Careful consideration is given throughout to questions of style, register, and politeness which are essential to achieving an appropriate level of formality or informality in writing and speech. It surveys the contemporary linguistic scene in Italy and gives ample space to the new varieties of Italian that are emerging in modern Italy. The influence of the dialects in shaping the development of Italian is also acknowledged. Clear, readable and easy to consult via its two indexes, this is an essential reference for learners seeking access to the finer nuances of the Italian language.

Brave New World Revisited Knopf Books for Young Readers

First published in 1999, the focus of this ground-breaking study is on representing the mental world of the child with unprecedented clarity. Cedric Cullingford aims to show that this world, in its normal experience by children, is significantly unlike what we typically assume it to be, and significantly unlike anything exposed by the most prominent research programs. Querying common assumptions about children's thinking, Cullingford begins with an outline of children's understanding which emphasizes its range and complexity, along with an address of the mythology of children's intellectual incapacity and preparation for the approach to be taken in detailing children's construction of a sense of their world. The following four chapters combine to construct a description of how children approach their world, exploring theory of mind, the self, the family, the school and then the wider social and physical worlds. Cullingford achieves a vividness, immediacy and intensity not seen elsewhere, using the constant medium of the child's gaze and demonstrating that the youngest child is not simply responsive but is active and critical in interrogating the world.
