'...this is an excellent report and will make a major contribution to the debate (on adjustment issues). It will be of the same importance as the earlier ILO contribution, in a different context, of the employment missions some 15-20 years ago, in Kenya and Zambia.' Hans Singer, Emeritus Professor, Institute of Development Studies, University of Sussex 'Arguments in this volume often figured in important UN conferences on problems of structural adjustment in Africa. They will continue to define the parameters of the debate on the African crisis for a long time to come.' A.Adedeji, African Centre for Development and Strategic Studies, Nigeria 'This book makes an important contribution to our understanding of the economies of Africa and calls into question much of the received wisdom on the nature and causes of the economic crisis in sub-Saharan Africa. In consequence, it forces serious academics and policy makers to re-examine orthodox policy prescriptions and their distributional impact. The book provides refreshingly original insights and careful examination of available data. The policy implications of the work are vitally important for the people of Africa.' J.Loxley, Professor and Head, Department of Economics, University of Manitoba 'This is an iconoclastic book, most welcome as it brings out fresh evidence and new facts about the urbanization of policy and informalization of the urban economy in Africa. It is an important contribution to the debate on the direction of adjustment, reform and development policies in Africa, which would certainly be read with great eagerness'. S.Rasheed, Director, Public Administration,

Human Resources and Social Development Division, UNECA, Addis Ababa 'Africa Misunderstood is an important book because it refutes a substantial body of incorrect, out of date and/or wrongly generalised conventional (un)wisdom. Exploration of changes over time, of the rise of urban absolute poverty, of the diversity and complexity of sSA economies and of how weak generalisations assumed in much programme design work are (both empirically and logically) occupy the main portion of this volume and constitute its major strength. Given its relatively accessible structure and style, it is to be hoped policy makers and advisers will read it as well as academic researchers, university faculty and their students.' R.H.Green, Professor, Institute of Development Studies, University of Sussex In the past (and sometimes even now) African economies were depicted as suffering from 'urban bias', which strangled the agricultural sector and caused eventually the 'African Crisis'. Based on ten detailed case studies this book questions that stereotype and shows the dramatic turnaround in the relative position of farmers and wage earners in the recent past. The implications for standard adjustment programmes and urban survival strategies are discussed.

Art objects and pictures of the first millennium BC Chr. From the Middle East and the Eastern Mediterranean are viewed here from a perspective that sees art as a symbolic data carrier. Art conveys culturally shaped statements and thereby allows conclusions to be drawn about the culture, world view and religion of a people. In this book, it is examined in its triple function as an artifact, visual medium and reflection of cultural ideas.

This book provides specialists and executives with a clear, yet practical set of recommendations to meet the challenges of digital transformation and ensure long-term success as a leader in a primarily digital business world. The authors describe the fundamental principles of digitization and its economic opportunities and risks, integrating them into a framework of classic and new management methods. The book also explores how increasing digitization – not only of communication, but of complete value chains – has led to a need to establish a digital business leadership. Digitization is changing people and markets: it causes the upheaval of entire industries, creates new digital-centric companies, and forces established companies to cope with

the transformation activities associated with these digitization processes. New approaches and methods have to be learned, tried and tested patterns of thinking have to be explored, and last but not least, innovation activities have to be understood as continuous necessities. At the same time, digital business offers considerable opportunities for renewing competitive advantages, improving existing process structures and realigning products, services and business models.

"There's never a dull moment with these dragons. Fighting! Mayhem! Danger! . . . a fun read" from the New York Times bestselling author (Vampire Book Club). I was raised for battle. And as the first daughter of a warrior family, I've earned my reputation the hard way. Yet now I fight alongside uncivilized male Northland dragons who think a female is only good for breeding and waiting back home in the cave. But it's the foolish and foolhardy who would try to stop me, Rhona the Fearless, from doing what I do best—destroying the enemies of my kind. So the smartest thing wily barbarian Vigholf the Abhorrent can do for me is stay out of my way as we risk all on a deadly mission in enemy territory. I don't care if he's fascinated by me, even though he is as attractive as he is resourceful. He's having far too much fun putting me in difficult situations and testing my sense of duty to the limit. And I'm going to enjoy challenging his insufferable confidence, outwitting his schemes, and making him surrender in the wildest ways . . . This seminal book from Architectural Design was originally published in 1993, at a time of crucial change and on the eve of the digital revolution. It brought together a series of essays that many believe created the favourable environment in which computer-based design could thrive. Considered one of the most influential architecture publications of the 1990s, this book ranks as a classic and in itself is a crucial chapter of history, though one that has been out of print since 1999. This faithful reprinting includes a substantial new introductory essay by Mario Carpo, Head of the Study Centre at the Canadian Centre for Architecture, which examines the impact of the original texts and their ongoing significance. Thereafter, the book is true to its original content showcasing projects by ground-breaking architects such as Greg Lynn, Jeffrey Kipnis, Bahram Shirdel, Frank Gehry and Philip Johnson.

The problem of estimating animal abundance is common in wildlife management and environmental impact assessment. Capture-recapture and removal methods are often used to estimate population size. Statistical Inference From Capture Data

On Closed Animal Populations, a monograph by Otis et al. (1978), provides us with a comprehensive synthesis of much of the wildlife and statistical literature on the methods, as well as some extensions of the general theory. In our primer, we focus on capture-recapture and removal methods for trapping studies in which a population is assumed to be closed and do not treat open-population models, such as the Jolly-Seber model, or catch-effort methods in any detail. The primer, written for students interested in population estimation, is intended for use with the more theoretical monograph.

Bilingual English-German edition of second collection published by the German poet, dramatist, and philosopher Karoline von Günderrode (1780–1806). The second collection of writings by the German poet, dramatist, and philosopher Karoline von Günderrode (1780–1806), *Poetic Fragments* was published in 1805 under the pseudonym “Tian.” Günderrode’s work is an unmined source of insight into German Romanticism and Idealism, as well as into the reception of Indian, Persian, and Islamic thought in Europe. Anna C. Ezekiel’s introductions highlight the philosophical significance of the texts, demonstrating their radical and original consideration of the nature of the universe, death, religion, power, and gender roles. The dramas “Hildgund” and “Muhammad, the Prophet of Mecca” are two of Günderrode’s most important works for her accounts of agency, recognition, and the status of women. The three poems included in the collection, “Piedro,” “The Pilgrims,” and “The Kiss in the Dream,” represent the wide range of forms in which Günderrode wrote. They reflect themes of erotic longing and union with the divine, and point to her radical reimagining of death. This bilingual English-German edition is the first volume of Günderrode’s work to appear in English, and will help unearth this rich, complex, and innovative writer for English readers. Anna C. Ezekiel is an independent scholar living in Singapore.

In the study and conservation of art and artifacts, natural organic materials are frequently encountered in components such as coatings, binders, and adhesives. The identification of these materials is often crucial to the attempt to characterize the technologies employed by artists or craftspeople, understand the processes and causes of deterioration, and plan appropriate conservation treatments. Yet the limited resources of many conservation laboratories put many analysis techniques beyond their reach. Thin-layer chromatography can help fill this gap. The

volume consists of a handbook, protocols, and guide to reference materials. The handbook serves as a primer for the basic application of thin-layer chromatography to the analysis of binding media, adhesives, and coatings found on cultural objects; the protocols provide step-by-step instructions for the laboratory procedures involved in typical analyses; and the guide to

reference materials aids in the understanding of the types of materials and documentation needed for accurate analyses by thin-layer chromatography.

Released from his prison of incrustation, having rested on the ocean floor for thousands of years, the bronze statue of an athlete stands in a quietly arrogant pose, having just placed an olive

crown—the symbol of victory in the Olympic Games—on his head. In this monograph devoted to the Getty Bronze, Dr. Frel analyzes the technique and style that point to its attribution to the great fourth-century Greek sculptor Lysippos. The conservation of the bronze, its possible identity as a Hellenistic prince, and its place in Lysippos's oeuvre are discussed.
