A disturbing and powerful psychological thriller about a girl who must piece together the mystery of her kidnapping and abuse, *Pretty Girl-13* is a haunting yet ultimately uplifting story about the healing power of courage, hope, and love. Angie Chapman was thirteen years old when she ventured into the woods on a Girl Scout camping trip. Now she's returned home...only to find that it's three years later and she's sixteen—or at least that's what everyone tells her. What happened to the last three years of her life? With a tremendous amount of courage, Angie embarks on a journey to discover the fragments of her lost time. She eventually discovers a terrifying secret and must decide: What do you do when you remember things you wish you could forget? Perfect for fans of books like Elizabeth Scott's *Living Dead Girl* and Kathleen Glasgow's *Girl in Pieces*.

In the last two decades, there has been growing interest in pursuing theoretical paradigms that capture complex learning situations. Cultural Historical Activity Theory (CHAT) is one of several theoretical frameworks that became very popular among educational researchers because it conceptualizes individuals and their environment as a holistic unit of analysis. It assumes a non-dualistic ontology and acknowledges the complexities involved in human activity in natural settings. Recently, reputable journals such as the *American Psychologist*, *Educational Psychologist*, and *Educational Researcher* that are targeted for a wide-range of audience have included articles on CHAT. In many of such articles, CHAT has been referred to as social constructivism, sociocultural theory, or activity theory. Activity systems analysis is one of the popular methods among CHAT researchers for mapping complex human interactions from qualitative data. However, understanding the methods involved in activity systems analysis is a challenging task for many researchers. This difficulty derives from several reasons. First the

original texts of CHAT are in Russian and there have been numerous authors who report on the difficulties of reconciling translation problems of the works of original authors' such as Vygotsky and Leontiev. Second, in North America activity systems analysis has deviated from the Russian scholars' intentions and Engeström's original work using the triangle model to identify tensions to overcome and bring about sociopolitical change in participant practices. Third, to this date there are numerous publications on the theoretical background of activity theory and studies reporting the results of using activity systems analysis for unpacking qualitative data sets, but there have been no methodological publications on how researchers engage in activity systems analysis. Thus, there is a dearth of literature in both book and journal publications that guide researchers on the methodological issues involving activity systems analysis.

In the classic edition of this outstanding book, originally published in 1998, Richard Frankel explores adolescence as a crucial, unique, and turbulent period of human development. He provides guidance for clinicians working with young people as they undergo significant transformations in the way they think, act, feel, and perceive the world. The book addresses how the disruptions manifest in adolescent behavior are upsetting and often incomprehensible to the adults surrounding them. It seeks to revision the traumas, extreme fantasies, testing of limits, etc., so endemic to this period of life through the lens of the urge toward self-realization. This allows for new and creative ways of working with

the intensely confusing, and often extreme, countertransference feelings that arise in our encounter with adolescents. It offers ways of reflecting upon the vicissitudes of our own experience of being an adolescent that helps to unlock the typical impasses that occur in the stand-off between adult and adolescent ways of seeing the world. Through engagement with the work of Jung, Hillman, and Winnicott, Frankel offers a critique of the traditional psychoanalytic understanding of adolescence as a recapitulation of childhood, thus making a claim for adolescence as a discrete developmental period with its own originary dynamics. In this light, he explores such topics as individuation, persona, shadow, bodily, idealistic and ideational awakenings, as well as the effects of culture on development. Featuring numerous clinical case studies and clear theoretical formulations, this classic edition is important reading for psychotherapists, analysts, parents, educators, and anyone working with adolescents. This classic edition also includes a new, extended introduction by the author that examines what effects the digital revolution is having on the contemporary experience of being an adolescent. Looking back on this work nearly 25 years since its publication, Frankel contends that the core themes of adolescence addressed in this book offer a compelling framework for comprehending both the positive and negative impacts of the digital on adolescent life.

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of

land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Graffiti are ubiquitous within the ancient world, but remain underexploited as a form of archaeological or historical evidence. They include a great variety of texts and images written or drawn inside and outside buildings, in public and private places, on monuments in the city, on objects used in daily life, and on mountains in the countryside. In each case they can be seen as actively engaging with their environment in a variety of ways. *Ancient Graffiti in Context* interrogates this cultural phenomenon and by doing so, brings it into the mainstream of ancient history and archaeology. Focusing on different approaches to and interpretations of graffiti from a variety of sites and chronological contexts, Baird and Taylor pose a series of questions not previously asked of this evidence, such as: What are graffiti, and how can we interpret them? In what ways, and with whom, do graffiti communicate? To what extent do graffiti represent or subvert the cultural values of the society in which they occur? By comparing themes across time and space, and viewing graffiti in context, this book provides a series of interpretative strategies for scholars and students of the ancient world. As such it will be essential reading for Classical archaeologists and historians alike.

*Zionism, the German Empire, and Africa* explores the impact on the self-perception and culture of early Zionism of contemporary constructions of racial difference and of the experience of colonialism in imperial Germany. More specifically, interrogating in a comparative analysis material ranging from mainstream satirical magazines

and cartoons to literary, aesthetic, and journalistic texts, advertisements, postcards and photographs, monuments and campaign medals, ethnographic exhibitions and publications, popular entertainment, political speeches, and parliamentary reports, the book situates the short-lived but influential Zionist satirical magazine *Schlemiel* (1903-07) in an extensive network of nodal clusters of varying and shifting significance and with differently developed strains of cohesion or juncture that roughly encompasses the three decades from 1890 to 1920.

This book constitutes the proceedings of the 12th European Conference on Technology Enhanced Learning, EC-TEL 2017, held in Tallinn, Estonia, in September 2017. The 24 full papers, 23 short papers, 6 demo papers, and 22 poster papers presented in this volume were carefully reviewed and selected from 141 submissions. The theme for the 12th EC-TEL conference on 'Data Driven Approaches in Digital Education' aims to explore the multidisciplinary approaches that effectively illustrate how data-driven education combined with digital education systems can look like and what are the empirical evidences for the use of data driven tools in educational practices.

Cultural stereotypes to the contrary, approximately half of all video game players are now women. A subculture once dominated by men, video games have become a form of entertainment composed of gender binaries. Supported by games such as Diner Dash, Mystery Case Files, Wii Fit, and Kim Kardashian: Hollywood—which are all specifically marketed toward women—the gamer industry is now a major part of imagining what femininity should look like. In *Ready Player Two*, media critic Shira Chess uses the concept of “Player Two”—the industry idealization of the female gamer—to examine the assumptions implicit in video games designed for women and how they have impacted gaming culture and the larger society. With *Player Two*, the video game industry has designed specifically for the feminine ideal: she is white, middle class, heterosexual, cis-gendered, and abled. Drawing on categories from time management and caregiving to social networking, consumption, and bodies, Chess examines how games have been engineered to shape normative ideas about women and leisure. *Ready Player Two* presents important arguments about how gamers and game developers must change their thinking about both women and games to produce better games, better audiences, and better industry practices. Ultimately, this book offers vital prescriptions for how one of our most powerful entertainment industries must evolve its ideas of women.

Putting China into the context of general anthropology offers novel insights into its history, culture and society. Studies in the anthropology of China need to look

outwards, to other anthropological areas, while at the same time, anthropologists specialised elsewhere cannot afford to ignore contributions from China. This book introduces a number of key themes and in each case describes how the anthropology and ethnography of China relates to the surrounding theories and issues. The themes chosen include the anthropology of intimacy, of morality, of food and of feasting, as well as the anthropology of civilisation, modernity and the state. *The Anthropology of China* covers both long historical perspectives and ethnographies of the twenty-first century. For the first time, ethnographic perspectives on China are contextualised in comparison with general anthropological debates. Readers are invited to engage in and rethink China's place within the wider world, making it perfect for professional researchers and teachers of anthropology and Chinese history and society, and for advanced undergraduate and graduate study.

"The animus is the deposit, as it were, of all woman's ancestral experiences of man-and not only that, he is also a creative and procreative being." -C.G. Jung Inextricably enmeshed in the life of

every woman is a constellation of autonomous energy that Jung called animus, her masculine side. As a woman develops psychologically, animus changes, appearing and reappearing as child or adult, lover or enemy, king or slave, animal or spirit. All these manifestations of animus energy are reflected in her experience of masculinity, both in herself and in others. Animus Aeternus weaves developmental theories from depth psychology with the poetry of women-including Sylvia Plath, Adrienne Rich, Emily Dickinson, Teresa of Avila and Edna St. Vincent Millay-to trace the history and meaning of this lifetime companion, illustrating how animus participates in a woman's life, whether we are conscious of it or not. Like dreams and active imagination, poetry speaks in images from the soul. In choosing women's poetry as well as their dreams to illustrate the essence of animus, the author adds the immediacy of soul-made truths to the lucidity of her conceptual matrix.

A brief but extraordinarily powerful novel by the author of *Dreams of My Russian Summers* and *Requiem for a Lost Empire*, *Music of a Life* is set in the period just before, and two decades after, World War II. Alexei Berg's father is a well-known dramatist, his mother a famous opera singer. But during Stalin's reign of terror in the 1930s they, like millions of other Russians, come under attack for their presumed lack of political purity. Harassed and proscribed, they have nonetheless, on the eve of Hitler's war, not yet been arrested. And young Alexei himself, a budding classical pianist, has been allowed to continue his musical studies. His first solo concert is

scheduled for May 24, 1941. Two days before the concert, on his way home from his final rehearsal, he sees his parents being arrested, taken from their Moscow apartment. Knowing his own arrest will not be far behind, Alexei flees to the country house of his fiancée, where again betrayal awaits him. He flees, one step ahead of the dreaded secret police until, taking on the identity of a dead soldier, he enlists in the Soviet army. Thus begins his seemingly endless journey, through war and peace, until he lands, two decades later, in a snowbound train station in the Urals, where he relates his harrowing saga to the novel's narrator. An international bestseller, *Music of a Life* is, in the words of *Le Monde*, "extremely powerful . . . a gem."

This book explains how and why information literacy can help to foster critical thinking and discerning attitudes, enabling citizens to play an informed role in society and its democratic processes. In early 21st century societies, individuals and organisations are deluged with information, particularly online information. Much of this is useful, valuable or enriching. But a lot of it is of dubious quality and provenance, if not downright dangerous. Misinformation forms part of the mix. The ability to get the most out of the information flow, finding, interpreting and using it, and particularly developing a critical mindset towards it, requires skills, know-how, judgement and confidence – such is the premise of information literacy. This is true for many aspects of human endeavour, including education, work, health and self-enrichment. It is notably true also for acquiring an understanding of the wider world, for reaching informed

views, for recognising bias and misinformation, and thereby for playing a part as active citizens, in democratic life and society. This ground-breaking and uniquely multi-disciplinary book explores how information literacy can contribute to fostering attitudes, habits and practices that underpin an informed citizenry. The 13 chapters each come from a particular perspective and are authored by international experts representing a range of disciplines: information literacy itself, but also political science, pedagogy, information science, psychology. *Informed Societies: Why Information Literacy matters for citizenship, participation and democracy* covers: - why information literacy and informed citizens matter for healthy, democratic societies - information literacy's relationship with political science - information literacy's relationship with human rights - how information literacy can help foster citizenship, participation, empowerment and civic engagement in different contexts: school students, refugees, older people and in wider society - information literacy as a means to counter misinformation and fake news - the challenges of addressing information literacy as part of national public policy. The book will be essential reading for librarians and information professionals working in public libraries, schools, higher education institutions and public bodies; knowledge and information managers in all sectors and student of library and information science students, especially those at postgraduate/Masters level who are planning dissertations. Because of the topicality and political urgency of the issues covered, the book will also be of interest to students of political science, psychology, education and media studies/journalism; policy-

makers in the public, commercial and not-for-profit sectors and politicians implications of information use and information/digital literacy.

Finalist for the Inaugural Sue Grafton Memorial Award Maisie Dobbs—one of the most complex and admirable characters in contemporary fiction (Richmond Times Dispatch)—faces danger and intrigue on the home front during World War II. During the months following Britain's declaration of war on Germany, Maisie Dobbs investigates the disappearance of a young apprentice working on a hush-hush government contract. As news of the plight of thousands of soldiers stranded on the beaches of France is gradually revealed to the general public, and the threat of invasion rises, another young man beloved by Maisie makes a terrible decision that will change his life forever. Maisie's investigation leads her from the countryside of rural Hampshire to the web of wartime opportunism exploited by one of the London underworld's most powerful men, in a case that serves as a reminder of the inextricable link between money and war. Yet when a final confrontation approaches, she must acknowledge the potential cost to her future—and the risk of destroying a dream she wants very much to become reality.

Why do design? What is design for? These are forward-looking questions for a creative discipline that seems more slippery to define than ever. In a world of dwindling natural resources, exhausted social and political systems, and an overload of information there are many urgent reasons to reimagine the design discipline, and there is a growing need to look at design education. Learning and unlearning should become part of an ongoing educational practice. We need new proposals for how to organise society, how to structure our governments, how to live with, not against, the planet, how to sift fact from fiction, how to relate to each other, and frankly, how to simply survive. The 4th Istanbul Design Biennial, and this publication Design as Learning ask: can design and design education provide these critical ideas and strategies? -- Back cover.
