Enlarged print edition now available! Making use of his scholar's understanding, yet writing in an approachable and

anecdotal style, Tom Wright manages to unravel the great complexity of the extraordinary Gospel of John. He describes it as "one of the great books in the literature of the world; and part of its greatness is the way it reveals its secrets not just to a high-flown leaning but to those who come to it with humility and hope." Wright's stimulating comments are combined with his own fresh and inviting translation of the Bible text. Tom Wright has undertaken a

tremendous task: to provide guides to all the books of the New Testament, and to include in them his own translation of the entire text. Each short passage is followed by a highly readable discussion with background information, useful explanations and suggestions, and thoughts as to how the text can be relevant to our lives today. A glossary is included at the back of the book. The series is suitable for group study, personal study, or daily devotions.

#### **1 Flat World Knowledge**

This volume synthesizes and advances existing knowledge of consumer response to visuals.

Representing an interdisciplinary perspective, contributors include scholars from the disciplines of communication, psychology, and marketing. The book begins with an overview section intended to situate the reader in the discourse. The overview describes the state of knowledge in both

academic research and actual practice, and provides concrete sources for scholars to pursue. Written in a non-technical language, this volume is divided into four sections: Image and Response - illustrates the difficulty encountered even in investigating the basic influences, processes, and effects of "mere exposure" to imagery. Image and Word - presents instances in which the line between words and pictures is blurred, such as the corporate logo which is

often pictorial in nature but communicates on an abstract level usually attributed to words. Image and the Ad - contributes to our appreciation for the exquisite variations among advertising texts and the resultant variability in response, not only to different ads but among different viewers of the same ad. Image and Object - carries the inquiry of visual response over the bridge toward object interaction. Having traveled a path that has gone from the precise

working of the brain in processing visual stimuli all the way to the history of classical architecture, readers of this volume will have a new respect for the complexity of human visual response and the research that is trying to explain it. It will be of interest to those involved in consumer behavior, consumer psychology, advertising, marketing, and visual communication.

Volume One traces the history of Opel and Vauxhall separately from inception through to the 1970s and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering

features and the role Opel has taken of providing global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specification tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines

unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo, Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history

of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM.

Entrepreneurs—and entrepreneurial companies—live or die by the quality of their plans and proposals. Whether it's to get funding for a new product line or business from a client, writing hard-hitting prose that answers essential questions and makes specific requests is an indispensable skill.

Entrepreneur, ad man,

and writing teacher

Dennis Chambers shows how entrepreneurs can persuade people, through skillful writing, to pony up capital or contracts. This ability—which can be learned—is rare in today's media-saturated world. But it counts more than ever if an entrepreneur wants to make it over the magical five-year hump and on into lasting business success.

Numerous examples and exercises ensure that entrepreneurs understand how the writing game is played—and that they

play it well. Unfortunately, most don't play this game well. Most business writers mistakenly believe their task is to inform. They write to fill an information gap or to update the reader on a particular project. Or they write about what's important to them. What these writers do not take into account is that the speed of today's work world has reached overdrive. The typical reader simply doesn't have time to ponder dense, poorly organized information and intuit the

appropriate action. And readers don't give a hoot about what's important to the writer—they want to know what's in it for themselves. Business writers need to use all the tools at their command to persuade, inspire action, and in general move a project forward. This book is about how to be persuasive in two key skills in business: writing proposals and writing business plans. Step by step, Dennis Chambers illustrates the techniques of effective business writing, with numerous

examples throughout. Whether the objective is to secure financing from an investor, lay out a marketing strategy, or secure a large contract, getting results requires crafting an effective structure for the proposal, and using words that sell. Chambers is an able guide in saving entrepreneurs time and undue effort while reaching the goal of long-term business success.

Emphasizing the understanding of images and their influences on how they affect our attitudes, beliefs, and actions, this fully updated sixth edition offers consequential ways of looking at images from the perspectives of photographers, critics, theoreticians, historians, curators, and editors. It invites informed conversations about meanings and implications of images, providing multiple and sometimes conflicting answers to questions such

as: What are photographs? Should they be called art? Are they ethical? What are their implications for self, society, and the world? From showing how critics verbalize what they see in images and how they persuade us to see similarly, to dealing with what different photographs might mean, the book posits that some interpretations are better than others and explains how to deliberate among competing interpretations. It looks at how the worth of

photographs is judged aesthetically and socially, offering samples and practical considerations for both studio critiques for artists and professional criticism for public audiences. This book is a clear and accessible guide for students of art history, photography and criticism, as well as anyone interested in carefully looking at and talking about photographs and their effects on the world in which we live. *Bug Out to Belize* Rosetta Books

Jackaroo; n. a male station hand. That is according to the "Australian Slang Dictionary" whereas the Macquarie Dictionary gives a more realistic version. " A jack of all

trades". Certainly a jackaroo is far more than 'a male station hand', which will be evident as the reader moves through this recount of the writer's five years of 'Station Management Apprenticeship", possibly a more precise definition of the word. ('Station" being a large sheep and/or cattle property/ranch). The origin of the word 'jackaroo' has been debated as long as the word has been in existence, but the most popular belief is that early

English migrants, who worked on stations in the Australian Outback, were given the name of "Jack Raw", being raw to the ways of the Australian bush. One such English migrant, whose name was Jack Carew may have had an influence on the foundation of the word. There is also the more recent female counterpart, known as a jillaroo. It is however, generally agreed that the word has no connection with the famed Australian icon, the kangaroo.
