LYNN BRADSHAW

Circus Shapes Random House Books for Young Readers

A great DIY paper craft gift for kids that offers hours of fun

MouldMaking and Casting Harper Collins

This is a shapes book containing 2D and 3D Shapes for your little ones to learn. As they progress through their schooling, they can move on from simple shapes like squares to complex 3d shapes like a tetrahedron. From circular wheels and rectangular phones, to octagonal nuts and conical ice-cream cones, shapes are everywhere in the world. From an early age, kids notice different shapes even if they don't names of the shapes are. It takes longer for young children to learn the specific properties of each shape, such as the number of sides or different properties of the shape. Teaching preschoolers the basics of shapes helps them strengthen their understanding of the two-dimensional. As they grow older, giving them the knowledge of 3d shapes is imperative in the early learning process as it gives them an advantage in many areas of learning. This book contains it all, right from simple 2d shapes to complex 3d shapes for your child to identify and gain an upper hand as they progress through their schooling

3D Shapes - a Sorting Activity : Early Learning Series Book 1. Learn and Worksheet Shambhala Publications

The creator of King Arthur's Very Great Grandson and Green Pants switches gears with a slyly silly introduction to shapes—just watch out for the emus! First comes the circle. Then the square and the triangle. Then the . . . emu pushing a pancake wagon down a hill? What begins as a concept book about everyone's geometric favorites soon defies expectations with a series of funny and imaginative twists. Award-winning author-illustrator Kenneth Kraegel pairs a deadpan text with simple wood-grained shapes, interspersed with vibrant illustrations of animals engaged in hilariously absurd pastimes. Each page turn builds on the delicious anticipation the contrast creates to make this a unique and rollicking story-time hit.

Math-Positive Mindsets National Geographic Books

To be published alongside Primary Curriculum - Teaching the Core Subjects, this textbook focuses on how to teach the following foundation curriculum areas effectively to 5 to 11 year olds.: History Design and Technology Art Music Religious Education Modern Foreign Languages Physical Education Each subject is treated in the same way to give the reader 1) The principles and practice, underlying how to teach the subject area, including how to plan, teach, assess and evaluate, with 'top tips' from teachers, head teachers and inspectors; 2) Information beyond the curriculum, including cross-curricular links and out-of-school learning. This book will provide training and newly qualified teachers with a one-stop resource for developing their skills in teaching the core areas of the National Curriculum. The chapters adhere to the QTS Standards and to a uniform structure - non-sequential reading is possible (in fact encouraged!). Further, the chapters are user-friendly with full textbook features including boxed case studies, examples of good practice, and a spacious text design. Contributors include Gee Macrory, Principle Lecturer in English and MFL, Paul Bowen, Senior Lecturer in History, Elaine MacCreery, Senior Lecturer in RE, Ivy Roberts, Senior Lecturer in Art and Design, Alison Heap, Senior Lecturer in PE, and Su Sayers, Senior Lecturer in Design Technology - all at the Institute of Education, Manchester Metropolitan University. And Mike Costelli, Roehampton University; Dave Coulbeck, Head Teacher since 1981; and Kate Buchanan, Director of Supporting Professional Studies, Royal Northern College of Music

Learning Shapes Blake Education

Count your way through this silly stacking adventure with Dr. Seuss! Don't let the apples drop! Three animal friends practice balancing apples on their heads in this hilarious introduction to counting, illustrated by Roy Mckie. The sturdy board book teaches all about numbers, with a dose of signature Seuss charm. Kids will learn to count to ten--and want to start all over again! Originally created by Dr. Seuss himself, Beginner Books are fun, funny, and easy to read. These unjacketed hardcover early readers encourage children to read all on their own, using simple words and illustrations. Smaller than the classic large format Seuss picture books like *The Lorax* and *Oh, The Places You'll Go!*, these portable packages are perfect for practicing readers ages 3-7, and lucky parents too!

Ten Apples Up On Top! Taylor & Francis

Celebrate the 100th Day of School with this kid—and teacher—favorite from award-winning author Lester Laminack! Jake and his fellow students are getting ready for a celebration. Tomorrow is the 100th day of school and everyone is going to share their collections of 100 things. The day of the celebration arrives, but Jake forgets the 100 family pictures he has glued into a special memory book at home. Disaster! But thanks to Jake's ingenuity and the sensitivity of his principal, Jake does have a collection to display that day... and something special to share with the class on the 101st day of school. Lester Laminack's charming, relatable story shines a light on this milestone day celebrated by schools everywhere. Judy Love's joyful illustrations capture the excitement of Jake's diverse school community.

Observing and Developing Schematic Behaviour in Young Children Harper Collins

This collection, edited and written by the leading scholars and experts of innovation and maker education in Finland, introduces invention pedagogy, a research-based Finnish approach for teaching and learning through multidisciplinary, creative design and making processes in formal school settings. The book outlines the background of, and need for, invention pedagogy, providing various perspectives for designing and orchestrating the invention process while discussing what can be learned and how learning happens through inventing. In addition, the book introduces the transformative, school-level innovator agency needed for developing whole schools as innovative communities. Featuring informative case study examples, the volume explores the theoretical, pedagogical, and methodological implications for the research and practice of invention pedagogy in order to further the field and bring new perspectives, providing a new vision for schools for decades to come. Intermixing the results of cutting-edge research and best practice within STEAM-education and invention pedagogy, this book will be essential reading for researchers, students, and scholars of design and technology education, STEM education, teacher education, and learning sciences more broadly. The Open Access version of this book, available at www.taylorfrancis.com, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

3D Shape Games (23 Full Color 3D Figures to Make Using Paper) John Wiley & Sons

This fourth edition of the bestselling Mathematics in Early Years Education provides an accessible introduction to the teaching of mathematics in the early years. Covering all areas of mathematics - number and counting, calculation, pattern, shape, measures and data handling - it provides a wide range of practical activities and guidance on how to support young children's mathematical development. There is also guidance on managing the transition to KS1 and a strong emphasis throughout on creating home links and working in partnership with parents. This new edition has been fully updated to incorporate the latest research and thinking in this area and includes: why mathematics is important as a way of making sense of the world how attitudes to mathematics can influence teaching and learning how children learn mathematics and what they are capable of learning how technology can support maths teaching maths phobia and the impact society has on maths teaching material on sorting, matching and handling data the importance of educating about finance in today's world ideas for observation and questioning to assess children's understanding examples of planned activities suggestions for language development assessment criteria. This textbook is ideal for those training to be teachers through an undergraduate or PGCE route, those training for Early Years Professional Status and those studying early childhood on foundation or honours degrees, as well as parents looking to explore how their young children learn mathematics. This will be an essential text for any early years practitioner looking to make mathematics interesting, exciting and engaging in their classroom.
