ELVIS PITTS

The Study Guide for General Practice Training CRC Press

This greatly expanded, revised and updated guide comprehensively covers every aspect of the new format membership examination of the Royal College of General Practitioners. Its new format includes current treatment issues and the latest research, and is divided into three parts covering main medical topics, non-clinical areas, and ambiguous topics and exam questions for the registrar year. Concise and easy to read, covering a wide range of skills and approaches that are used daily by general practitioners, it will serve well as a useful resource for personal and professional development. This i.

The Medical Student's Survival Guide 1 CRC Press

Designed for people taking the diploma leading to membership of the Royal Colleges of Physicians of the UK, this second edition features multiple-choice questions on general medicine and paediatrics to assist candidates' revision for the papers available in the two subjects from October 1993.

Cost Effectiveness in Medical Education MasterPass

Useful for MRCPsych examination candidates, this guide offers a practical learning programme from the beginning of training to passing the examination. It details the techniques required to answer questions correctly, includes practice questions, and provides answers and references. It also contains contributions from College examiners.

Intercollegiate MRCS Part A CRC Press

In late 1996, the format of the examinations for surgical trainees in the UK will change. The existing FRCS diploma examination will be replaced by a new MRCS (Membership of the Royal College of Surgeons) qualification. These changes will be phased in over a period of time. The first major change will be in the existing Part I Applied Basic Sciences examination, which will now consist of two MCQ papers covering both basic and clinical aspects of surgery.

Difficult Cases in Primary Care Radcliffe Publishing

This excellent practical text is a ready source of information on evidence-based treatments and new medical psychological and self-help methods. It is unique in being written especially for GPs and primary care workers including practice nurses health visitors social workers and community psychiatric nurses. It also has great relevance for psychiatric trainees and consultant psychiatrists setting up in general practice. Patients and their relatives will find it useful and accessible.

Passing PLAB Part 1 CRC Press

Panacea or revolution? 'Evidence-based medicine' and 'cost-effectiveness' have become buzz-phrases for a wide variety of initiatives and planning processes which aim to give patients treatments that will benefit them. On the surface this seems a reasonable idea, but there are underlying currents which cast doubt on the process and reveal methodological problems, which must be understood if the concepts are to be properly used. Assuming no prior knowledge of the field, and written in the clear, straightforward manner the author uses in the highly successful *Health Economics for the Uninitiated*, this book is a short practical guide on how to use these concepts, and how to avoid their pitfalls. It will appeal to doctors, nurses, health service managers, patient organizations, academics and students of health care. It will provide essential support to those working in health care companies, and in the pharmaceutical and medical equipment industry.

The Complete MRCGP Study Guide Radcliffe Publishing

Now in its fourth edition, "Basic Notes in Psychopharmacology" is a concise summary, in the form of notes, which gives the reader a quick and easy-to-use overview of the subject. This greatly expanded volume now covers all the major classes of drugs, and for each individual drug the principle mode of action, indications and adverse effects are provided. In addition, it now includes 35 peer-reviewed clinical vignettes, focussing on psychopharmacological treatments which play a major part in management. As a short and practical guide, it will be invaluable for junior hospital psychiatrists, general practitioners and medical students. Others, including psychiatric nurses, psychiatric social workers, psychiatric occupational therapists and clinical psychologists, will also find it extremely useful.

Succeeding in Paediatric Surgery Examinations, Volume 2 Radcliffe Publishing

Front Cover -- Contents -- Foreword -- Preface -- About the author -- Acknowledgements -- Note to readers -- Section 1: Basic science -- Section 2: Biomechanics -- Section 3: Paediatric orthopaedics -- Section 4: Hip and femur -- Section 5: Knee and lower leg -- Section 6: Foot and ankle -- Section 7: Shoulder and humerus -- Section 8: Forearm and hand -- Section 9: Spine -- Section 10: Orthopaedic oncology -- Section 11: Extended matching questions -- Back Cover

The New DRCOG Examination CRC Press

A study and revision aid for postgraduate medical students preparing for Part 2 of the Membership of the Royal College of Gynaecologists (MRCOG) examination or equivalent. Based on the Extended Matching Question format (EMQ), this work contains forty-two questions of varying degrees of difficulty, along with detailed answers.

SBA's and EMQs in Paediatrics for Medical Students Radcliffe Publishing

A study and revision aid for undergraduate medical students preparing for in-course assessment in obstetrics and gynaecology as well as final exams. This book is based on the Extended Matching Question format (EMQ), and contains over 200 patient vignettes arranged in topic areas covering a range of themes and degrees of difficulty.

SBA's and EMQs for the MRCS Part A: A Bailey & Love Revision Guide Radcliffe Publishing

Candidates for the MRCPsych Part 2 often have difficulty with the basic sciences curriculum of the examination because it may have been several years since it was part of their studies. This book provides the information that will refresh and update their knowledge. It begins with ethics and the law and concludes with social sciences. In between

1000 EMQs for PLAB Radcliffe Pub

Over 90% of contact between patients and doctors takes place in general practice making it a valuable research arena but many members of the primary care team are unaware of the

opportunities for them to do research. This book provides information on the research options for individuals and practices and describes research work undertaken recently by GPs and their teams in a variety of practice settings. It is easy to read and assumes no previous knowledge of the subject. It is ideal for GPs and all members of the primary healthcare team especially practice and community nurses GP registrars and pharmacists. *Research Opportunities in Primary Care* covers everything from being part of a research network to undertaking a higher degree and describes the impact of research involvement on the professional and the practice. Sections of each chapter are written by people actually doing research in this setting to give a "hands on" feel of what it means in practical terms. This new text creates a set of practical notes enhanced by specific examples of service-based activity. It complements *Research Methods in Primary Care* which introduces the range of relevant skills to provide a solid basis for starting research.

Extended Matching Items for the MRCPsych Part 1 Radcliffe Publishing

With economic winter facing many healthcare and health education budgets, the high costs of medical education are bringing it under close scrutiny. However, the costs of not providing high quality medical education - not least human costs in morbidity and mortality from medical error - are also high, presenting medical educators, funding managers, policy makers and economists with an unenviable dilemma. To add to their difficulties, remarkably little has been written on cost effectiveness in medical education, including how to calculate costs, how to get maximal value for money and even what constitutes value for money. In this book, the first of its kind, world leading experts comprehensively outline what is known about cost effectiveness in each of their fields. Undergraduate, postgraduate and continuing professional education are all explored, as are e-learning, simulation, cost benefit analysis and numerous other areas. Lecturers and researchers in medical education, clinical tutors and educational supervisors and appraisers, managers responsible for funding medical education and health economists and health policy makers and shapers will find this an invaluable resource. 'An excellent analysis and explanation of an under-explored subject' -

from the Foreword by Sir Liam Donaldson

Essential Notes in Basic Sciences for the MRCPsych Part 2 CRC Press

A guide to the reality of medical student life. It addresses questions such as: How do I find my way to lectures? Can I live on hamburgers? How do I give effective presentations? How much can I drink without vomiting in Freshers week? What about student loans? How should I prepare for exams? And, exactly how much work should I be doing?

MRCPsych Paper 1 One-Best-Item MCQs Radcliffe Publishing

The past decade has seen several revisions to the MRCPsych examinations but the latest changes have been the most radical. It is now a three part written examination along with a clinical assessment of skills and competencies. This has changed the focus of the 'new' MRCPsych Paper 1, which now includes two thirds 'one-best-item-from-five' multiple choice questions (MCQs). This collection of 'one-best-item-from-five' style multiple choice questions mirrors the new format for the exam. Its companion volume *Extended Matching Items for the MRCPsych Examinations Part 1* by Michael Reilly and Bangaru Raju remains relevant for the new format where EMIs make up one third of the questions. Together, these two guides thoroughly prepare you for the revised format, incorporating the new areas of study such as basic ethics, philosophy and history of psychiatry, and stigma and culture. With varying degrees of question difficulty, a wide-range of styles and topics, and full explanations of answers overleaf, MRCPsych Paper 1 One-Best-Item MCQs is ideal for examination preparation and self-study.

MCQs and EMQs for the Diploma in Otolaryngology Radcliffe Publishing

Assessment is a key method of improving standards as well as establishing competency. However, despite major developments in the assessment of clinical competence, there is still bad practice and ignorance of significant issues in this area than any other aspect of medical higher education. This book covers all aspects of assessment.

The MRCPsych Study Manual CRC Press

This self-assessment book is designed to help students tackle both the new UMAP assessment and more traditional styles of examination. Questions covering all common paediatric presentations are included in SBA (single best answer) and EMQ (extended matching question) formats with relevant, concisely explained answers.

Teaching and Learning in Clinical Settings Radcliffe Publishing

This revision tool helps readers strengthen their existing knowledge of childhood disorders through Extended Matching Questions (EMQs) on topics frequently asked in Paediatrics examinations, ranging from neonatology to emergency medicine and public health. Detailed answers in each section build comprehension and knowledge. Many medical schools now examine undergraduates using EMQs, but they also feature highly in postgraduate examinations. This revision aid will therefore also be useful to those preparing for postgraduate examinations such as the Diploma of Child Health (DCH) and Membership of the Royal College of Paediatrics and Child Health (MRCPCH), as well as foundation doctors on their first paediatric rotations and all those wishing to consolidate their knowledge and understanding of Paediatrics.

Cognitive Behavioural Therapy Explained Radcliffe Publishing

This book by former DOHNS candidates focuses on topics that are likely to be examined. Each answer is accompanied by an explanation using current evidence-based research wherever possible. This will be an essential revision text for all DOHNS candidates.

Student Success in Physiology Radcliffe Publishing

This examination and revision guide comprehensively tests knowledge at all levels in obstetrics and gynaecology. The wide-ranging sample questions have detailed answers to provide proper explanation and aid understanding, and the variety of question formats prepares students for all possibilities in the examination. The best of five question format is ideal for DRCOG candidates, the EMQs prepare the MRCOG candidates, and the MCQs will test both DRCOG and MRCOG candidates. The book is also highly recommended for undergraduates preparing for their finals, who will welcome the sample best of fives and EMQs now that essays and short answer questions are becoming a thing of the past.
