The book is an excellent reference for scientists, researchers and students working in the field of areas of biopolymeric biomaterials, biomedical engineering, therapeutics, tissue engineering and regenerative medicine. The book is divided into two parts: Part I will focus on the tissue engineering and Part II focuses on therapeutics, functionalization and computer-aided techniques. The book consists of 13 chapters contributed by 20 international contributors who are leading experts in the field of biopolymers and its applications. It will focus on the advancements of chitin and chitosan in regenerative medicine.

Regenerative medicine in tissue engineering is the process of replacing or regenerating human cells, tissues, or organs to restore or establish normal function. It is an incredibly progressive field of medicine that may, in the near future, help with the shortage of life-saving organs available through donation for transplantation vis-a-vis regenerative medicine focuses on therapeutics, functionalization and computer-aided techniques. It also covers physical and chemical aspects of chitin and chitosan, structural modifications for biomedical applications, chitosan based scaffolds and biomodelling in tissue engineering, nanomedicines and therapeutic applications. With the broad range of applications, the world is waiting for biopolymers to serve as the basis for regenerative medicine and biomedical applications.

Eine »Bibliographie der deutschen Übersetzungen aus dem Italienischen« ist schon lange ein Desiderat für die Fächer Germanistik, Romanistik, Komparatistik, Kultur- und andere Fachwissenschaften. Die große Divergenz zwischen der Masse veröffentlichter und der geringen Zahl der in den Kanon aufgenommenen Literatur macht es sehr schwer, sich über die Fülle der im Druck erschienenen Übersetzungen einen Überblick zu verschaffen. Die Zeit bis 1730 hat der bereits im Jahre 1992 veröffentlichte Teilband 1 der »Bibliographie« erfaßt. Hier wird nun die Fortsetzung dieser Bibliographie bis in die 90er Jahre des 20. Jahrhunderts vorgelegt. Um eine sichere Information zu gewährleisten, wurden alle über den Leihverkehr zugänglichen Veröffentlichungen durch Autopsie überprüft. Dem Abschlußband dieser »Bibliographie« wird eine CD-ROM, die beide Teilbände umfaßt, beigegeben. (Nur Einzelplatzversion für Windows - ab

A classic on the aesthetics of filmmaking from the pioneering Soviet director who made *Battleship Potemkin*. Though he completed only a half-dozen films, Sergei Eisenstein remains one of the great names in filmmaking, and is also renowned for his theory and analysis of the medium. *Film Form* collects twelve essays, written between 1928 and 1945, that demonstrate key points in the development of Eisenstein's film theory and in particular his analysis of the sound-film medium. Edited, translated, and with an introduction by Jay Leyda, this volume allows modern-day film students and fans to gain insights from the man who produced classics such as *Alexander Nevsky* and *Ivan the Terrible* and created the renowned "Odessa Steps" sequence.

The Fantasticks tells an age-old tale. Its ingredients are simple: a boy, a girl, two fathers, and a wall. Its scenery, a tattered

cardboard moon, hovers over an empty wooden platform. With these bare essentials, Jones and Schmidt launched a theatrical phenomenon unmatched the world over.

Capolavori di Carlo Goldoni Oxford University Press

Originally published in 1892, "the object of this Handbook is to supply readers and speakers with a lucid, but very brief account of such names as are used in allusions and references, whether by poets or prose writers; - to furnish those who consult it with the plot of popular dramas, the story of epic poems, and the outline of well-known tales. The number of dramatic plots sketched out is many hundreds. Another striking and interesting feature of the book is the revelation of the source from which dramatists and romancers have derived their stories, and the strange repetitions of historic incidents. It has been borne in mind throughout that it is not enough to state a fact. It must be stated attractively, and the character described must be drawn characteristically if the reader is to appreciate it, and feel an interest in what he reads." This work, an American reprint of *The Reader's Handbook* by E. Cobham Brewer, .."while retaining all of the original material that can interest and aid the English-speaking student, gives also 'characters and sketches found in American novels, poetry and drama.'"

"The future has attracted the interest of almost all scholars working on the history of Greek, but no satisfactory set of arguments for the developments prior to the emergence of the modern form has ever been produced. In this book Theodore Markopoulos explores and elucidates the stages that led up to the appearance of the modern future in the sixteenth century."--
