Against the backdrop of the global financial crisis and rising food, fuel, and commodity prices, addressing

poverty and inequality in the Philippines remains a challenge.

The proportion of households living below the official poverty line has declined slowly and unevenly in the past four decades, and poverty reduction has been much slower than in neighboring

countries such as the People's Republic of China, Indonesia, Thailand, and Viet Nam. Economic growth has gone through boom and bust cycles, and recent episodes of moderate economic expansion have had limited impact on the poor. Great inequality across income brackets, regions, and sectors, as well as unmanaged population growth, are considered some of the key factors constraining poverty reduction efforts. This publication analyzes the causes of poverty and recommends ways to accelerate poverty reduction and achieve more inclusive growth. It also provides an overview of current government responses, strategies, and achievements in the fight against poverty

and identifies and prioritizes future needs and interventions. The analysis is based on current literature and the latest available data, including the 2006 Family Income and Expenditure Survey.

Drawing on the findings from responses to a survey conducted in 2008/09 from 114 central banks worldwide (of which 33 are in Africa), this paper aims to better understand how central banks and other national institutions regulate and collect data and other information on cross-border remittance flows. Findings indicate that, although the vast majority of countries,

in both sending and receiving countries, collect data on remittances, and 43 percent of receiving countries estimate informal remittances, there is a need for more frequent and better coordinated data collection, both across national institutions and among different divisions within the same national institution, as well as between countries. Survey results also indicate that many new market entrants transfer activities are unregulated. Countries must take into account new channels and technologies, such as mobile phone service providers, in monitoring remittance flows. It will be important for national regulatory authorities

to work closely with mobile telecoms network operators to strike the right regulatory balance, to better understand these new channels associated risks and fully tap their potential for fostering inexpensive, efficient remittance transfer services. The high cost of transfers was cited in the survey as the top factor inhibiting migrants from using formal channels. Many countries, particularly in Africa, have made progress in rendering exclusivity contracts illegal, which helps increase competitiveness and reduce transfer costs. But further policy reforms and initiatives are needed to address the high costs of remittances. The joint African Development

Bank-World Bank Africa Migration Project and G-8 Global Remittances Working Group provided partial funding support for this study.

Migration for work is an important livelihood option for many households in Tajikistan due to limited job opportunities. Remittances from migrant workers significantly supplement the country's foreign currency reserves, but the economic crisis and worldwide shutdown induced by the coronavirus disease (COVID-19) have caused international migration flows to fall, and remittances are projected to decline significantly. This

publication reviews the state of international migration out of Tajikistan and identifies the impact of COVID-19 on the movement of people and migrant workers, in particular. It also reviews international best practices and proposes appropriate predeparture programs, post-return services for Tajik migrants, and ways to address migrate worker issues related to the pandemic.

The Organisation for

Economic Co-operation and Development (OECD)'s Co-operative Research Programme on Biological Resource Management for Sustainable Agricultural Systems sponsored the AHEAD 2017 workshop, bringing together experts from the farming and pharmaceutical industries, information and communications technology, policy, research (and more) to create a roadmap to the digital transformation of animal health surveillance. In many countries, policy supports the reduction of antibiotic use and a growing focus in the veterinary practice is to move away from blanket dosage of antibiotics, for example for mastitis. Significant

and speedy improvements can take place, but only with coordinated actions supported by the entire value chain. Reducing the use of antibiotics is of massive societal importance, but changing on farm or veterinary methods requires thought and a user-centred approach. The most glaring and addressable challenge is the absence of near real-time data and information. AHEAD 2017 explored how governments globally can benefit from increased digitisation in animal health. For effective monitoring, it is important to first understand the relevant tasks of each stakeholder in the food value chain. In these proceedings we openly discuss and define these tasks, identify

existing challenges to completion of these tasks, and suggest the business opportunities overcoming these challenges can create. Through this publication, it is our intention to encourage open discussion, design and co-creation of an improved digital approach to animal health and drug usage in agriculture. The Workshop was sponsored by the OECD Co-operative Research Programme on Biological Resource Management for Sustainable Agricultural Systems, whose financial support made it possible for most of the invited speakers to participate in the Workshop. The opinions expressed and arguments employed in this publication are

the sole responsibility of the authors and do not necessarily reflect those of the OECD or of the governments of its Member countries.

A comprehensive and timely examination of the history and current status of immigrants and refugees—their stories, the events that led to their movement, and the place of these movements in

contemporary history and politics. *Immigration and Asylum: From 1900 to the Present* is an accessible and up-to-date introduction to the key concepts, terms, personalities, and real-world issues associated with the surge of immigration from the beginning of the 20th century to the present. It focuses on the United States, but is also the first encyclopedic work on the subject that reflects a truly global perspective. With contributions from the world's foremost authorities on the subject, *Immigration and Asylum* offers nearly 200 entries organized around four themes: immigration and asylum; the major migrating groups around the world;

expulsions and other forced population movements; and the politics of migration. In addition to basic entries, the work includes in-depth essays on important trends, events, and current conditions. There is no better resource for exploring just how profoundly the voluntary and forced movement of asylum seekers and refugees has transformed the world—and what that transformation means to us today. *Caring for the 'Holy Land'* University of Toronto Press "Toxic Legacy will stand shoulder to shoulder with Rachel Carson's *Silent Spring*. Glyphosate is the active ingredient in Roundup, the most commonly used weedkiller in the world. Nearly 300 million pounds of glyphosate-based herbicide are sprayed on farms—and

food—every year. Agrochemical companies claim that glyphosate is safe for humans, animals, and the environment. But emerging scientific research on glyphosate's deadly disruption of the gut microbiome, its crippling effect on protein synthesis, and its impact on the body's ability to use and transport sulfur—not to mention several landmark legal cases—tells a very different story. In *Toxic Legacy*, senior research scientist Stephanie Seneff, PhD, delivers compelling evidence based on countless published, peer-reviewed studies—all in frank, illuminating, and always accessible language. Throughout *Toxic Legacy* readers

will discover: The uniquely toxic nature of glyphosate How glyphosate disrupts the microbiome, leading to gut dysbiosis, autoimmunity, neurodegeneration, and more Why we're seeing a rise in non-alcoholic fatty liver disease, infertility, depression, and anxiety Glyphosate's role in soil degeneration, water contamination, and threats to wildlife and biodiversity Important nutritional guidance for conscientious consumers who want to avoid glyphosate-contaminated foods and improve their health As Rachel Carson did with DDT in the 1960's, Stephanie Seneff sounds the alarm on glyphosate, giving you guidance on simple, powerful

Privatization, Law, and the Challenge to Feminism Asian Development Bank Since the cessation of major combat operations in Iraq, approximately 120 people - either contract workers or private soldiers - have been abducted, with one-third being executed. The largest contingent of these workers has been provided by the Philippines. Through a specific, though not exclusive, focus on the Philippines connection, this book considers the myriad ways in which transnational labour migration intersects with the occupation of

Iraq. Also examining the role of the USA in the Middle East, the book places the war on terror within the practices of neoliberalism, but also links this with migration issues and argues that it is all part of a larger 'business' of conflict.

Garden Myths examines over 120 horticultural urban legends. Turning

wisdom on its head, Robert Pavlis dives deep into traditional garden advice and debunks the myths and misconceptions that abound. He asks critical questions and uses science-based information to understand plants and their environment.

Armed with the truth, Robert then turns this knowledge into easy-to-follow advice. - Is fall the best time to clean the garden? - Do bloom boosters work?- Will citronella plants reduce mosquitoes in the garden?- Do pine needles acidify soil?- Should tomatoes be suckered?- Should trees be staked at planting time? - Can burlap keep your trees warm in winter?- Will a pebble tray increase humidity for houseplants? "Garden

Myths is a must-read for anyone who wants to use environmentally sound practices. This fascinating and informative book will help you understand plants better, reduce unnecessary work, convince you to buy fewer products and help you enjoy gardening more."

In Israel, as in numerous countries of the global North, Filipina women have been recruited in large numbers for domestic work, typically as live-in caregivers for the elderly. The case of Israel is unique in that the country has a special significance as the 'Holy Land' for the predominantly devout Christian Filipina women and is at the center of an often

violent conflict, which affects Filipinos in many ways. In the literature, migrant domestic workers are often described as being subject to racial discrimination, labour exploitation and exclusion from mainstream society. Here, the author provides a more nuanced account and shows how Filipina caregivers in Israel have succeeded in creating their own collective spaces, as well as negotiating rights and belonging. While maintaining transnational ties and engaging in border-crossing journeys, these women seek to fulfill their dreams of a better life. During this process, new socialities and subjectivities emerge that point to a form of global

citizenship in the making, consisting of greater social, economic and political rights within a highly gendered and racialized global economy.

Peter F. Drucker argues that what underlies the current malaise of so many large and successful organizations worldwide is that their theory of the business no longer works. The story is a familiar one: a company that was a superstar only yesterday finds itself stagnating and

frustrated, in trouble and, often, in a seemingly unmanageable crisis. The root cause of nearly every one of these crises is not that things are being done poorly. It is not even that the wrong things are being done. Indeed, in most cases, the right things are being done—but fruitlessly. What accounts for this apparent paradox? The assumptions on which the organization has been built and is being run no longer fit reality. These are the assumptions that shape any organization's behavior, dictate its decisions about what to do and what not to do, and define what an organization considers meaningful results. These assumptions are

what Drucker calls a company's theory of the business. The Harvard Business Review Classics series offers you the opportunity to make seminal Harvard Business Review articles a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world—and will have a direct impact on you today and for years to come.

The Human Rights Reader Cambridge University Press
The book's breadth and grounding in labor law make it most accessible and useful to a professional audience, but even

nonspecialists and lay readers will appreciate Blackett's insights about law and domestic work and provocative issues such as social stratification and immigration.— Choice
Adelle Blackett tells the story behind the International Labour Organization's (ILO) Decent Work for Domestic Workers Convention No. 189, and its accompanying Recommendation No. 201 which in 2011 created the first comprehensive international standards to extend fundamental protections and rights to the millions of domestic workers laboring in other peoples' homes throughout the world. As the principal legal architect, Blackett is able to take us behind

the scenes to show us how Convention No. 189 transgresses the everyday law of the household workplace to embrace domestic workers' human rights claim to be both workers like any other, and workers like no other. In doing so, she discusses the importance of understanding historical forms of invisibility, recognizes the influence of the domestic workers themselves, and weaves in poignant experiences, infusing the discussion of laws and standards with intimate examples and sophisticated analyses. Looking to the future, she ponders how international institutions such as the ILO will address labor market informality alongside national and

regional law reform. Regardless of what comes next, *Everyday Transgressions* establishes that domestic workers' victory is a victory for the ILO and for all those who struggle for an inclusive, transnational vision of labor law, rooted in social justice.
