Nothing like getting your ass kicked by a demon on the way to the most important job interview of your life. But, that's where I find myself right before trying to make a good impression on the supernatural investigation agency of my dreams. If I get the job, I can slay demons legally, unlike the criminal slaying I've been doing. The only problem? I have to lie through my teeth about who I am or they'll never hire me. But the good news is I'm great in a fight, even if I fight dirty. The even better news is there are lots of openings at the agency. Unfortunately, they were created by a murderous cartel known as the Viceroy's who seem to be releasing the demons and using their powers to take out most of the agency's staff. This gets me the job and moves me and the other wet-behind-the-ears interns right in harm's way. Exactly where I like to be. The other interns don't think much of me, and the feeling's mutual, especially in the case of

Dax Murphy. He may look like a Hemsworth brother, but he's arrogant as hell. Not my type. Really. I've got a lot to focus on with keeping my identity secret and not getting my head cut off by a Viceroy. But maybe there's more to Dax than eight-pack abs. And maybe secrets from the past don't always stay buried. If you like K.F. Breen, Patricia Briggs, Faith Hunter, Laurell K. Hamilton, Shannon Mayer, Kim Harrison, Ilona Andrews, Dannika Dark, and Jennifer Estep, you'll enjoy this wildly fun read.

A pioneering neuroscientist argues that we are more than our brains To many, the brain is the seat of personal identity and autonomy. But the way we talk about the brain is often rooted more in mystical conceptions of the soul than in scientific fact. This blinds us to the physical realities

of mental function. We ignore bodily influences on our psychology, from chemicals in the blood to bacteria in the gut, and overlook the ways that the environment affects our behavior, via factors varying from subconscious sights and sounds to the weather. As a result, we alternately overestimate our capacity for free will or equate brains to inorganic machines like computers. But a brain is neither a soul nor an electrical network: it is a bodily organ, and it cannot be separated from its surroundings. Our

selves aren't just inside our heads--they're spread throughout our bodies and beyond. Only once we come to terms with this can we grasp the true nature of our humanity.
