The Greater Poems of Virgil Routledge

According to Lipson, we are at a critical stage in our history. It is clear that there has been a lowering of ethical standards in many sectors of our society. Both promise and peril confront humanity at this time. Along with the ability to annihilate the world, we have acquired the knowledge to improve the quality of life for more people than ever before. The author examines periods in history where similar conditions have existed, seeking to comprehend what is at stake in our present age, and calls for revolution in our ethical practices. Finally, he considers whether the current moral and ethical crisis will be resolved.

Reshaping Museum Space pulls together the views of an international group of museum professionals, architects, designers and academics highlights the complexity, significance and malleability of museum space, and provides reflections upon recent developments in museum architecture and exhibition design. Various chapters concentrate on the process of architectural and spatial reshaping, and the problems of navigating the often contradictory agendas and aspirations of the broad range of professionals and stakeholders involved in any new project. Contributors review recent new build, expansion and exhibition projects questioning the types of museum space required at the beginning of the twenty-first century and highlighting a range of possibilities for creative museum design. Essential reading for anyone involved in creating, designing and project managing the development of museum exhibits, and vital reading for students of the discipline.

This book introduces the notions and methods of formal logic

from a computer science standpoint, covering propositional logic, predicate logic, and foundations of logic programming. The classic text is replete with illustrative examples and exercises. It presents applications and themes of computer science research such as resolution, automated deduction, and logic programming in a rigorous but readable way. The style and scope of the work, rounded out by the inclusion of exercises, make this an excellent textbook for an advanced undergraduate course in logic for computer scientists.

This all embracing survey of Pompeii provides the most comprehensive survey of the region available. With contributions by well-known experts in the field, this book studies not only Pompeii, but also - for the first time - the buried surrounding cities of Campania. The World of Pompeii includes the latest understanding of the region, based on the up-to-date findings of recent archaeological work. Accompanied by a CD with the most detailed map of Pompeii so far, this book is instrumental in studying the city in the ancient world and is an excellent source book for students of this fascinating and tragic geographic region.

Introduction to Ancient History CUP Archive

In recent years we have witnessed a growing interest in multilingualism and its relationship with the learning and teaching of second/foreign languages. However, multilingualism is a highly complex phenomenon, which has a direct influence on how we learn languages. For instance, do we learn a second/foreign language in a similar way in a multilingual context as in a monolingual one? What is the role of the other languages spoken in the community? Do contrasting learning contexts, like CLIL or studying abroad, produce different results? Can positive emotions such as foreign language enjoyment have an active role in the foreign language learning process? These and other topics will be discussed in this book, with the aim of understanding multilingualism, how languages are learned and how to teach them better. This book was originally published as a special issue of the International Journal of Multilingualism.

This textbook provides the basic theoretical and practical knowledge of astronomy and astrophysics. It provides an overview from classical astronomy and observational methods to solar physics and astrophysics of stars and galaxies. It concludes with chapters on cosmology, astrobiology, and mathematical and numerical methods. Numerous color illustrations, examples of calculations, and exercises with solutions make this work a useful companion to undergraduate astronomy lectures. The book is suitable for students of physics and astronomy at teacher training level or in the Bachelor's degree - but also people interested in natural sciences with appropriate basic knowledge of mathematics and physics will find here an appealing introduction to the subject. This fourth edition has been updated and revised with respect to the latest developments in astronomy. The

chapter on mathematical methods has been redesigned and the software used is now exclusively Python. From the contents: Spherical astronomy - History of astronomy - Celestial mechanics - Astronomical instruments - Physics of the bodies of the solar system - The Sun - State variables of the stars - Stellar atmospheres - Stellar structure - Stellar evolution - Interstellar matter - The Galaxy - Extragalactic systems - Cosmology - Astrobiology - Mathematical methods. This book is a translation of the original German 4th edition *Einführung in Astronomie und Astrophysik* by Arnold Hanslmeier, published by Springer-Verlag GmbH Germany, part of Springer Nature in 2020. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation. Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors.

Integrating the results of scholarly work from the past decade, the authors of *An Introduction to the Ancient World*, Lukas de Blois and R.J. van der Spek, have fully-updated and revised all sixteen chapters of this best-selling introductory textbook. Covering the history and culture of the ancient Near East, Greece and Rome within the framework of a short narrative history of events, this book offers an easily readable, integrated overview for students of history, classics, archaeology and philosophy, whether at college, at undergraduate level or among the wider reading public. This revised second edition offers a new section on early Christianity and more specific information on the religions, economies, and societies of the ancient Near East. There is extended coverage of Greek, Macedonian and Near Eastern history of the fourth to second centuries BC and the history of the Late Roman Republic. The consequences of Julius Caesar's violent death are covered in more detail, as are the history and society of Imperial Rome. This new edition is: comprehensive: covers 3,000 years of ancient history and provides the basis for a typical one-semester course lavishly illustrated: contains maps, line drawings and plates to support and supplement the text, with updated captions clearly and concisely written: two established and respected university teachers with thirty years' experience in the subject areas well-organized: traces the broad outline of political history but also concentrates on particular topics user-friendly: includes chapter menus, an extensive and expanded bibliography organized by subject area and three appendices, an improved introduction and the addition of an epilogue.

The Invention of Greek Ethnography Univ of California Press

This fascinating cultural and intellectual history focuses on education as practiced by the imperial age Romans, looking at what they considered the value of education and its effect on children. W. Martin Bloomer details the processes, exercises, claims, and contexts of liberal education from the late first century BCE to the third century CE—the epoch of rhetorical education. He examines the adaptation of Greek institutions, methods, and texts by the Romans, and traces the Romans' own history of education. Bloomer argues that while Rome's enduring educational legacy includes the seven liberal arts and a canon of school texts, its practice of competitive displays of reading, writing, and reciting were intended to instill in the young social as well as intellectual ideas.

The oath was an institution of fundamental importance across a wide range of social interactions throughout the ancient Greek

world, making a crucial contribution to social stability and harmony; yet there has been no comprehensive, dedicated scholarly study of the subject for over a century. This volume of a two-volume study explores how oaths functioned in the working of the Greek city-state (polis) and in relations between different states as well as between Greeks and non-Greeks.

The World of Pompeii Walter de Gruyter

This volume offers a coherent collection of 26 papers presented at an international conference held in November 2010, exploring the latest achievements of formal and comparative linguistics applied to the teaching of Latin. The three sections (syntax and morphology, semantics and pragmatics, history and theory of teaching) compare Latin with different ancient and modern languages, aiming to represent grammar rules as the product of mental processes. The book is addressed to linguists, teachers and students, who are looking for new perspectives to update their approach to classical Latin.

Ethnographic writing has become all but ubiquitous in recent years. Although now considered a thoroughly modern and increasingly indispensable field of study, Ethnography's roots go all the way back to antiquity. This volume brings together eleven original essays exploring the wider intellectual and cultural milieux from which ancient ethnography arose, its transformation and development in antiquity, and the way in which 19th century receptions of ethnographic traditions helped shape the modern

study of the ancient world. Finally, it addresses the extent to which all these themes remain inextricably intertwined with shifting and often highly contested notions of culture, power and identity. Its chapters deal with the origins of the term 'barbarian', the role of ethnography in Tacitus' *Germania*, Plutarch's *Lives*, Xenophon's *Anabasis*, and Athenaeus' *Deipnosophistae*, Herodotean storytelling, Henry and George Rawlinson, and Megasthenes' treatise on India. At a time when modern ethnographies are becoming increasingly prevalent, wide-ranging, and experimental in their approach to describing cultural difference, this book encourages us to think about ancient ethnography in new and interesting ways, highlighting the wealth of material available for study and the complexities underpinning ancient and modern notions of what it meant to be Greek, Roman or 'barbarian'.

"[H]aunting and harrowing." —Booklist (starred review) "Vivid, distressing, and all too real." —Kirkus Reviews In this 20th anniversary edition of Todd Strasser's gut-wrenching and

critically acclaimed *Give a Boy a Gun*, two boys bring guns to school in search of revenge against their classmates. For as long as they can remember, Brendan and Gary have been mercilessly teased and harassed by the jocks who rule Middletown High. But not anymore. Stealing a small arsenal of guns from a neighbor, they take their classmates hostage at a school dance. In the panic of this desperate situation, it soon becomes clear that only one thing matters to Brendan and Gary: revenge. This special 20th anniversary edition includes updated backmatter and statistics on school shootings—a topic that is now more relevant than ever.
