because of a significant presence of Muslims in the region, and particularly in the wake of 9/11, it invariably attracts the attention of foreign powers drawn by the specter of terrorism and focused on rooting out radical Islamist groups said to be working with al-Qaeda. Dr. Max Gross has written an impressive account of the role of Islam in the politics of Southeast Asia, anchored by a strong historical perspective and a comprehensive treatment of current affairs. The result is very much a post-9/11 book. The origins of Jemaah Islamiyah and its connections with al-Qaeda are carefully detailed. Yet, unlike much of the post-9/11 analysis of the Muslim world, Dr. Gross's research has been successful in placing the phenomenon of terrorism within a larger perspective. While recognizing that al-Qaeda's influence on regional terror networks remains unclear, it behooves us to be reminded that, regardless of the nature and extent of the linkages, to dismiss terrorism as a serious threat to security would be naive to the point of recklessness. The Muslim Archipelago is a profoundly Islamic region, and Jemaah Islamiyah is only a small portion of this reality. The attention Dr. Gross pays to ABIM in Malaysia, of which I was a part, and the civil Islam movement in Indonesia, of which

the late Nurcholish Madjid was a principal spokesman, is greatly appreciated. Those unfamiliar with the background and role of the traditional Islamic PAS party in Malaysia, as well as the Darul Islam movement in Indonesia, will find the author's account highly beneficial. The MRLF, the MILF, and Abu Sayyaf in the Philippines, as well as the various Islamic movements in southern Thailand, are also carefully explained.

ISMINA 2021 European Alliance for Innovation

This book critically analyses the specific threat of terrorism in Southeast Asia since the Bali blasts of 12 October 2002 and the US-led war on Iraq. It offers a comprehensive and critical examination of the ideological, socioeconomic and political motivations, trans-regional linkages, and media representations of the terrorist threat in the region, assesses the efficacy of the regional counter-terror response and suggests a more balanced and nuanced approach to combating the terror threat in Southeast Asia. The contributors include leading scholars of political Islam in the region, renowned terrorism and regional security analysts, as well as highly regarded regional journalists and commentators. This represents a formidable and unequalled combination of expertise.

Java Actually European Alliance for Innovation

Focusing on the situation of jihadi terrorism and radicalization in Europe, this volume looks at the growing tendency of self-radicalization and self-recruitment of individuals. It provides both a precise state of the threat as well as a thorough analysis of the radicalization process.
