Does modelling, formal or otherwise, play a role in designing interactive systems? A proliferation of interactive devices and technologies is used in an ever increasing diversity of contexts and combinations in professional and every-day life. This development poses a significant challenge to modelling approaches used for the design of interactive systems. The papers in this volume discuss a range of modelling approaches, the representations they use, the strengths and weaknesses of their associated specification and analysis techniques and their

role in supporting the design of interactive systems.

How and what to teach about religion is controversial in every country. The Routledge International Handbook of Religious Education is the first book to comprehensively address the range of ways that major countries around the world teach religion in public and private educational institutions. It discusses how three models in particular seem to dominate the landscape. Countries with strong cultural traditions focused on a majority religion tend to adopt an "identification model," where instruction is provided only in the tenets of the majority religion, often to the detriment of other religions and their adherents. Countries with traditions that differentiate church and state tend to adopt a "separation model," thus either offering instruction in a wide range of religions, or in some cases teaching very little about religion, intentionally leaving it to religious institutions and the home setting to provide religious instruction. Still other countries attempt "managed pluralism," in which neither one, nor many, but rather a limited handful of major religious traditions are taught. Inevitably, there are countries which do not fit any of these dominant models and the range of methods touched upon in this book will surprise even the most enlightened reader. Religious instruction by educational institutions in 53 countries and regions of the world are explored by experts native to each country. These chapters discuss: Legal parameters in terms of subjective versus objective instruction in religion Constitutional, statutory, social and political contexts to religious approaches Distinctions between the kinds of instruction permitted in elementary and secondary schools versus what is allowed in institutions of higher learning. Regional assessments which provide a welcome overview and comparison. This comprehensive

and authoritative volume will appeal to educators, scholars, religious leaders, politicians, and others interested in how religion and education interface around the world.

"Microbiology covers the scope and sequence requirements for a single-semester microbiology course for non-majors. The book presents the core concepts of microbiology with a focus on applications for careers in allied health. The pedagogical features of the text make the material interesting and accessible while maintaining the career-application focus and scientific rigor inherent in the subject matter. Microbiology's art program enhances students' understanding of concepts through clear and effective illustrations, diagrams, and photographs. Microbiology is produced through a collaborative publishing agreement between OpenStax and the American Society for Microbiology Press. The book aligns with the curriculum guidelines of the American Society for Microbiology."--BC Campus website.

In the past decade, few subjects at the intersection of medicine and sports have generated as much public interest as sports-related concussions - especially among youth. Despite growing awareness of sports-related concussions and campaigns to

educate athletes, coaches, physicians, and parents of young athletes about concussion recognition and management, confusion and controversy persist in many areas. Currently, diagnosis is based primarily on the symptoms reported by the individual rather than on objective diagnostic markers, and there is little empirical evidence for the optimal degree and duration of physical rest needed to promote recovery or the best timing and approach for returning to full physical activity. Sports-Related Concussions in Youth: Improving the Science, Changing the Culture reviews the science of sports-related concussions in youth from elementary school through young adulthood, as well as in military personnel and their dependents. This report recommends actions that can be taken by a range of audiences - including research funding agencies, legislatures, state and school superintendents and athletic directors, military organizations, and equipment manufacturers, as well as youth who participate in sports and their parents - to improve what is known about concussions and to reduce their occurrence. Sports-Related Concussions in Youth finds that while some studies provide useful information, much remains unknown about the extent of concussions in youth; how to diagnose, manage, and prevent concussions; and the short- and long-term consequences of concussions as well as repetitive head impacts that do not result in concussion symptoms. The culture of sports negatively influences athletes' self-reporting of concussion symptoms and their adherence to return-to-play guidance. Athletes, their teammates, and, in some cases, coaches and parents may not fully appreciate the health threats posed by concussions. Similarly, military recruits are immersed in a culture that includes devotion to duty and service before self, and the critical nature of concussions may often go unheeded. According to Sports-Related Concussions in Youth, if the youth sports community can adopt the belief that concussions are serious injuries and emphasize care for players with concussions until they are fully recovered, then the culture in which these athletes perform and compete will become much safer. Improving understanding of the extent, causes, effects, and prevention of sports-related concussions is vitally important for the health and well-being of youth athletes. The findings and recommendations in this report set a direction for research to reach this goal.

Bangladesh is committed to achieving universal health coverage (UHC) by 2032; to this end, the government of Bangladesh is exploring policy options to increase fiscal space for health and expand coverage while improving service quality and availability. Despite Bangladesh's impressive strides in improving its economic and social development outcomes, the government still confronts health financing and service delivery challenges. In its

review of the health system, this study highlights the limited fiscal space for implementing UHC in Bangladesh, particularly given low public spending for health and high out-of-pocket expenditure. The crisis in the country's human resources for health (HRH) compounds public health service delivery inefficiencies. As the government explores options to finance its UHC plan, it must recognize that reform of its service delivery system with particular focus on HRH has to be the centerpiece of any policy initiative.

South Asia has long been synonymous with persistent and unusually high rates of child undernutrition—the so-called Asian enigma. Yet contrary to this stereotype, Bangladesh has managed to sustain a rapid reduction in the rate of child undernutrition for at least two decades. In this paper we aim to understand the sources of this unheralded success with the aspiration of deriving policy-relevant lessons from Bangladesh's experience. To do so we employ a regression analysis of five rounds of Demographic and Health Surveys covering the period from 1997 to 2011.

IgG4-Related Sclerosing Cholangitis YOUTH COMPETITION TIMES

Abstract: Using a recent household survey for two cohorts of married women, this paper examines norms about gender equality in education for children and adults. Among the main findings are that gender education gap norms have changed: younger generations of women are more positive about female vs. male education, both as pertaining to child and adult education outcomes. Perhaps the strongest result is that Bangladeshi women are more likely to espouse attitudes of gender equality in education for their children and less so about gender equality among spouses. It is also easier to explain norms

regarding children's education and more difficult to explain norms about equality in marriages. The authors believe that question on relative education of boys and girls captures the value of education per se, while the question on educational equality in marriage captures the norms regarding marriage and the relative worth of husbands and wives. The effect of education in determining norms is significant though complex, and spans own and spousal education, as well as that of older females in the household. This indicates sharing of education norms effects or externalities arising from spousal education in the production of gender education gap norms within marriage as well as arising from the presence of older educated females in the household. Lastly, the authors also find associations between gender education gap norms and household poverty, information processing and religion, though the evidence here is more mixed.

Basic Civil Engineering YOUTH COMPETITION TIMES

In recent times, there has been intense global interest on and scrutiny of Islamic education. In reforming Islamic schools, what are the key actions initiated and are they contested or negotiated by and among Muslims? This edited collection brings together leading scholars to explore current reforms in Islamic schools. Drawing together international case studies, *Reforms in Islamic Education* critically discusses the reforms, considering the motivations for them, nature of them and perceptions and experiences of people affected by them. The contributors also explore the tensions, resistance, contestations and negotiations between Muslims and non-Muslims, and among Muslims, in relation to the reforms. Highlighting the need to understand and critique reforms in Islamic schools within broad historical, political and socio-cultural contexts, this book is a valuable resource for academics, policymakers and educators.

Sports-Related Concussions in Youth Intl Food Policy Res Inst

This book aims to raise awareness of IgG4-related sclerosing

cholangitis among practicing physicians and to equip readers with a sound understanding of the principles of diagnosis and treatment. Clinical, serological, and histopathological features are clearly described and imaging appearances on all relevant modalities are illustrated, covering the bile duct and other involved organs. Differential diagnosis from other diseases, including primary sclerosing cholangitis and cholangiocarcinoma, is precisely explained. Information is then presented on all significant current and emerging therapeutic strategies, including steroids, immunosuppressive drugs, and rituximab. Finally, attention is drawn to significant prognostic features. While IgG4-related sclerosing cholangitis is now a widely acknowledged condition, most practitioners are still liable to misdiagnose it owing to a lack of familiarity with its presenting features. This book should help to rectify the situation and will be an asset for all who may encounter the disease in clinical practice.

Gresham's Law and Beyond YOUTH COMPETITION TIMES

This book presents new scientific knowledge on using developmental science to improving lives of children and youth across the globe. It highlights emerging pathways to sustainability as well as the interconnectedness and interdependence of developmental science and sustainable children and youth development globally. Presenting cross-cultural views and current perspectives on the role of developmental science in the realization of the Sustainable Development Goals for children and youth development, contributors from different disciplines from low-and-middle-income countries or scholars working in these countries capture ground realities of the situation of children and youth in these regions. This book addresses developmental issues related to inequity, gender, health, education, social protection, and needs of vulnerable populations of children and youth. Other areas of focus are improving mechanisms and monitoring frameworks of development and well-being indicators.

Quality Physical Education (QPE) JAYPEE BROTHERS PUBLISHERS

This updated second edition of *Acute Ischemic Stroke: Imaging and Intervention* provides a comprehensive account of the state of the art in the diagnosis and treatment of acute ischemic stroke. The basic format of the first edition has been retained, with sections on fundamentals such as pathophysiology and causes, imaging techniques and interventions. However, each chapter has been revised to reflect the important recent progress in advanced neuroimaging and the use of interventional tools. In addition, a new chapter is included on the classification instruments for ischemic stroke and their use in predicting outcomes and therapeutic triage. All of the authors are internationally recognized experts and members of the interdisciplinary stroke team at the Massachusetts General Hospital and Harvard Medical School. The text is supported by numerous informative illustrations, and ease of reference is ensured through the inclusion of suitable tables. This book will serve as a unique source of up-to-date information for neurologists, emergency physicians, radiologists and other health care providers who care for the patient with acute ischemic stroke.

The field of design research has been gaining momentum over the last five years, particularly in educational studies. As papers and articles have grown in number, definition of the domain is now beginning to standardise. This book fulfils a growing need by providing a synthesised assessment of the use of development research in education. It looks at four main elements: background information including origins, definitions of development research, description of applications and benefits and risks associated with studies of this kind how the approach can serve the design of learning environments and educational technology quality assurance - how to safeguard academic rigor while conducting design and development studies a synthesis and overview of the topic along with relevant reflections.
