The author deals with many of the myths about rape as an infrequent act of uncontrollable sexual aggression perpetrated by strangers in public places. This study of rape is based on a series of interviews with a group of men, including rapists.

**Concern for Others**

Pan MacMillan

The COVID-19 pandemic has introduced a new paradigm in education

that has forced school management teams to re-imagine their curricula delivery functions and obligations during and post COVID-19.

Now there are concerns about the state to which curriculum delivery in schools is likely to become planned, implemented, and managed.

Investigating the Roles of School Management Teams in Curriculum Delivery improves the

quality of planning, implementation, and management of curriculum delivery to advance the quality of teaching and learning in schools.

Particularly, it envisages innovative strategies, best practices, and addresses problems in the planning, implementation, and delivery of curricula by school management teams.

Covering topics such as curriculum delivery theory,

curriculum delivery in planning, implementation, and management during and post COVID-19; curriculum delivery in assessment and alternative assessment; and reimagining inclusivity in curriculum delivery, this edited book is essential for departmental heads, deputy principals, education district officials, department of basic education curriculum

designers, instructional designers, administrators, academicians, university teachers, researchers, and post-graduate students. *Investigating the Roles of School Management Teams in Curriculum Delivery World Health Organization* In this book, the promovendus investigates the critical role a preacher and his/her homilies have in bringing transformation

, development and healing in the human society. The investigation shows how a preacher has been sidelined on issues of progress, when from time immemorial he/she has been a critical and pivotal component in the phenomenon. The study is an attempt to reclaim a preacher's role in bringing progress and healing in underdeveloped communities through homilies,

particularly, in Venda, rural South Africa. This book proposes a preacher as the transformer, developer and healer of the people.

*The New Apartheid*

Taylor & Francis

The modern workplace is often thought of as cold and rational, as no place for the experience and expression of emotions. Yet it is no more emotionless than any other aspect of life. Individuals bring their affective

states and emotional "buttons" to work, leaders try to engender feelings of passion and enthusiasm for the organization and its mission, and consultants seek to increase job satisfaction, commitment, and trust. This book advances the understanding of the causes and effects of emotions at work and extends existing theories to consider implications for the

management of emotions. The international cast of authors examines the practical issues raised when organizations are studied as places where emotions are aroused, suppressed, used, and avoided. This book also joins the debate on how organizations and individuals ought to manage emotions in the workplace. *Managing Emotions in the Workplace* is designed for

use in graduate level courses in Organizational Behavior, Human Resource Management, or Organizational Development - any course in which the role of emotions in the workplace is a central concern. Scholars and consultants will also find this book to be an essential resource on the latest theory and practice in this emerging field.

*Global Tuberculosis Report 2019*

Jacana Media Swart tuislande in Suid-Africa. Self-harm McGraw-Hill Companies This book presents the legal context and describes the ethical and practical challenges when using coercive measures in forensic psychiatric settings. A wide range of aspects relevant to the use of such measures, including environmental , patient-related, and staff-related factors, are explored, and

the experience of coercive interventions is described from the staff and the patient perspective. Differences in jurisdictions and examples of good practice are highlighted. The authors are from a range of professional backgrounds, ensuring breadth as well as depth in discussion of the topic. The use of coercive measures, in particular restraint, seclusion, and involuntary

medication, for the control of aggression in psychiatry remains controversial. Forensic mental health care deals with individuals who pose a risk to others and often present with significant management problems within institutions. The care of patients in these settings gives rise to debates about the balance between care and safety, and between the interests of the patients and those of

the wider society to be protected. Despite these tensions, limited research has been conducted specifically on the use of coercive measures in forensic mental health care. This volume aims to fill the gap and will be of value to all professionals working in forensic psychiatric settings as well as to those working in general psychiatric and custodial settings, law professionals,

and patients. *The World Drug Situation* Royal College of Psychiatrists Describes the drug situation of supply and demand at global and national levels in both the public and private sections. Divided Sisterhood Xlibris Corporation WHO's Global Tuberculosis Report provides a comprehensive and up-to-date assessment of the TB epidemic and of progress in care and

prevention at global, regional and country levels. This is done in the context of recommended global TB strategies and associated targets, and broader development goals. For the period 2016-2035, these are WHO's End TB Strategy and the United Nations' (UN) Sustainable Development Goals (SDGs), which share a common aim: to end the global TB epidemic. The main data sources for the report are

annual rounds of global TB data collection implemented by WHO's Global TB Program since 1995 and databases maintained by other WHO departments, UNAIDS and the World Bank. In WHO's 2017 round of global TB data collection, 201 countries and territories that account for over 99% of the world's population and TB cases reported data. **Global Tuberculosis Report 2017** HSRC Press Ideal for all

students studying first-level health services management, this invaluable all-in-one resource describes the environmental factors that affect health services, policy, and planning; the organization of services at the macro and micro level; and other issues such as staff absenteeism and management. **Guidelines for the management of HIV-infected children** Springer

A faith based 12 Step program... Directed toward those trapped in the labyrinth of eating disorders, their families, and their therapists, the text lays out in detail the steps taken, the tools used, the love that grew and the healing received. Illustrated with true-life experience and complete with a compilation of personal stories by individual members.

This guideline has been developed to advise on the short-term physical and psychological management and secondary prevention of self-harm in primary and secondary care. The guideline recommendations have been developed by a multidisciplinary group of healthcare professionals, patients and their representatives, and researchers after careful consideration of the best

available evidence. It is intended that the guideline will be useful to clinicians and service commissioners in providing and planning high quality care for those people who self-harm while also emphasising the importance of the experience of care for service users and carers.

*Rising to the Challenge of Change* IGI Global  
The indomitable Dr Tlaleng Mofokeng - affectionately

known as Dr T - is passionate about making sexual health and well-being services available to all, regardless of their sexual and gender identities and their economic status. This updated edition of her bestselling book is filled with the specifics of sexual anatomy and health as well as advice and facts about pleasure and sexual rights, and includes additional resources along with new sections

on coercive control as well as sex and pleasure during the time of COVID. Dr T, with her typically honest and warm approach, makes the reader feel comfortable reading about topics that are not always discussed freely, providing ALL the information that demystifies sex and sexuality in a way that is entertaining and enlightening. These guidelines will help health authorities, governmental and non-governmental agencies, and community groups who seek to develop a productive relationship between traditional and conventional health systems for HIV prevention and care in sub-Saharan Africa. They cover planning, design, implementation, evaluation, and the

scaling-up of initiatives, with the aim of expanding access to, and quality of health services. The guidance is supported by examples from successful collaborative projects with lessons that have been learnt.

Collaborating with Traditional Healers for HIV Prevention and Care in Sub-Saharan Africa  
Routledge  
Willem Saayman presents a brief overview of 350 years of Dutch Reformed Church Mission history. He attempts to write DRC mission history into Afrikaner history, and finds four distinct 'waves' of mission corresponding to four important events and turning points in Afrikaner history. This is an original and innovative attempt to gain a better understanding of mission history.

**Being Missionary, Being Human** Pan American

Health Org  
 This publication contains a number of papers which consider the public health role of vaccines in improving the health of the world's populations, and looks at the challenges of using immunisation to combat emerging and re-emerging diseases. Issues discussed include the innovative use of vaccines against diseases such as meningococcal infection in

Africa, Haemophilus influenza type b, varicella, and hepatitis, efforts to develop a new generation of vaccines against cholera and typhoid, shigella and Helicobacter pylori, as well as developments in the quest for vaccines against tuberculosis, HIV/AIDS, dengue, malaria, and hookworm. It also deals with the use of vaccines to fight bioterrorism attacks; regulatory and

safety issues; financing issues, impact of health sector reform and the sustainability of immunisation programmes. The Use of Coercive Measures in Forensic Psychiatric Care Raven Press (South Africa) WHO has published a global TB report every year since 1997. The main aim of the report is to provide a comprehensive and up-to-date assessment of the TB

epidemic, and of progress in prevention, diagnosis and treatment of the disease, at global, regional and country levels. This is done in the context of recommended global TB strategies and targets endorsed by WHO's Member States, broader development goals set by the United Nations (UN) and targets set in the political declaration at the first UN high-level meeting on TB (held in

September 2018). The 2019 edition of the global TB report was released on 17 October 2019. The data in this report are updated annually. Please note that direct comparisons between estimates of TB disease burden in the latest report and previous reports are not appropriate. The most recent time-series of estimates are published in the 2019 global TB report.

*Vaccines* Jutta South Africa's story is often presented as a triumph of new over old, but while formal apartheid was abolished decades ago, stark and distressing similarities persist. Dr Sizwe Mpofo-Walsh explores the edifice of systemic racial oppression -- the new apartheid -- that continues to thrive, despite or even because of our democratic system.

### **Treatment of Emergencies**

National Learning Corporation Recent research in the area of suicidology has provided significant new insights in the epidemiological, psychological, and biological characteristics of suicidal behaviour. The International Handbook of Suicide and Attempted Suicide is the first book to bring together this expertise and translate it into practical

guidelines for those responsible for policy issues and for those involved in the treatment and prevention of suicidal behaviour. Leading international authorities provide a truly comprehensive and research-based reference to understanding, treating, and preventing suicidal behaviour. They explore concepts and theories which best guide work within this field and detail key research

which has supported conceptual developments, preventive interventions and clinical treatment. "No self-respecting worker in deliberate self-harm and suicide prevention, either clinical or research, can afford to be without access to this comprehensive handbook - possession and regular use, may well become a marker of serious involvement in the subject! ...This is the

most comprehensive, up-to-date, informative and well-written source of information on suicide and suicidal behaviour...an invaluable work of reference which will be essential for clinicians and researchers for many years to come."
