A different kind of politics for a new kind of society--beyond work, scarcity and capitalism In the twenty-first century, new technologies should liberate us from work. Automation, rather than undermining an economy built on full employment, is instead the path to a world of liberty, luxury and happiness—for everyone. Technological advance will reduce the value of commodities—food, healthcare and housing—towards zero. Improvements in renewable energies will make fossil fuels a thing of the past. Asteroids will be mined for essential minerals. Genetic editing and synthetic biology will prolong life, virtually eliminate disease and provide meat without animals. New horizons beckon. In Fully Automated Luxury Communism, Aaron Bastani conjures a vision of extraordinary hope, showing how we move to energy abundance, feed a world of 9 billion, overcome work, transcend the limits of biology, and establish meaningful freedom for everyone. Rather than a final destination, such a society merely heralds the real beginning of history.

What if religions are neither all true nor all nonsense? The long-running and often boring debate between fundamentalist believers and non-believers is finally moved forward by Alain de Botton's inspiring new book, which boldly argues that the supernatural claims of religion are entirely false—but that it still has some very important things to teach the secular world. Religion for Atheists suggests that rather than mocking religion, agnostics and atheists should instead steal from it—because the world's religions are packed with good ideas on how we might live and arrange our societies. Blending deep respect with total impiety, de Botton (a non-believer himself) proposes that we look to religion for insights into how to, among other concerns, build a sense of community, make our relationships last, overcome feelings of envy and inadequacy, inspire travel

and reconnect with the natural world. For too long non-believers have faced a stark choice between either swallowing some peculiar doctrines or doing away with a range of consoling and beautiful rituals and ideas. At last, in Religion for Atheists, Alain de Botton has fashioned a far more interesting and truly helpful alternative.

Helpful, Accessible Guidance for Budding Hedge Funds So You Want to Start a Hedge Fund provides critical lessons and thoughtful insights to those trying to decipher the industry, as well as those seeking to invest in the next generation of high performers. This book foregoes the sensational, headline-grabbing stories about the few billionaire hedge fund managers to reach the top of the field. Instead, it focuses on the much more common travails of start-ups and small investment firms. The successes and failures of a talented group of competitive managers—all highly educated and well trained—show what it takes for managers and allocators to succeed. These accounts include lessons on funding, team development, strategy, performance, and allocation. The hedge fund industry is concentrated in the largest funds, and the big funds are getting bigger. In time, some of these funds will not survive their founders and large sums will get reallocated to a broader selection of different managers. This practical guide outlines the allocation process for fledgling funds, and demonstrates how allocators can avoid pitfalls in their investments. So You Want to Start a Hedge Fund also shows how to: Develop a sound strategy and raise the money you need Gain a real-world perspective about how allocators think and act Structure your team and investment process for success Recognize the patterns of successful start-ups The industry is approaching a significant crossroads. Aggregate growth is slowing and competition is shifting away from industry-wide growth, at the expense of traditional asset classes, to market share capture within the industry. So You Want to Start a Hedge Fund provides guidance for the little funds—the potential future leaders of the industry.

A compassionate, shame-free guide for your darkest days “A one-of-a-kind book . . . to read for yourself or give to a struggling friend or loved one without the fear that depression and suicidal thoughts will be minimized, medicalized or over-spiritualized.”—Kay Warren, cofounder of Saddleback Church What happens when loving Jesus doesn’t cure you of depression, anxiety, or suicidal thoughts? You might be crushed by shame over your mental illness, only to be told by well-meaning Christians to “choose joy” and “pray more.” So you beg God to take away the pain,

but nothing eases the ache inside. As darkness lingers and color drains from your world, you're left wondering if God has abandoned you. You just want a way out. But there's hope. In *I Love Jesus, But I Want to Die*, Sarah J. Robinson offers a healthy, practical, and shame-free guide for Christians struggling with mental illness. With unflinching honesty, Sarah shares her story of battling depression and fighting to stay alive despite toxic theology that made her afraid to seek help outside the church. Pairing her own story with scriptural insights, mental health research, and simple practices, Sarah helps you reconnect with the God who is present in our deepest anguish and discover that you are worth everything it takes to get better. Beautifully written and full of hard-won wisdom, *I Love Jesus, But I Want to Die* offers a path toward a rich, hope-filled life in Christ, even when healing doesn't look like what you expect.

No professional investing advice is good advice. This hard-hitting book proves it with indisputable facts drawn from scientific research and the author's own thirty-five years of experience in the investment industry. Michael Edesess exposes "The Big Investment Lie": that an investor will gain by hiring professional advisors to beat the market. He proves that no professional investment advisor or manager has ever consistently and predictably beat market averages, not even Warren Buffett. While The Big Investment Lie allows an entire industry to prosper lavishly, investors invariably lose when they hire professional help. Once you know the truth, you'll want to adopt Edesess's Ten New Commandments for Smart Investing, simple rules you can follow to invest, get a profitable return, and avoid squandering any more of your hard-earned dollars on bogus expertise.

Want to get started investing in the stock market, but aren't sure how to do so? What are stocks? What determines their market prices? Why do they go up and down? How can I beat the stock market? What are mutual funds? What are index funds? What are Exchanged Traded Funds? Even though the stock market is the heart of a country's wealth, and even though it enables everybody to be a part owner in the largest, most successful countries in the world, it's not taught in public schools. But be warned: the mainstream press often misrepresents the stock market. They focus

on making the news exciting and dramatic to sell copies. Frankly, the best investing is boring investing. It's putting as much money as you can afford into many companies, and reinvesting dividends. And continuing to do so until you reach retirement age. The best investing is not about trying to figure out what's going to happen in the economy or the markets tomorrow, next week, next month or next year. Many financial writers try to make you think you have to work hard at investing. You must study stock charts every night. Read annual reports. Thoroughly analyze a company's financial statements. Read THE WALL STREET JOURNAL, BARRON'S, and MONEY MAGAZINE. Buy special software. Hang out in online investing forums. Not so! Don't waste your time. This book takes modern financial theory to its logical conclusion. You can get the maximum long term benefit by following its simple plan. No tedious math or economics theory needed. It's simple to set up. Then you forget about it. Pay no attention to the financial news. Just focus on making the most money you can in your career or business, that's all. And if you're starting small, we've got you covered too. You'll learn the various kinds of stocks and the various ways to invest in them, including tax-deferred retirement accounts such as an IRA. This work is shorter than Stock Investing for Dummies. Warning: the investment world is full of people who think your money belongs to them. From out and out scammer brokers, financial advisors, newsletter editors, and to the managers of actively traded mutual funds, if you're not careful you'll help everybody get rich except yourself. Your government also wants your money, so this includes a chapter on the tax consequences of investing -- and how to minimize them. Therefore, scroll up to download Stock Market Investing for Beginners and get started right away.

In this essential handbook—a blend of Rich Dad, Poor Dad and The Happiness Project—the co-host of the wildly popular InvestED podcast shares her yearlong journey learning to invest, as taught to her by her father, investor and bestselling author Phil Town. Growing up, the words finance, savings, and portfolio made Danielle Town's eyes glaze over, and the thought of stocks and financial statements shut down her brain. The daughter of a successful investor and bestselling financial author of Rule #1, Phil Town, she spent most of her adult life avoiding investing—until she realized that her time-consuming career as lawyer was making her feel anything but in control of her life or her money. Determined to regain her freedom, vote for her values with her money, and deal with her fear of the unpredictable stock market, she turned to her father, Phil, to help her take charge of her life and her future through Warren Buffett-style value investing. Over the course of a year, Danielle went from avoiding everything to do with the financial industrial complex to knowing exactly how and when to invest in wonderful companies. In *Invested*, Danielle shows you how to do the same: how to take command of your own life and finances by choosing companies with missions that match your values, using the same gold standard strategies that have catapulted Warren Buffett and Charlie Munger to the top of the Forbes 400. Avoiding complex math and obsolete financial models, she turns her father's investing knowledge into twelve easy-to-understand lessons. In each chapter, Danielle examines the investment strategies she mastered as her increasing know-how deepens the trust between her and her father. Throughout, she streamlines the process of making wise financial decisions and shows you just how easy—and profitable—investing can be. Capturing a warm, charming, and down-to-earth give and take between a headstrong daughter and her mostly patient dad, *Invested* makes the complex world of investing simple, straightforward, and approachable, and will help you formulate your own investment plan—and foster the confidence to put it into action.

* AN INSTANT NEW YORK TIMES BESTSELLER * From the New York Times bestselling author of *The Vanishing American Adult*, an intimate and urgent assessment of the existential crisis facing our nation. Something is wrong. We all know it. American life expectancy is declining for a third straight year. Birth rates are dropping. Nearly half of us think the other political party isn't just wrong; they're evil. We're the richest country in history, but we've never been more pessimistic. What's causing the despair? In *Them*, bestselling author and U.S. senator Ben Sasse argues that,

contrary to conventional wisdom, our crisis isn't really about politics. It's that we're so lonely we can't see straight—and it bubbles out as anger. Local communities are collapsing. Across the nation, little leagues are disappearing, Rotary clubs are dwindling, and in all likelihood, we don't know the neighbor two doors down. Work isn't what we'd hoped: less certainty, few lifelong coworkers, shallow purpose. Stable families and enduring friendships—life's fundamental pillars—are in statistical freefall. As traditional tribes of place evaporate, we rally against common enemies so we can feel part of a team. No institutions command widespread public trust, enabling

foreign intelligence agencies to use technology to pick the scabs on our toxic divisions. We're in danger of half of us believing different facts than the other half, and the digital revolution throws gas on the fire. There's a path forward—but reversing our decline requires something radical: a rediscovery of real places and human-to-human relationships. Even as technology nudges us to become rootless, Sasse shows how only a recovery of rootedness can heal our lonely souls. America wants you to be happy, but more urgently, America needs you to love your neighbor and connect with your community. Fixing what's wrong with the country depends on it.
