This book examines the variation found in modern spoken French, based on the research programme 'Phonology of Contemporary French' (Phonologie du Franais Contemporain, PFC). Extensive data are drawn from all over the French-speaking world, including Algeria, Canada, Louisiana, Mauritius, and Switzerland. Although the principal focus is on differences in pronunciation, the authors also analyse the spoken language at all levels from sound to meaning. The book is accompanied by a website hosting audio-visual material for teaching purposes, data, and a variety of tools

for working with corpora. The first part of the book outlines some key concepts and approaches to the description of spoken French. Chapters in Part II are devoted to the study of individual samples of spoken French from all over the world, covering phonological and grammatical features as well as lexical and cultural aspects. A class-friendly ready-to-use multimedia version of these 17 chapters as well as a full transcription of each extract is provided, with the sound files also available on the book's companion website. Part III looks at inter and intra-speaker variation: it begins with chapters that provide the methodological background to the study of phonological variation using databases, while in the second section, authors present case studies of a number of PFC survey points, including Paris, the Central African Republic, and Quebec. Varieties of Spoken French will be an invaluable resource for researchers, teachers, and students of all aspects of French language and linguistics.
