student test scores to evaluate teachers and schools, as well as students themselves. The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests, such as in mathematics or English/language arts with a focus on grades 4-8. Teachers in these subject areas, however, constitute less than thirty percent of the teacher

workforce in a district. Comparatively little has been written about the measurement of achievement in the other grades and subjects. This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas, with particular attention to their use in the evaluation of teachers and schools in all. It addresses

traditional end-of-course tests, as well as alternative measures such as portfolios, exhibitions, and student learning objectives. In each case, issues related to design and development, psychometric considerations, and validity challenges are covered from both a generic and a content-specific perspective. The NCME Applications of Educational Measurement and Assessment series includes edited

volumes designed to inform research-based applications of educational measurement and assessment. Edited by leading experts, these books are comprehensive and practical resources on the latest developments in the field. The NCME series editorial board is comprised of Michael J. Kolen, Chair; Robert L. Brennan; Wayne Camara; Edward H. Haertel; Suzanne Lane; and Rebecca Zwick. *The Oxford Handbook of Historical Institutionalism* Wm. B. Eerdmans Publishing

Designed for students to use in the classroom or at home to study and prepare for the New York State Regents exam on global studies. [Yearbook of International Organizations 2014-2015, Volumes 1a & 1b \(Set\)](#) Beacon Press

The industrial revolution was the single most important development in human history over the past three centuries, and it continues to shape the contemporary world. With new methods and organizations for producing goods, industrialization altered where people live, how they play, and even how they define political issues. By exploring the ways the industrial revolution reshaped world history, this book offers a

unique look into the international factors that started the industrial revolution and its global spread and impact. In the fourth edition, noted historian Peter N. Stearns continues his global analysis of the industrial revolution with new discussions of industrialization outside of the West, including the study of India, the Middle East, and China. In addition, an expanded conclusion

contains an examination of the changing contexts of industrialization. The Industrial Revolution in World History is essential for students of world history and economics, as well as for those seeking to know more about the global implications of what is arguably the defining socioeconomic event of modern times. The Social Studies Curriculum Routledge The New

Testament gospels feature numerous social exchanges between Jesus and people with various physical and sensory disabilities. Despite this, traditional biblical scholarship has not seen these people as agents in their own right but existing only to highlight the actions of Jesus as a miracle worker. In this study, Louise A. Gosbell uses disability as a lens through which

to explore a number of these passages anew. Using the cultural model of disability as the theoretical basis, she explores the way that the gospel writers, as with other writers of the ancient world, used the language of disability as a means of understanding , organising, and interpreting the experiences of humanity. Her investigation highlights the ways in which the gospel writers

reinforce and reflect, as well as subvert, culturally-driven constructions of disability in the ancient world.

Uncover the truth about the scandal that shook the Texas Baptist community, buried for over a century. In 1894 Steen Morris raped Antônia Teixeira. Both had been guests in the house of Baylor University

president Rufus Burleson. The assault took place in Burleson's backyard and was the first of a series of assaults that eventually left the young Baylor student pregnant. Rather than hold the guilty party accountable, Rufus Burleson and other prominent members of the Baptist community in Waco launched a campaign of intimidation, victim-blaming, and cover-up to

preserve the virtuous image of their institution. In *Remembering Antônia Teixeira*, Mikeal C. Parsons and João B. Chaves painstakingly peel back the layers of concealment that have accumulated over a century of enforced silence about the case. Beginning with Antonia's father Antônio Teixeira, a priest who had renounced Catholicism and become a pillar of the Baptist community in Brazil, Parsons

and Chaves uproot romanticized and hagiographical accounts of the Southern Baptist Convention's foreign missions. They then follow Antônia's journey north, her assault, and the subsequent scandal that shook Texas—until it was intentionally erased. Iconoclastic and meticulous, *Remembering Antônia Teixeira* calls attention to how religious institutions

have used selective memory to maintain power. In doing so, this book takes a first step toward dismantling those structures of oppression. **Diaspora's Homeland** Springer
In this book, extended case studies of two veteran teachers and their students are combined with the extant research literature to explore current issues of teaching, learning, and testing U.S.

history. It is among the first to examine these issues together and in interaction. While the two teachers share several similarities, the teaching practices they construct could not be more different. To explore these differences, the author asks what their teaching practices look like, how their instruction influences their students' understanding of history, and what role statewide exams play in

their classroom decisions. History Lessons: Teaching, Learning, and Testing in U.S. High School Classrooms is a major contribution to the emerging body of empirical research in the field of social studies education, chiefly in the subject area of history, which asks how U.S. students make sense of history and how teachers construct their classroom practices. Three case

study chapters are paired with three essay review chapters intended to help readers analyze the cases by looking at them in the context of the current research literature. Two concluding chapters extend the cases and analyses: the first looks at how and why the teachers profiled in this book construct their individual teaching practices, in terms of three distinct but

<p>interacting sets of influences--personal, organizational, and policy factors; the second explores the prospects for promoting what the author defines as ambitious teaching and learning. Many policymakers assume that standards-based reforms support the efforts of ambitious teachers, but until we better understand how they and the students in their classes think and act, that assumption is</p>	<p>hollow at best. This book is a must have for faculty and students in the field of social studies education, and broadly relevant across the fields of curriculum studies and educational policy. <i>Barron's Passware</i> Barrons Educational Series New York Times Bestseller Now part of the HBO docuseries "Exterminate All the Brutes," written and directed by</p>	<p>Raoul Peck Recipient of the American Book Award The first history of the United States told from the perspective of indigenous peoples Today in the United States, there are more than five hundred federally recognized Indigenous nations comprising nearly three million people, descendants of the fifteen million Native people who once inhabited this land. colonial regimen has largely been omitted from history. Now, for the first time, acclaimed historian and activist Roxanne Dunbar-Ortiz offers a history of the United States told from the perspective of Indigenous peoples and reveals how Native Americans, for centuries, actively resisted expansion of the US empire. With growing support for movements such as the

campaign to abolish Columbus Day and replace it with Indigenous Peoples' Day and the Dakota Access Pipeline protest led by the Standing Rock Sioux Tribe, An Indigenous Peoples' History of the United States is an essential resource providing historical threads that are crucial for understanding the present. In An Indigenous Peoples' History of the United States, Dunbar-Ortiz adroitly

challenges the founding myth of the United States and shows how policy against the Indigenous peoples was colonialist and designed to seize the territories of the original inhabitants, displacing or eliminating them. And as Dunbar-Ortiz reveals, this policy was praised in popular culture, through writers like James Fenimore Cooper and Walt Whitman, and in the highest offices

of government and the military. Shockingly, as the genocidal policy reached its zenith under President Andrew Jackson, its ruthlessness was best articulated by US Army general Thomas S. Jesup, who, in 1836, wrote of the Seminoles: "The country can be rid of them only by exterminating them." Spanning more than four hundred years, this classic bottom-up

peoples' history radically reframes US history and explodes the silences that have haunted our national narrative. An Indigenous Peoples' History of the United States is a 2015 PEN Oakland-Josephine Miles Award for Excellence in Literature. India in Maps Routledge Global rankings and the Geopolitics of Higher Education is an examination of the impact and influence

that university rankings have had on higher education, policy and public opinion in recent years. Bringing together some of the most informed authorities on this very complex issue, this edited collection of specially commissioned chapters examines the changes affecting higher education and the implications for society and the economy. Split into four

interrelated sections, this book covers: The development of rankings in higher education, how they have impacted upon both the production of knowledge and its geography, and their influence in shaping policymaking. Overviews of the significance of rankings for higher education systems in Europe, Asia, Africa, Russia, South America, India and North America. An	analysis of rankings in relation to key concerns that pervade contemporary higher education. Examination of the role rankings are likely to play in the future directions for higher education. This is a significant scholarly work that analyses in depth an important development in higher education systems, and which is likely to have an important influence upon how we understand	the higher education policy-making process - past, present and future. It provides new analysis and conceptual understanding for researchers, and firm evidence for policy makers to use when addressing the value of rankings in measuring the quality of their institutions. Besides bringing together a powerful cast of academics, this book incorporates contributions from heads of important

international higher education organisations – from both those involved in making and also in administering key decisions. This timely, reflective and accessible book forms crucial reading for those studying the subject of rankings, as well as the broader implications and unintended consequences of rankings on national higher education policies. Extending beyond

academic researchers and students, this book will also be of significant interest to policymakers, higher education leaders and key stakeholders. **Japanese Imperialism: Politics and Sport in East Asia** Simon and Schuster This perennial bestseller is the resource you can rely on to help you select--and get into--the graduate clinical or counseling psychology programs that meet your

Global History and Geography University of Pennsylvania Press This cutting edge collection presents a political reading of the power of modern sport in Asia. Providing an interdisciplinary study of political and cultural tensions in Asia, past and

present, through the key case-study of sport, it illuminates the complex practices and legacies of Japanese imperialism across East and Southeast Asia through the 20th century and beyond. Focusing on the deep background to contemporary dynamics of intraregional tensions, it examines sport both as a tool of imperialism and as an agent of reconciliation as the region gears up to

the 2020 Olympics in Tokyo. Offering a unique contribution to East Asian Studies, Colonial and Postcolonial Studies and Sport Studies, this work represent key reading for students and scholars of East Asian studies, International Politics and Sports Diplomacy. The Age of Intoxication Oxford University Press The Oxford Handbook of Historical Institutionalism

offers an authoritative and accessible state-of-the-art analysis of the historical institutionalism research tradition in Political Science. Devoted to the study of how temporal processes and events influence the origin and transformation of institutions that govern political and economic relations, historical institutionalism has grown considerably in the last two decades. With its attention to past, present,

and potential future contributions to the research tradition, the volume represents an essential reference point for those interested in historical institutionalism. Written in accessible style by leading scholars, thirty-eight chapters detail the contributions of historical institutionalism to an expanding array of topics in the study of comparative, American, European, and

international politics. *iDisrupted* Routledge Restaging the Past is the first edited collection devoted to the study of historical pageants in Britain, ranging from their Edwardian origins to the present day. Across Britain in the twentieth century, people succumbed to 'pageant fever'. Thousands dressed up in historical costumes and performed scenes from the history of the places where they lived, and hundreds of thousands more watched them. These pageants were one of the most significant aspects of popular engagement with the past between the 1900s and the 1970s: they took place in large cities, small towns and tiny villages, and engaged a whole range of different organised groups, including Women's Institutes, political parties, schools, churches and youth organisations. Pageants were community events, bringing large numbers of people together in a shared celebration and performance of the past; they also involved many prominent novelists, professional historians and other writers, as well as featuring repeatedly in popular and highbrow literature. Although the

pageant tradition has largely died out, it deserves to be acknowledged as a key aspect of community history during a period of great social and political change. Indeed, as this book shows, some traces of 'pageant fever' remain in evidence today.

The history of Vietnam prior to the nineteenth

century is rarely examined in any detail. In this groundbreaking work, K. W. Taylor takes up this challenge, addressing a wide array of topics from the earliest times to the present day - including language, literature, religion, and warfare - and themes - including Sino-Vietnamese relations, the interactions of the peoples of different regions within the country, and the various forms

of government adopted by the Vietnamese throughout their history. A History of the Vietnamese is based on primary source materials, combining a comprehensive narrative with an analysis which endeavours to see the Vietnamese past through the eyes of those who lived it. Taylor questions long-standing stereotypes and clichés about Vietnam, drawing attention to

sharp discontinuities in the Vietnamese past. Fluently written and accessible to all readers, this highly original contribution to the study of Southeast Asia is a landmark text for all students and scholars of Vietnam. Cannabis Barron's Educational Series Focusing on the Constitution and how it was tested during the Civil War, this review also explores

industrialization of the United States, the Great Depression, the New Deal, the Cold War, and the state of the nation through the end of the Clinton administration . A History of the Vietnamese Springer Volume 1 (A and B) covers international organizations throughout the world, comprising their aims, activities and events. **The Untold History of Ramen** University of

California Press This fully revised and updated edition includes twelve new chapters on contemporary topics such as ecological democracy, Native studies, inquiry teaching, and Islamophobia. The Social Studies Curriculum, Fourth Edition updates the definitive overview of the issues teachers face when creating learning experiences for students in social studies.

The book connects the diverse elements of the social studies curriculum—civic, global, social issues—offering a unique and critical perspective that separates it from other texts. Completely updated, this book includes twelve new chapters on the history of the social studies; democratic social studies; citizenship education; anarchist inspired transformative social studies;

patriotism; ecological democracy; Native studies; inquiry teaching; Islamophobia; capitalism and class struggle; gender, sex, sexuality, and youth experiences in school; and critical media literacy. All the chapters from the previous edition have been thoroughly revised and updated, including those on teaching social studies in the age of curriculum standardization

and high-stakes testing, critical multicultural social studies, prejudice and racism, assessment, and teaching democracy. Readers are encouraged to reconsider their assumptions and understanding about the origins, purposes, nature, and possibilities of the social studies curriculum. E. Chan develops the concept of “diaspora moments”—a series of recurring disjunctions in which migrant temporalities

come into tension with local, national, and global ones—to map the multiple historical geographies in which the Chinese homeland and diaspora emerge. Chan describes several distinct moments, including the lifting of the Qing emigration ban in 1893, intellectual debates in the 1920s and 1930s about whether Chinese emigration constituted colonization and whether

Confucianism should be the basis for a modern Chinese identity, as well as the intersection of gender, returns, and Communist campaigns in the 1950s and 1960s. Adopting a transnational frame, Chan narrates Chinese history through a reconceptualization of diaspora to show how mass migration helped establish China as a nation-state within a global

system.
